*Club Cultures* Silvia Rief,2011-04-27 This book explores contemporary club and dance cultures as a manifestation of aesthetic and prosthetic forms of life. Rief addresses the

questions of how practices of clubbing help cultivate particular forms of reflexivity and modes of experience, and how these shape new devices for reconfiguring the boundaries around youth cultural and other social identities. She contributes empirical analyses of how such forms of experience are mediated by the particular structures of night-clubbing economies, the organizational regulation and the local organization of experience in club spaces, the media discourses and imageries, the technologies intervening into the sense system of the body (e.g. music, visuals, drugs) and the academic discourses on dance culture. Although the book draws from local club scenes in London and elsewhere in the UK, it also reflects on similarities and differences between nightclubbing cultures across geographical contexts.

**M8 Greyhound Light Armored Car 1941-91** Steven J. Zaloga, 2012-09-20 The M8 light armored car was the only significant wheeled combat vehicle used by the US Army in World War II. In conjunction with the lightly armed utility version, the M20, it was the staple of the army's cavalry squadrons for use in reconnaissance and scouting. First entering combat in Italy in 1943, it was widely used throughout the campaign in northwest Europe, though its off-road performance was found to be wanting. This title describes the design and development of the M8, covering the many variants that were produced during World War II and afterwards, along with a comprehensive survey of its operational use.

You get a solid grounding in the fundamental concepts and terminology of astronomy, and specific advice about choosing, buying, using, and maintaining the equipment required for observing. The Illustrated Guide to Astronomical Wonders is designed to be used in the field under the special red-colored lighting used by astronomers, and includes recommended observing targets for beginners and intermediate

observers alike. You get detailed star charts and specific information about the best celestial objects. The objects in this book were chosen to help you meet the requirements for several lists of objects compiled by The Astronomical League (<http://www.astroleague.org>) or the Royal Astronomical Society of Canada (<http://www.rasc.ca>): Messier Club. Binocular Messier Club Urban Observing Club Deep Sky Binocular Club Double Star Club RASC Finest NGC List Completing the list for a particular observing club entitles anyone who is a member of the Astronomical League or RASC to an award, which includes a certificate and, in some cases, a lapel pin. You might even find a new object, like amateur astronomer Jay McNeil. On a clear cold night in January 2004, he spotted a previously undiscovered celestial object near Orion, now called McNeil's Nebula. Discover what awaits you in the night sky with the Illustrated Guide to Astronomical Wonders.
