Alexander J. Smola

**Margin** Richard Swenson, 2014-02-27 Margin is the space that once existed between ourselves and our limits. Today we use margin just to get by. This book is for anyone who yearns for relief from the pressure of overload. Reevaluate your priorities, determine the value of rest and simplicity in your life, and see where your identity really comes from. The benefits can be good health, financial stability, fulfilling relationships, and availability for God's purpose.

**Margin Trading from A to Z** Michael T. Curley, 2008-03-11 Margin Trading from A to Z offers a step-by-step explanation of the mechanics of the margin account. Filled with in-depth insights and expert advice, this book uses a hands-on approach to show how a Regulation T Margin Call is arrived at; how it may be answered; and how an account looks once a call is issued and after the call is met. Other items covered by this detailed guide include minimum maintenance requirements, short selling, memorandum accounts, options, hedge funds, and portfolio margining. The book includes quiz questions and a comprehensive exam.

**Gross Margin: 26 Factors Affecting Your Bottom Line** Bill Lee, 2003

**Advances in Large Margin Classifiers** Alexander J. Smola, 2000 The book provides an overview of recent developments in large margin classifiers, examines connections with other methods (e.g., Bayesian inference), and identifies strengths and weaknesses of the method, as well as directions for future research. The concept of large margins is a unifying principle for the analysis of many different approaches to the classification of data from examples, including boosting, mathematical programming, neural networks, and support vector machines. The fact that it is the margin, or confidence level, of a classification--that is, a scale parameter--rather than a raw training error that matters has become a key tool for dealing with classifiers. This book shows how this idea applies to both the theoretical analysis and the design of algorithms. The book provides an overview of recent developments in large margin classifiers, examines connections with other methods (e.g., Bayesian inference), and identifies strengths and weaknesses of the method, as well as directions for future research. Among the contributors are Manfred Oppel, Vladimir Vapnik, and Grace Wahba.

**Ocean Margin Systems** Gerold Wefer, David Billet, Dierk Hebbeln, Bo B. Jorgensen, Michael Schlüter, Tjeerd C.E. Van Weering, 2013-11-11 Ocean margins are the transitional zones between the oceans and continents. They represent dynamic systems in which numerous processes shape the environment and result in impacting the utilization and hazard potentials for humans. These processes are influenced by a variety of steering mechanisms, from mountain building and climate on the land to tectonics and sea-level fluctuations in ocean margins. This book examines various aspects of regulation for the long-term development of ocean margins, of the impact of fluids and of the dynamics of benthic life at and below the seafloor in ocean margin systems.

**Evolution of the Levant Margin and Western Arabia Platform Since the Mesozoic** Catherine Homberg, Martina Bachmann, 2010 With original data in various fields from the offshore Levant Basin and adjacent continental slopes and platforms, these papers document the tectonic structures and sedimentological patterns associated with the development of the Levant Basin.

**A New Rule for Setting the Margin for the Basic Rate of Charge** International Monetary Fund. Finance Dept., 2011-11-22 In April 2008, the Executive Board adopted a package of measures to reform the Fund's income model. This followed an intensive work program building on the recommendations of an independent committee appointed by the Managing Director to study options for sustainable long-term financing for the Fund. The resulting new income model aims to broaden the Fund's income sources and reduce its reliance on lending income as the primary source of revenue. This new model includes: (i) creating an endowment funded with the profits from a limited sale of the Fund's gold holdings; (ii) expanding the Fund's investment authority to enhance the expected return on the Fund's investments; and (iii) resuming the practice of reimbursing the General Resources Account (GRA) for the cost of administering the PRG Trust

**The Western Alps, from Rift to Passive Margin to Orogenic Belt** Pierre-Charles de Graciansky, David G. Roberts, Pierre Tricart, 2010-10-06 This book addresses the evolution of the Alpine fold belt for the first time in the English language. It builds on classical Alpine geological studies made since the start of the 19th century by combining that research with modern results obtained over the past 50 years using new marine geological and geophysical technologies. The book thus provides an integrated overview of the evolution of the Alps from rift to passive margin to the present fold belt over a significant time span. \* an integrated multidisciplinary synthesis of the evolution of the Alps from rift to passive margin to foldbelt. \* 175 figures, structural maps and cross sections. \* an index of localities referred to in the text and figures. \* a brief summary of the history and development of ideas concerning the evolution of fold belts and passive margins since the 19th century. \* provides basis for further enquire and research \* provides wider context relevant to marine and oil industry geoscientists.

**Adjusted Margin** Kate Eichhorn, 2016-09-16 How xerography became a creative medium and political tool, arming artists and activists on the margins with an accessible means of making their messages public. This is the story of how the xerographic copier, or "Xerox machine," became a creative medium for artists and activists during the last few decades of the twentieth century. Paper jams, mangled pages, and even fires made early versions of this clunky office machine a source of fear, rage, dread, and disappointment. But eventually, xerography democratized print culture by making it convenient and affordable for renegade publishers, zinesters, artists, punks, anarchists, queers, feminists, street activists, and others to publish their work and to get their messages out on the street. The xerographic copier adjusted the lived and imagined margins of society, Eichhorn argues, by supporting artistic and political expression and mobilizing subcultural movements. Eichhorn describes early efforts to use xerography to create art and the occasional scapegoating of urban copy shops and xerographic technologies following political panics, using the post-9/11 raid on a Toronto copy shop as her central example. She examines New York's downtown art and punk scenes of the 1970s to 1990s, arguing that xerography—including photocopied posters, mail art, and zines—changed what cities looked like and how we experienced them. And she looks at how a generation of activists and artists deployed the copy machine in AIDS and queer activism while simultaneously introducing the copy machine's gritty, DIY aesthetics into international art markets. Xerographic copy machines are now defunct. Office copiers are digital, and activists rely on social media more than photocopied posters. And yet, Eichhorn argues, even though we now live in a post-xerographic era, the grassroots aesthetics and political legacy of xerography persists.

**Exhumation of the North Atlantic Margin** Anthony G. Doré, 2002

*A Minute of Margin* Richard A. Swenson, M.D.,2014-02-27 Rediscover the space you need in between your work, your schedule, and your limits by eliminating unneeded frustrations and reflecting on how you spend your time. From Richard Swenson, author of the bestselling book *Margin*, this devotional's 180 daily readings offer encouragement, healing, and rest as you deal with time management, stress, and busyness.

**Over-the-counter Margin Regulations** United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Commerce and Finance,1968

**Dynamics of the Norwegian Margin** Geological Society of London,2000 The papers and research results presented here have been prepared as part of the Integrated Basin Studies project. This project had the objective of studying the lithospheric and upper crustal processes governing the formation and evolution of extensional and foreland basins and to decipher the role of tectonics, sea level and sedimentary processes in the filling of such basins. The Dynamics of the Norwegian Margin module focused on the rifted sedimentary basins of the northern North Sea and off Mid-Norway. This prolific hydrocarbon province has an extensive industry and scientific database and offers a unique opportunity to study fundamental earth processes, from failed rifting to crustal breakup and accretion of oceanic crust. A set of new models for basin formation and filling has been derived, including linking of sedimentary basin faulting to lower crustal deformation, signature and variability of syn-rift infill, correlation of mineralogy to seismic signature, nature and characteristics of volcanic margin formation and distribution of present-day stress field.

**The Margin of Appreciation Doctrine in the Dynamics of European Human Rights Jurisprudence** Howard Charles Yourow,2021-09-27 The Margin of Appreciation Doctrine in the Dynamics of European Human Rights Jurisprudence is the first full-length monograph to treat this subject, which is of central importance to the interpretation and application of the European Convention on Human Rights. It will enrich the understanding and appreciation of judges, advocates, civil servants, scholars, researchers, students, and indeed of anyone whose life and work is affected by national and international human rights adjudication. This thorough and learned analysis synthesizes the work of the Strasbourg judicial organs, proceeding in the light of the ongoing debates on the appropriate place of the margin doctrine in the Strasbourg jurisprudence. The author's rich conclusions add texture and perspective to the future judicial and scholarly dialogues which will no doubt continue to surround this subject matter. The text is eminently readable, written in a clear and precise style to be appreciated by the novice and specialist alike. The newcomer to human rights and to the Convention will find it an inviting introduction to complex material; the expert will gain new and expanded insights into the development of the case law rarely to be found in this breadth and depth.

**Marine Geological and Geophysical Investigations of the Antarctic Continental Margin, 1984** Stephen Eittreim,Alan K. Cooper,1984

From Depositional Systems to Sedimentary Successions on the Norwegian Continental Margin Allard W. Martinus,R. Ravnås,J. A. Howell,R. J. Steel,J. P. Wonham,2014-10-06 The Norwegian Continental Shelf (NCS), focus of this special publication, is a prolific hydrocarbon region and both exploration and production activity remains high to this day with a positive production outlook. A key element today and in the future is to couple technological developments to improving our understanding of specific geological situations. The theme of the publication reflects the immense efforts made by all industry operators and their academic partners on the NCS to understand in detail the structural setting, sedimentology and stratigraphy of the hydrocarbon bearing units and their source and seal. The papers cover a wide spectrum of depositional environments ranging from alluvial fans to deepwater fans, in almost every climate type from arid through humid to glacial, and in a variety of tectonic settings. Special attention is given to the integration of both analogue studies and process-based models with the insights gained from extensive subsurface datasets.

**Field Margin Vegetation and Socio-Ecological Environment** Sunil Nautiyal,Mrinalini Goswami,Puneeth Shivakumar,2021-06-28 This book has been produced as a part of the project 'Social-Ecological Systems at the Indian Rural-Urban Interface: Functions, Scales, and Dynamics of Transition'. It addresses transition processes in agriculture and society triggered by urbanization, focusing on Bengaluru as an example of a rapidly growing megacity in India. Adopting a holistic, multidisciplinary approach embedded within a social-ecological systems research framework, it explores how the physical and socio-economic landscapes have led to changes in economic priorities, which have overpowered ecological and traditional priorities with regard to ecosystem governance. Allowing readers to gain a deeper understanding of this unexplored dimension of socio-ecological systems, this book is a valuable resource for international researchers, scholars and master's students in the field of environmental science, socio-ecology, forestry and agriculture.

**Improved Classification Rates for Localized Algorithms under Margin Conditions** Ingrid Karin Blaschzyk,2020-03-18 Support vector machines (SVMs) are one of the most successful algorithms on small and medium-sized data sets, but on large-scale data sets their training and predictions become computationally infeasible. The author considers a spatially defined data chunking method for large-scale learning problems, leading to so-called localized SVMs, and implements an in-depth mathematical analysis with theoretical guarantees, which in particular include classification rates. The statistical analysis relies on a new and simple partitioning based technique and takes well-known margin conditions into account that describe the behavior of the data-generating distribution. It turns out that the rates outperform known rates of several other learning algorithms under suitable sets of assumptions. From a practical point of view, the author shows that a common training and validation procedure achieves the theoretical rates adaptively, that is, without knowing the margin parameters in advance.
