Fantasy Sports and the Changing Sports Media Industry Nicholas David Bowman,John S. W. Spinda,Jimmy Sanderson,2016-03-17 This edited collection examines how fantasy sports play has established a prominent and promising foothold in the larger sports ecology. Often considered an isolated activity for the hardcore sports fan, fantasy sports play have since been incorporated into sports broadcasting and editorial coverage, sports marketing and promotions, and even into the very sports themselves with athletes and teams using the activities to draw fans further into the sports experience. This edited collection invites leading scholars and sports professionals from several different fields to share historical and emerging perspectives on the importance of fantasy sports as an artifact of theoretical and empirical importance to larger issues of sport and society. \

The Media Players Stephen Wittek,2015-07-16 The Media Players: Shakespeare, Middleton, Jonson, and the Idea of News builds a case for the central, formative function of Shakespeare's theater in the news culture of early modern England. In an analysis that combines historical research with recent developments in public sphere theory, Dr. Stephen Wittek argues that the unique discursive space created by commercial theater helped to foster the conceptual framework that made news possible. Dr. Wittek's analysis focuses on the years between 1590 and 1630, an era of extraordinary advances in English news culture that begins with the first instance of serialized news in England and ends with the emergence of news as a regular, permanent fixture of the marketplace. Notably, this period of expansion in news culture coincided with a correspondingly extraordinary era of theatrical production and innovation, an era that marks the beginning of commercial theater in London, and has left us with the plays of William Shakespeare, Ben Jonson, and Thomas Middleton.

Computational Intelligence for Multimedia Big Data on the Cloud with Engineering Applications Arun Kumar Sangaiah,Zhiyong Zhang,Michael Sheng,2018-08-21 Computational Intelligence for Multimedia Big Data on the Cloud with Engineering Applications covers timely topics, including the neural network (NN), particle swarm optimization (PSO), evolutionary algorithm (GA), fuzzy sets (FS) and rough sets (RS), etc. Furthermore, the book highlights recent research on representative techniques to elaborate how a data-centric system formed a powerful platform for the processing of cloud hosted multimedia big data and how it could be analyzed, processed and characterized by CI. The book also provides a view on how techniques in CI can offer solutions in modeling, relationship pattern recognition, clustering and other problems in bioengineering. It is written for domain experts and developers who want to understand and explore the application of computational intelligence aspects (opportunities and challenges) for design and development of a data-centric system in the context of multimedia cloud, big data era and its related applications, such as smarter healthcare, homeland security, traffic control trading analysis and telecom, etc. Researchers and PhD students exploring the significance of data centric systems in the next paradigm of computing will find this book extremely useful. Presents a brief overview of computational intelligence paradigms and its significant role in application domains Illustrates the state-of-the-art and recent developments

in the new theories and applications of CI approaches Familiarizes the reader with computational intelligence concepts and technologies that are successfully used in the implementation of cloud-centric multimedia services in massive data processing Provides new advances in the fields of CI for bio-engineering application

  EU Competition Law Ariel Ezrachi,2021-08-12 'This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States.' Ali Nikpay, Gibson, Dunn & Crutcher LLP This unique book is designed as a working tool for the study and practice of European competition law, focused on case law analysis. Each chapter begins with an introduction which outlines the relevant laws, regulations and guidelines for each of the topics, setting the analytical foundations for the case entries. Within this framework, cases are reviewed in summary form, accompanied by useful analysis and commentary. The 7th edition includes recent judgments from the European Court of Justice on the scope of object and effects based analysis (including Generics and Budapest Bank), as well as those on abuse of dominance. It examines developments in parallel trade, online sales restrictions, advertising bans, enforcement powers and procedure. Expanding its coverage of merger decisions, it explores non-collusive oligopoly (including CK Telecoms) and the treatment of innovation and data under the EU Merger Regulation. This unique book offers the practitioner and competition law student an insightful guide to EU competition law cases, an understanding of which is crucial. Rigorous, comprehensive and authoritative, it simply is a must read.

  Microsoft on Trial Luca Rubini,2010-01-01 Microsoft on Trial analyses the antitrust cases that have involved Microsoft in both sides of the Atlantic and offers a thorough and timely discussion on the regulation of unilateral behaviour in a topical sector. This fascinating and highly topical book facilitates discussion on the difficult technical, legal and economic issues with respect to innovation,competition and welfare raised, through the span of more than a decade, by the US and EC Microsoft antitrust cases. It assesses their impact on the evolution of EC and US laws on competition and intellectual property in the IT sector and beyond.

  The Microsoft Antitrust Cases Andrew I. Gavil,Harry First,2014-11-28 A comprehensive account of the decades-long, multiple antitrust actions against Microsoft and an assessment of the effectiveness of antitrust law in the digital age. For more than two decades, the U.S. Department of Justice, various states, the European Commission, and many private litigants pursued antitrust actions against the tech giant Microsoft. In investigating and prosecuting Microsoft, federal and state prosecutors were playing their traditional role of reining in a corporate power intent on eliminating competition. Seen from another perspective, however, the government's prosecution of Microsoft—in which it deployed the century-old Sherman Antitrust Act in the volatile and evolving global business environment of the digital era—was unprecedented. In this book, two experts on competition policy offer a comprehensive account of the multiple antitrust actions against Microsoft—from beginning to end—and an assessment of the effectiveness of antitrust law in the twenty-first century. Gavil and First describe in detail the cases

that the Department of Justice and the states initiated in 1998, accusing Microsoft of obstructing browser competition and perpetuating its Windows monopoly. They cover the private litigation that followed, and the European Commission cases decided in 2004 and 2009. They also consider broader issues of competition policy in the age of globalization, addressing the adequacy of today's antitrust laws, their enforcement by multiple parties around the world, and the difficulty of obtaining effective remedies—all lessons learned from the Microsoft cases.

International Entrepreneurship Robert D. Hisrich,2010 Combining robust narrative with a wide variety of interesting cases, International Entrepreneurship: Starting, Developing, and Managing a Global Venture focuses on the need for every entrepreneur to at least consider entering the global market in today□s hypercompetitive world. As an ever-growing number of countries become market oriented and developed, the distinction between foreign and domestic markets is becoming less pronounced, and entrepreneurs increasingly need to develop skills to identify opportunities and then manage these opportunities on a global basis. International Entrepreneurship is an ideal resource for students, professors, government officials, and practitioners throughout the world who are interested in this vital, growing area. Key Features Includes chapter-opening international scenarios that feature a global entrepreneur or a global entrepreneurial venture to set the scene for the issues that follow Demonstrates global entrepreneurial issues through real-life cases from countries throughout the world Draws content from a wide variety of disciplines, including anthropology, economics, geography, history, jurisprudence, and language Includes chapter-ending class exercises, discussion questions, and suggestions for additional reading to provide readers with hands-on learning opportunities and avenues for future research Helpful Teaching Ancillaries Instructor Resources are available on a password-protected website at http://www.sagepub.com/hisrichinstr. These resources include chapter outlines, end of chapter discussions, chapter exercises, and teaching notes. International Entrepreneurship is appropriate as a core text for courses such as Global Entrepreneurship or International Entrepreneurship or as a supplement in upper-level undergraduate and MBA courses in Entrepreneurship, New Venture Management, and Entrepreneurship Strategy. In addition, it can be used as an ancillary text in International Business and International Management courses.

Multimedia Networks Hans W. Barz,Gregory A. Bassett,2016-01-12 The transportation of multimedia over the network requires timely and errorless transmission much more strictly than other data. This had led to special protocols

and to special treatment in multimedia applications (telephony, IP-TV, streaming) to overcome network issues. This book begins with an overview of the vast market combined with the user's expectations. The base mechanisms of the audio/video coding (H.26x etc.) are explained to understand characteristics of the generated network traffic. Further chapters treat common specialized underlying IP network functions which cope with multimedia data in conjunction which special time adaption measures. Based on those standard functions these chapters can treat uniformly SIP, H.248, High-End IP-TV, Webcast, Signage etc. A special section is devoted to home networks which challenge high-end service delivery due to possibly unreliable management. The whole book treats concepts described in accessible IP-based standards and which are implemented broadly. The book is aimed at graduate students/practitioners with good basic knowledge in computer networking. It provides the reader with all concepts of currently used IP technologies of how to deliver multimedia efficiently to the end user.
