Ray Bradbury

The Martian Andy Weir, 2014-02-11 Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old human error are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

The Martian Among Us Dexter Franklin, 2021-01-07 What if Earth's premier scientific genius Elon Musk and his Space rocket technology were taken over by a desperate alien civilization? Brimming with suspense and intrigue, the mind-blowing Science Fiction novel *The Martian Among Us* takes readers on an action-packed thrill-ride, as serial entrepreneur Elon Musk becomes the target of an intricate plot by a secret Martian settlement to rescue their civilization from certain destruction. A secret underground civilization powered and heated by liquid magma has been living in an underground city on the planet Mars. The Martians are highly intelligent but very isolated beings, as Mars' frigid surface temperatures keeps them far below ground. Now, there are signs that the core's magma is rising too quickly and threatens to wipe out the underground city. The threat of imminent destruction forces President Jav to devise a plan for moving the civilization away from Mars and onto another planet. He entrusts Dor, the city's only scientist, to build a spaceship that would allow him to explore outer space and find a nearby planet that can support Martian life. Dor gets more than he bargained for when his spaceship crashes onto a nearby planet called Earth. It is the year 2002 on Earth and Elon Musk is a rising young serial entrepreneur living in California. Little did Elon know that his genius mind and vast fortune would end up being taken over by Dor, who would become his doppelganger. Dor takes over Elon's identity on Earth, while the real Elon vanishes into thin air. Now, in this powerful and resourceful position, the new Elon Musk impersonator has plans to create a new spacecraft on Earth that will take him back to Mars and save his people from the doom that awaits them. However, the people closest to Elon start to develop suspicions about his true intentions, or whether he is even the real Elon Musk at all. Will the real Elon Musk stay on Earth and continue his vital space travel research, or will Dor succeed and use Elon's technology to save his people?

Glory be to Mars Thomas William Cronin, 2005 The beginning two novels in the series were about the early years of the first human settlement on Mars, but you don't have to read them to enjoy this latest stand-alone novel, in which a new desert fox is the pivotal character in a great war on Mars. In the first novel, *As It Is On Mars*, three courageous explorers, abandoned to die on Mars in 2038, found a fantastic but illegal settlement. In the second, stand-alone novel, *Give Us This Mars*, European and American rescue missions

in 2048 compete to take over the fledgling settlement, which turns out to have resources worth trillions of dollars. The story in this third novel, *Glory Be to Mars*, takes place over a quarter century later, in 2074. It has a whole new set of lead characters, and enough of the early history of the settlement is included for new readers to join the tale effortlessly. By now, the illegal settlement has grown enormously, and a whole new generation born on Mars has grown up, thanks mainly to an amazing machine the Martians have developed, unlike anything the world has ever seen. Getting rid of this well-defended settlement is now a serious military matter. But, as the story opens, a United Nations coalition armada approaching Mars is intent on doing just that; it is so overwhelming a military force that nobody on Earth thinks the settlement has a chance. Coalition governments on Earth have terrified their citizens into believing that the Martians' amazing machine is a horrible weapon of total annihilation, capable of eliminating all human life on Earth. The fabricated fear has had the desired effect, and decent people are supportive of the obscenely expensive armada to Mars. They will pay anything for an end to the dangerous, illegal settlement and its abominable machine. The armada is the brainchild of two cunning, scheming, aristocratic brothers, both born leaders, out for wealth, power, and prestige. They are also out to avenge their father's disgraceful death on Mars, and erase a demeaning stain of dishonor that has sullied their ancient family name. One brother, Harold Derk, is the CEO of Condor Copper Inc., the world's largest resource company, bent on taking a huge copper deposit from the Martians, worth over ten trillion dollars. Harold paid for the warmongering political leaders who engineered the armada. The other brother, four-star General Oliver Derk, is the armada commander. This rogue general has genocide in mind, and has the overwhelming military resources he needs to kill off all his Martian enemies. The armada's arrival triggers a great war on Mars, and this is the story of those who fought in that war, particularly a young man the war makes into a legend: the desert fox of Mars. The story opens with a small Martian work crew, far from home. They have just finished hiding the infamous Martian machine, to keep it out of the hands of approaching coalition forces. That evening, the Martian work crew makes a fluke discovery. Coalition forces have secretly arrived, unexpected early, obviously planning a surprise attack on the settlement. The workers now have to get home at once, to warn the settlement of the danger. They take an impossible short cut, up along the treacherous thirty-mile long Hell Ridge, which climbs up to a four-mile high plateau they must cross to get home. But then, in Chapter Two, disaster. Not long after, a deadly enemy of the coalition appears out of the southern waste, at the head of a dusty column of tanks, his predator drones flying overhead. It is Edward Russell, a young man with desert warfare in his genes. He is soon to be known as the desert fox of Mars, feared and revered on two planets. Two women are a major part of the story, both in love with Edward, and engaged in their own private war over which of them will have him. A religious American President is also involved. He is an enemy of the big resource companies, but is boxed in by the cunning Derk brothers, and left with no choice but to fight a war he has no heart for. There is a sly, psychotic hit man in the story too. He is an essential part of General Derk's genocidal plan to kill every single Martian, and his first contract will be to arrange for an American war correspondent to have an accident: Americans must not know what is being done on Mars in their name. These

characters, and many more, walk the pages of this powerful, fast-paced tale of war, malice, ambition, love, and treachery, in a story that takes the reader along on the tank columns of the desert fox, to witness his daring exploits in a war that transforms the western hemisphere of Mars into a gigantic military chessboard.

CVC Veri a Guide to the Epic of the Martian Empire Lee Streiff,2013-01-03 Introduction By Lee Streiff In 1937 James Streiff and Bob Parks created 'the Epic of the Martian Empire'; in 1942 Paul Carter added his vision of the Cosmic Vortex to it, and the Universe was never the same again... Lee Streiff Once we lived in the world of the Martian Empire, but that now seems like a long time ago - it all began in those last remaining years before World War II changed our consciousnesses forever. It was an ephemeral, still time; a quiet space in which we could dream about the future without the burden of its consequences: ghastly war - genocide - the atomic bomb. It was in 1937... and my brother James was 13, and in the eighth grade at Robinson Junior High School in Wichita, Kansas. And in James's mind he was fashioning a cosmic empire filled with strange and wonderful creatures and races - in which a stalwart group of Exiles from the planet Mars were the chief actors and heroes. This Empire, the Martian Empire, eventually spread over most of the known Universe before it finally faded away in 1948'. During the eleven years it flourished however, the Martian Epic became very elaborate - covering some 15 billion years of Martian history - and Martian technology, manners and morals, art, music, religion, language and literature. And it generated a narrative Epic that encompassed many galaxies. Although a number of people became involved in this epic - Bob Parks, John Roth, Robert Frickel, Charles Goodrum, and Robert Arnold, among others - it was first and foremost the vision of James, who worked out and brought together the maps, timelines, the celestial spaces, the customs, and the characters that made up the Martian Empire in all its diverse grandeur. In early 1937 I was only four years old - and so it was that most of my childhood and youth were somehow surrounded or suffused with the images and tales of the Epic. However it was not until I reached the age of eleven that I became the brief inheritor of, and

participant in the affairs of the Epic itself. It was during World War II in 1943. that I first took over the job of running the business of the Martian Empire while all of its members were away from Wichita, in the Army, Navy, and Air Force. Knowing that he would soon be drafted, James began grooming me for the task early in that year. He reported for active Military duty on June 3, 1943, and that changed the course of my daily life. I was now on my own, with a heavy responsibility, I published The Martian News Letter, the official journal of the group, using carbon paper - and a bit later a hectograph; published, The Order of Shultz, which circulated the business of the inner circle; reorganized The Files; answered correspondence among the far flung Martians scattered around the globe; and did research for a number of topics for James, using my contacts in the world of Science Fiction Fandom. When James returned from active service in February of 1946, my task had been completed, and in any case, my interests were largely turning in other directions. By 1947, in my sophomore year at East High School, I was even leaving Science Fiction itself behind and was now involved in art and literature. But then that is another story. In the Following seven Chapters, Lee Streiff describes in his Guide to the Epic of the Martian Empire of how the tales and creation of the Epic... all came about.

Triumph over Containment Robert P. Kolker, 2021-10-15 The long 1950s, which extend back to the early postwar period and forward into the early 1960s, were a period of "containment culture" in America, as the media worked to reinforce traditional family values and suspected communist sympathizers were blacklisted from the entertainment industry. Yet some brave filmmakers and actors still challenged the status quo to produce indelible and imaginative work that delivered uncomfortable truths to Cold War audiences. *Triumph Over Containment* offers an uncompromising look at some of the era's greatest films and directors, from household names like Alfred Hitchcock and Stanley Kubrick to lesser-known iconoclasts like Samuel Fuller and Ida Lupino. Taking in everything from *The Thing from Another World* (1951) to *Dr. Strangelove or: How I Learned to Stop Worrying and Love the Bomb* (1964), acclaimed film scholar Robert P. Kolker scours a variety of different genres to find pockets of resistance to the repressive and oppressive norms of Cold War culture. He devotes special attention to two quintessential 1950s genres—the melodrama and the science fiction film—that might seem like polar opposites, but each offered pointed responses to containment culture. This book takes a fresh look at such directors as Nicholas Ray, John Ford, and Orson Welles, while giving readers a new appreciation for the depth and artistry of 1950s Hollywood films.

With his best friend Dibs and crush Gracie by his side, and his Cracker Jack superhero membership card, a slingshot, and a small American flag--for peace--in tow, Mylo sets out on an epic adventure to investigate the crash and find the Martians. Martian Geomorphology Matthew R. Balme, 2011 The latest Mars missions are returning data of unprecedented fidelity in their representation of the martian surface. New data include images with spatial resolution better than 30 cm per pixel, stereo imaging-derived terrain models with one meter postings, high-resolution imaging spectroscopy, and RADAR data that reveal subsurface structure. This book reveals how this information is being used to understand the evolution of martian landscapes, and includes topics such as fluvial flooding, permafrost and periglacial landforms, debris flows, deposition and erosion of sedimentary material, and the origin of lineaments

on Phobos, the larger martian moon. Contemporary remote sensing data of Mars, on a par with those of Earth, reveal landscapes strikingly similar to regions of our own planet, so this book will be of interest to Earth scientists and planetary scientists alike. An overview chapter summarising Mars' climate, geology and exploration is included for the benefit of those new to Mars.

The Martian Race Gregory Benford, 2008-11-15 From the Nebula Award-winning author of *Timescape* and *Foundation's Fear* comes a hard-science thriller about the race to Mars that will tie into NASA's upcoming landing on the planet.

Goddess of Mars John Russell Fearn, 2015-06-30 Drew and Princess Thalia conclusively defeat the evil warlord Lexas, foiling his plan to transfer his brain into her body. In the grand tradition of Edgar Rice Burroughs, *Goddess of Mars* is the final volume of the Clayton Drew Quartet.

Martian Summer Andrew Kessler, 2014-07-15 A space enthusiast goes inside mission control with a motley crew of rocket scientists in this "fascinating journey of discovery peppered with humor" (Publishers Weekly). The Phoenix Mars mission was the first man-made probe ever sent to the Martian arctic. Its purpose was to find out how climate change could turn a warm, wet planet (read: Earth) into a cold, barren desert (read: Mars). Along the way, Phoenix discovered a giant frozen ocean trapped beneath the north pole of Mars, exotic food for aliens, and liquid water, and laid the foundation for NASA's current exploration of Mars using the Curiosity rover. This is not science fiction. It's fact. And for the luckiest fanboy in fandom, it was the best vacation ever. Andrew Kessler spent the summer of 2008 in NASA's mission control with one hundred thirty of the world's best planetary scientists and engineers as they carried out this ambitious operation. He came back with a story of human drama about modern-day pioneers battling NASA politics, temperamental robots, and the bizarre world of daily life in mission control.
