**Key MBA Models** Julian Birkinshaw, Ken Mark, 2015-04-17 Key MBA Models is a one-stop-shop for all business course students and practicing managers. It contains the core management models from each business discipline – from Strategy and Finance to Marketing and Accounting – and distils them into concise summaries of what they are and how to apply them. Written by London Business School Professor Julian Birkinshaw, it covers the essential models that all business students and managers need to know. Themed around the course modules on an MBA, the 60+ models fall into the following categories: Strategy Business Economics Finance Decision Science Accounting Operations Marketing Organisational Behaviour The term ‘model’ is used loosely – in some cases it might be a framework (The 4 Ps of Marketing, Porter’s Five Forces), in some cases it might be an important concept (open innovation or customer orientation), and in some cases it might be a technical model (the Capital Asset Pricing Model). Built on research with academics from the top international business schools, this book is an essential reference guide for every manager and MBA. **The 12-Week MBA** Bjorn Billhardt, Nathan Kracklauer, 2024-02-06 Based on award-winning leadership development programs experienced by over 100,000 professionals at Fortune Global 500 companies, The 12-Week MBA offers practical tips for aspiring business leaders while making an impassioned case for a new approach to management education. Getting an MBA takes time and money, making it inaccessible to many people who want to take charge in the business world. The 12-Week MBA offers an alternative way to learn business essentials by focusing on the skills and knowledge required to succeed as both a manager and a business leader. The 12-Week MBA’s unique premise is that business leaders in any industry, any function, and at any level need the same core knowledge, skills, and attitudes to effectively manage and lead. That core consists of working through and with other people to create value while using financial concepts and metrics to maximize the value created for all company stakeholders. The timeless essence of managing numbers and leading people can be learned in less time and at a lower cost than in a traditional two-year MBA, where much of the curriculum may become obsolete by the time students graduate. Authors Bjorn Billhardt and Nathan Kracklauer are senior executives at Abilitie, a global leadership development company that has served over 100,000 learners in fifty countries. Abilitie’s clients include some of the world’s most recognizable brands such as Coca-Cola, The New York Times, and Dell. Now the key lessons from Abilitie’s 12- Week MBA curriculum are available in this accessible and engaging guide.

**The 12-hour MBA Program** Milo Sobel, 1993-01-01

**Micro MBA** Carolina Machado, J. Paulo Davim, 2018-04-23 Micro MBA focuses on accounting, economics, marketing, human resources, operations, finance and gives the core curriculum of subjects usually present in an MBA program. This book presents the key concepts to all those pursuing a managerial career in the technological and engineering industry on principles, strategies, models, techniques, methodologies and applications in the business area for non-economists.

**A Social Contract with Business as the Basis for a Postmodern MBA in a World of Inclusive Globalisation** Jopie Coetzee, 2009 In A Social Contract with Business as the Basis for a Postmodern MBA in a World of Inclusive Globalisation, Jopie Coetzee places the MBA qualification on the centre stage of the 21st century's global challenges facing humanity. He makes three substantial and original contributions to the field of Business Leadership. Firstly, he introduces a new research methodology, termed critical metasynthesis. Secondly, he presents a new model, termed The Social Contract with Business as the *raison d'être* for postmodern business. Thirdly, he develops a new educational context, a new vocabulary, as well as guidelines for a new canon of knowledge for business education and curriculum design for the postmodern MBA.

**Teaching Business Sustainability** Chris Galea, 2017-11-28 In a world where corporate governance scandals have become the everyday, the role of business schools in producing the managers of today – and tomorrow – has come into sharp focus. Today's managers and the MBAs that will follow them are in need of an education that grounds business ethics and the overarching concerns of sustainable development into the curriculum. As some, but by no means all, organisations are coming to realise, bad performance in environmental protection, labour practices and human rights is no longer a soft issue but one that can hit the bottom line with a vengeance. So, what is the state of the art in teaching business sustainability worldwide, and what teaching practices and tools are achieving successful results? This book begins to answer these questions and more. There are many challenges facing educators in the field of sustainability. It is an evolving field still in its infancy as a management discipline; and there is also the need to combat the unstated but often underlying assumption that many environmental and social issues represent non-valued-added effort. Teaching Business Sustainability acknowledges this problem, while helping students explore the various ways in which the theoretical value of business sustainability can result in valuable and value-added practical outcomes. A wide mix of approaches is therefore indicated; while many of these are experimental and on the leading edge of management learning, they all share an experiential (and often a team-based) element, and attempt to bring together the theory in a way that makes it relevant to practitioners in the field. The implication is that, whenever possible, educators need to link the learning to the students' immediate and pressing real-world realities. This applies equally to undergraduates or high-level executives. However, in the absence of immediate examples of such realities (as may often be the case in undergraduate settings) educators need to introduce experientially based approaches that recreate such settings in the classroom. The book also argues the case for holistic and interdisciplinary learning. It is clear from much of the literature on sustainability that the concept does not easily lend itself to being pigeonholed and that it crosses many of the functional areas of business. Indeed, it goes beyond just business learning to encompass many fields such as ecology, engineering and biology. If students are to move beyond the narrow perspective that conventional business studies often entail, they need to be introduced to the wider vision that an interdisciplinary approach engenders. The final point that emerges from this collection is that experiential learning of business sustainability often can, and should be, fun! Be it a heated exchange in a case-study discussion, a role-play exercise or a hands-on student consulting project, much experiential learning seems to excite the imagination of the students and to release their creative juices. The 23 contributions to Teaching Business Sustainability have been divided into three thematic groups. In the first section, 'Theory, Critique and Ideas', the authors explore and critique some of the overarching ideas and thinking behind the teaching of sustainability. The next section, 'Learning from Current Practice', contains the experiences of a number of educators and the successful and leading-edge approaches that they have used. The final section then outlines tools, methods and approaches that can be used to teach business sustainability. This last section also serves as an introduction to a second volume – Teaching Business Sustainability Vol. 2 – which provides educators of sustainability with a series of case studies, role plays and experiential exercises. Teaching Business Sustainability is an invaluable resource both for educators working in a wide range of academic disciplines, looking for inspiration and guidance on how to teach business sustainability, as well as for organisations looking to reinvigorate internal management education programmes to factor in corporate responsibility and sustainability issues.

**Rethinking the MBA** Srikanth Datar, David A. Garvin, Patrick G. Cullen, 2010-04-22 Business Schools Face Test of Faith. Is It Time to Retrain B-Schools? As these headlines make clear, business education is at a major

crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of Rethinking the MBA, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors:

- Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education
- Provide case studies showing how leading MBA programs have begun reinventing themselves for the better
- Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies

Rich with examples and thoroughly researched, Rethinking the MBA reveals why and how business schools must define a better pathway for the future.

**The 12-Hour MBA Program (Summary)** Milo Sobel,2003 getAbstract Summary: Get the key points from this book in less than 10 minutes.In The 12-Hour MBA Program, Milo Sobel presents an overview of the major topics graduate students learn in pursuit of a master's degree in business administration. He offers chapters on marketing and product management, accounting and finance, human resources and operations management, statistics, economics, technology management, business policy and ethics, strategic planning, education and career planning. This good, solidly written introduction to the field will probably be of most interest to college students and other beginners, who will benefit from this broad overview of different spheres of knowledge. However, managers and executives will find this too basic, more like a field of iceberg tips. The text is clearly written and well-organized, though it is primarily a summary, with a few examples and only occasional charts and tables. getAbstract.com recognizes what this basic book is trying to accomplish, but warns that - having been written in 1993 - it's somewhat dated and lacks current thinking in such areas as marketing, management, leadership and strategy.Book Publisher:FT Prentice Hall

*Moral Foundations of Management Knowledge* Marie-Laure Djelic,Radu Vranceanu,2007-01-01 Exploring the ethical foundations of the different subfields of managerial thought, this book brings a thoroughly new light on the issue of sustainability and responsibility in management theory and practice.

The Future of the MBA Mihnea C. Moldoveanu,Roger L. Martin,2008-04-25 The Future of the MBA provides a sorely needed detailed and systematic review of the major contemporary debates on management education. At the same time, it makes a striking new proposal that will certainly have an impact in business schools: that managers need to develop a series of qualitative tacit skills, which could be appropriately developed by integrative curricula brought from different disciplines, including sociology, philosophy, and other social sciences.

**MBA** Carter A. Daniel,1998 In the early years, the main struggle was to achieve a legitimate place for MBA programs in the hostile universities, where the idea of teaching a practical and mercenary subject like commerce seemed to educators nothing short of appalling. Once the programs found acceptance, moreover, business education had to face yet another struggle: figuring out what to teach.

*Systems Science* Frank A. Stowell,Daune West,James G. Howell,2012-12-06 As we approach the end of the 20th century we can look back upon the achievements that have been made in a variety of human endeavours with pride. Enormous strides have been made to improve the quality of life of millions of people through the application of the scientific discoveries made during this and past centuries. The 20th century will be remembered as much for the mass exploitation of scientific discovery as for the discoveries themselves. The technological age has meant that the human being is able to contemplate activities which defy nature. For example, some of the work involved in the preparation of these proceedings has been done whilst travelling at over 500 miles per hour seven miles above the surface of the earth. It is not difficult to conjecture about the effect that this relatively recent technology has had upon a number of systems. Air transportation has provided a number of benefits including such disparate examples such as enabling holidays, famine relief and the cross fertilisation of cultural practices from other lands. Equally, there have been undesirable effects such as enabling the means of mass destruction, interference in other cultures and the speedy transportation of disease. Moreover, the physical presence of the aeroplane itself represents the consumption of fossil fuels, a source of pollution and a change in the way think about life. The view expressed here is of course the view of an inhabitant of the western world.
