India's Human Security Jason Miklian,Ashild Kolas,2013-09-11 India's explosive economic growth and emerging power status make it a key country of interest for policymakers, researchers and scholars within South Asia and around the world. But while many of India's threats and conflicts are strategized and discussed extensively within the confines of security studies, strategic studies and conventional international relations perspectives, many less visible challenges are set to impact significantly on India's potential for economic growth as well as the human security and livelihoods of hundreds of millions of Indian citizens. Drawing on extensive research within India, this book looks at some of the 'hidden risks' that India faces, exploring how a broadened scope of what constitutes 'risk' itself holds value for Indian security studies practitioners and policymakers. It highlights several human security risks facing India, including the inability of the world's largest democracy to deal effectively with widespread poverty and health issues, resource depletion and environmental mismanagement, pervasive corruption and institutionalized crime, communal violence, a protracted Maoist insurgency, and deadlocked peace processes in the Northeast among others. The book extracts common themes from these seemingly disparate problems, discussing what underlying failures allow them to persist and why policymakers heavily securitize some political issues while ignoring others. Providing an understanding of how several lesser-studied risks can pose potential or actual threats to Indian society and its 'emerging power' growth narrative, this book is a useful contribution to South Asian Studies, International Security Studies and Global Politics.

Technology Business Incubators in India M H Bala Subrahmanya,H S Krishna,2021-01-18 Why do Technology Business Incubators (TBIs) emerge rapidly as an instrument of start-up promotion in emerging economies like India? In what forms? What role do they play in start-up promotion? What are their major achievements? These questions have been answered empirically in this book. Accordingly, this book explores the nature, structure and process of incubation resulting in start-up generation and in the process, R&D contribution emerging from TBIs comprising accelerators, incubators and co-working spaces in three of the leading start-up hubs, namely, Bangalore, Chennai and Hyderabad, in India. It describes typology, objectives, sponsors, and facilities provided by these TBIs. It further explores the process of selection, incubation and graduation of start-ups as it exists in these TBIs. Thereafter, it makes an assessment of R&D contributions that have emerged from the TBIs in the form of R&D inputs comprising personnel and capital expenditure, and R&D output in the form of new products/services developed, patent applications filed and revenue generated. Policy makers, researchers, engineering and management students, technology and business mentors, angels, venture capitalists, and MNC executives will find this book informative, revealing and a source of valuable insights on the new, emerging India.

A STUDY ON EMPLOYEE RETENTION PRACTICES IN THE 'IT' SECTOR Dr. Ch. Munendar Reddy,

Mapping Innovation in India's Creative Industries Rohit K Dasgupta,Jennie Jordan,Graham Hitchen,Kishalay Bhattacharjee,Diviani Chaudhuri,Deepa D,Adrija Roychowdhury,2023-12-01 The first in-depth study of the Indian creative industries, this book provides a comprehensive mapping of the Indian creative industries and its policy landscape, developing and defining key concepts and terms and offering detailed case studies of specific sectors, geographic regions and governance structures. Using an ecosystem framework, this book focuses on strategy/policy; tangible and intangible infrastructure; and funding and investment to understand the main drivers and barriers across nine sub-sector value chains. With investment from global brands into many sectors, it tracks how Indian creative industries are fostering innovation and design for social and ecological sustainability. It also delves into India's informal economy to share key policy insights. The volume will be of great interest to scholars and researchers of public policy, business studies and South Asian studies. It will also be a key document for foreign investors willing to invest in one of the fastest-growing and stable economies in the world.

State of the World's Cities 2010/2011 ,2010 One billion people worldwide live in slums and that figure is predicted to reach 2 billion by 2030. This new volume from UN-HABITAT unpacks the complex social and economic issues using the novel conceptual framework of the urban divide.

Water and Urban Development Paradigms Jan Feyen,Kelly Shannon,Matthew Neville,2008-09-03 Communication across and integration of disciplines in the urban-water sector seems today more imperative than ever before. Water is a strategic and shrinking resource. It is probably the world's most valuable resource and clean water has even been touted as the 'next oil'. Control of water - from access to management - has always been a

Secured Techno- Economic Growth of India Dr. P. Sekhar, The book explores sector-wise dimensions of security and how security undermines India's capacity to provide opportunities and services to help people sustain livelihoods. In addition, it focuses on some non-traditional security issues relative to each sector and their security implications for India. While India will continue to grow at a healthy rate, it is important for India to provide a stable economic environment in which we can grow rapidly and attract investments. The object of economic activity in any country is to promote the well-being and standard of living of the people. This book is an exhaustive effort to overview India as a nation which has a sound economic and social infrastructure. The economic infrastructure includes the roads, airports, railways, ports, telecom and power. Education and training, tourism and health services are included in the social infrastructure. It also reflects on the fact that despite being a highly industrialized country, agriculture is the main occupation of the people of India. This book examines growth experience in various states region and sectors of the India's and Growth components of India. This Book describes policies, roles and responsibilities, and the concept of operations for assessing, prioritizing, protecting, and restoring critical infrastructure and key resources (CIKR) of the India and its territories and possessions during actual or potential security risks. Hence the book attempts to identify principal drivers of the economy in India and their contribution to economic growth. The sectors are- Industry, Power, Education, Agriculture, Healthcare, Telecom, Banking, Real-estate, Transport, Tourism etc. The entire growth process will come to a screeching halt if security concerns are not timely and adequately addressed and the value addition comes with prevention, response, restoration, and recovery efforts when there is full participation of government and industry partners

Getting China and India Right Anil K. Gupta,Haiyan Wang,2009-02-17 This book is the first strategic guide for multi-national corporations (MNCs)who are contemplating expanding into both China and India. Gupta and Wang explain how many MNCs view China and India solely from the lens of off-shoring and cost-reduction, and focusing their marketing strategies on only the top 5-10% of the population. This is a missed opportunity. China and India are the only two countries that constitute four realities that are strategically crucial for the global enterprise: Both provide mega-markets for almost every product and service Both have platforms that will dramatically reduce the company's global cost structure Both have platforms that will significantly boost the company's global technology and innovation base Both are springboards for the emergence of new fearsome global competitors. This book aims to shed light on the brutal competition for markets and resources in China and India as well as lays out the strategic action implications for those companies who want to emerge as the global players of tomorrow.

Sewing Success? Gladys Lopez-Acevedo, Raymond Robertson, 2012-03-14 The end of the MFA was followed by rising apparel exports, falling prices, and a reallocation of production and employment between countries. There were also significant changes within countries. The first main finding of this report is that export and employment patterns after the MFA/ATC did not necessarily match predictions. While many predicted that production would shift to low-wage countries, this book shows that only 13 percent of variation in export changes post-MFA can be explained by the differences in wage levels. Second, changes in exports are usually, but not always, good indicators of what happens to wages and employment within countries. This is especially important for policy because it shows that simply using exports as a metric of 'success' in terms of helping the poor is not sufficient. Third, the Book identifies the specific ways that changes in the global apparel market affected earnings. The Book shows that wage premiums change in predictable ways: rising (in most cases) in countries that were proactive in adapting to the MFA phase-out and expanded their market shares, and falling in countries that failed to respond in a timely fashion to the changing environment. The Book shows that promoting 'upgrading' (defined as shifting to higher-value goods, shifting up the value chain, or 'modernizing' production techniques) seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor. Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind. Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial. Otherwise, less-skilled workers could miss out on opportunities to gain valuable work experience in manufacturing.

India's Economic Resurgence C B Rao, 2018-10-26 Economics is a social science concerned mainly with description and analysis of the production, distribution, and consumption of goods and services. Beyond the various theories and models, however, economics has close relationship with day to day life. This book reviews the economic journey of India over the last seventy years, and seeks to stimulate the readers' thinking on some major issues and potentialities facing the Indian economy. Five main themes flow through the book - India's potential to be the World's third largest economic power by 2030, the challenges of socio-economic equity that India faces, the several opportunities that India has in that journey, the critical role of governance, leadership, management and administration, and the importance of mindset changes to power India's future economic growth. A special focus is laid on the role of government policies and projects in socio-economic development. The book sensitises the readers, including college students in general, and students of economics in particular, to the happenings around us which have significant economic import. The book makes all through its seventy chapters several suggestions to power India's growth as a global economic superpower, on a plank of socioeconomic equity. This book serves as an expansive thought primer and focussed execution guide for an economically independent and resurgent India.

The Geography of India Britannica Educational Publishing, 2010-04-01 With a landscape as diverse as the multitude of people that inhabit it, India hosts a wide range of communities, from remote villages nestled in the Himalayas to thriving urban centers. In many ways, it is a land of contrasts, as reflected in its geography—shaped as much by the annual monsoon season as the arid deserts that punctuate the nation. In this volume, readers will experience a juxtaposed journey, visiting both areas that have remained untouched for centuries and areas of technological advancement that have brought the country to the forefront of innovation.

Entrepreneurial Ecosystems for Tech Start-ups in India M H Bala Subrahmanya, 2021-01-18 Why do tech start-ups emerge rapidly in emerging economies like India? What kind of entrepreneurial ecosystems have evolved for tech start-up promotion? What is their structure? What role do they play in the nurturing of tech start-ups to the advantage of regional economies? This book examines the trend of evolving entrepreneurial ecosystems for tech start-ups in India, ascertains its structure and examines its role in the nurturing of tech start-ups over its lifecycle, to bring out its implications for Indian economy. At the outset, it traces and conceptualizes what it terms an ideal ecosystem for tech start-ups in the Indian context, and explores the historical evolution of entrepreneurial ecosystems in two of the six leading start-up hubs in the country, namely, Bangalore and Hyderabad. It describes the characteristics and the structure of these ecosystems as they prevailed in the two start-up hubs, and analyses the role that they play in nurturing the development of tech start-ups. Finally, this book explores the ecosystem gaps that exist in the two cities, the factors causing these gaps, and makes policy recommendations to encourage the growth of a healthy and vibrant entrepreneurial ecosystem for the accelerated growth of tech start-ups in these two cities in particular, to promote employment, innovation and economic growth in the country at large. Policy makers, researchers, engineering and management students, technology and business mentors, angels, venture capitalists, and MNC executives will find the book informative, revealing and a source of valuable insights into a new, rapidly emerging entrepreneurial India.
