Text, Speech and Dialogue Petr Sojka, Ivan Kopecek, Karel Pala, 2003-08-02 The Text, Speech and Dialogue (TSD) Conference 2002, it should be noticed, is now being held for the 7th time and we are pleased to observe that in its short history it has turned out to be an international forum successfully intertwining the basic fields of NLP. It is our strong hope that the conference contributes to a better understanding between researchers from the various areas and promotes more intensive mutual cooperation. So far the communication between man and computers has displayed a one-way nature, humans have to know how the machines work and only then can they “understand” them. The opposite, however, is still quite far from being real, our understanding of how our “user-friendly” computers can understand us humans is not deep enough yet. A lot of work has to be done both in the near and distant future. Let TSD 2002 be a modest contribution to this goal. The conference also serves well in its second purpose: to facilitate researchers meeting in the NLP field from Western and Eastern Europe. Moreover, many participants now come from other parts of the world, thus making TSD a real crossroads for researchers in the NLP area. This volume contains the proceedings of this conference held in Brno, September 9–12, 2002. We were honored to have as keynote speakers James Pustejovsky from Brandeis University, and Ronald Cole from the University of Colorado. We would like to thank all the Program Committee members and external reviewers for their conscientious and diligent reviewing work.

From weather observations to atmospheric and climate sciences in Switzerland Saskia Willemse, Markus Furger, 2016-06-02 In 2016 the Swiss Society for Meteorology (Schweizerische Gesellschaft für Meteorologie, SGM) celebrates its 100th anniversary. Compared to other meteorological societies it is not among the oldest ones. Nevertheless, meteorology has gone through such a remarkable evolution in the past 100 years that it is worthwhile to take a look back and recapitulate the developments of both science and SGM – and to reveal their interaction. The idea of this book is to give an overview of what has happened in the field of atmospheric sciences in Switzerland since the first systematic long-term meteorological observations until today.

Walking in the Engadine - Switzerland Kev Reynolds, 2019-07-15 Walking in the Engadine contains detailed route descriptions for 100 day walk routes that vary from 4 to 16km long in length. The routes cover a variety of terrain from luscious meadows and craggy mountains to glaciers and snowpeaks. Most of the walks described in this

guidebook have been chosen with a particular viewpoint, lake, alp hamlet, hut or pass as the destination, while the principal objective of each walk is to enjoy a day's exercise among stimulating scenery. There's something for every walker's taste: gentle valley rambles for a family outing; craggy mid-mountain walks for the more adventurous; high-level routes that lead across glacier, snowfield and rugged passes for the experienced mountain trekker. Tucked away in the south-east corner of Switzerland, the Engadine is a region of lakes and mountains, home of the country's only national park, guardian of the Romansch language and location for some of the most sublime villages in all the Alps.

Encoding the Past, Decoding the Future Isabel Moskowich, 2011-12-08 In the first decade of the twenty first century, Corpus Linguistics as a methodology had already proved to be an impeccable one, and is probably the most elaborate way to approach empirical studies on languages. At present this seems to be essential to formulate general theories about most aspects of languages in different stages of their evolution. Corpora and Corpus Linguistics have been present in research for a reasonably long time now. The evolution of the discipline has been assessed by conferences, new publications and all sorts of events related to the field. Therefore, it seems most convenient to offer an outline of the advances made in the past decade as well as to try and make a guess as for what is yet to come. The editors have used their experience to collect a volume that certainly will have something to offer to the scientific community. Their work as compilers of the Coruña Corpus of English Scientific Writing

has made them familiar with corpus-compilation and the time-consuming tasks it entails. As users of this and other corpora, they can also appreciate the tools modern technology offers researchers and what the possibilities of exploitation are. In this way, the selection of papers contained in this volume address a wide range of scholars interested in the discipline, both corpus compilers and users.

Camminare in montagna Lorenza Russo, 2013-03-11T00:00:00+01:00 Camminare in montagna è una pratica antica quanto l'uomo: negli ultimi due secoli è diventata non più soltanto una necessità, ma una pratica naturale e un modo di svagarsi, oltre che una delle attività che più contribuiscono al benessere psico-fisico. La montagna però richiede qualche regola, un po' di allenamento e l'equipaggiamento adeguato. Questo manuale offre le linee-guida dell'escursionismo: dall'abbigliamento, all'attrezzatura, dalla lettura delle carte topografiche fino all'orientamento nelle diverse condizioni ambientali e climatiche. Il volume si propone inoltre di rendere più facile e attraente possibile una camminata in montagna con un occhio ai panorami e alle riflessioni che la natura ci suggerisce. Una serie di itinerari esemplificativi in tutto il territorio nazionale, dalle Dolomiti all'Asinara, rendono possibile sperimentare i consigli e le suggestioni offerte dall'autrice.

Esquisses du vertige Nicolas Henchoz, 2004 Virtuoses des cimes, les meilleurs freeriders de la planète se retrouvent une fois par année, afin de partager les émotions d'une paroi vertigineuse située au cœur des Alpes :

le Bec des Rosses. Armés de leurs skis ou de leur surf, ils survolent les barres rocheuses, s'élancent dans les couloirs verticaux, interprètent la virginité poudreuse de cette face nord. L'Xtreme de Verbier constitue ainsi la compétition de freeride la plus radicale du monde. Mais il reste avant tout une rencontre, une fête pour célébrer un étrange rapport avec la montagne entre esthétique et vertige, adrénaline et respect.
