**Metropolitan Governance** Vinita Yadav,2014 Metropolitan Governance is an indispensable book for understanding the governance of metropolitan cities. The book covers an insight into the governance in Ahmedabad and Hyderabad. The participatory metropolitan governance is also of interest to the students of sociology, social work and geography. The students of public administration would find it useful to study the decentralisation of powers from centre to state to local level government. For academicians engaged in service delivery in metropolitan areas, it brings in clarity regarding role of varied stakeholders in governance.

Hate Crime in India G. S. Bajpai, Garima Pal, Tusha Singh, Advait Tambe, 2023-06-26 This book investigates perceptions against the people of north-east India, and why such prejudicial attitude exists. It subsequently quantifies and develops measures to counter such stereotypes and affiliated violence. This research examines the north-east Indian population's and the general Indian population's understanding of hate crime against the north-eastern population in metropolitan cities of India, both in concept and in perpetration. Further, it evaluates the existing constitutional and statutory provisions in India to determine if the proposed legislation and provisions are sufficient with regards to hate crime against north-eastern people of India. Drawing on empirical research addressing racial hate crimes in Delhi, Mumbai, Bengaluru, Chennai, Hyderabad and Pune, this book's case studies provide a qualitative dive to the problem and offer experiential analysis in order to curate preventive measures. This book is ideal for scholars, researchers, teachers and students interested in hate crime, racial violence, minority struggles, victimology, and law.

*Urban and Regional Planning and Development* Rajiv R. Thakur, Ashok K. Dutt, Sudhir K. Thakur, George M. Pomeroy, 2020-02-10 This book discusses urban planning and regional development practices in the twentieth century, and ways in which they are currently being transformed. It addresses questions such as: What are the factors affecting planning dynamics at local, regional, national and global scales? With the push to adopt a market paradigm

in land development and infrastructure, the relationship between resource management, sustainable development and the role of governance has been transformed. Centralized planning is giving way to privatization, not only in the traditional regions but also in newly emerging regions of Asia, Africa and Latin America. Further, attempts are being made to bring planning related decision-making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations, whether as graduate students, researchers, practitioners or policymakers.

The City and the Railway in the World from the Nineteenth Century to the Present Ralf Roth, Paul Van Heesvelde, 2022-07-18 This volume explores the relationship between cities and railways over three centuries. Despite their nearly 200-year existence, *The City and the Railway in the World* shows that urban railways are still politically and historically important to the modern world. Since its inception, cities have played a significant role in the railway system; cities were among the main reasons for building such efficient but lavish and costly modes of transport for persons, goods, and information. They also influenced the technological appearance of railways as these have had to meet particular demands for transport in urban areas. In 25 essays, this volume demonstrates that the relationship between the city and the railway is one of the most publicly debated themes in the context of daily lives in growing urban settings, as well as in the second urbanisation of the global South with migration from rural to urban landscapes. The volume's broad geographical range includes discussions of railway networks, railway stations, and urban rails in countries such as India, Japan, England,

Belgium, Romania, Nigeria, the USA, and Mexico. *The City and the Railway in the World* will be a useful tool for scholars interested in the history of transport, travel, and urban change.

**Financing Transit-Oriented Development with Land Values**

Hiroaki Suzuki, Jin Murakami, Yu-Hung Hong, Beth

Tamayose, 2015-01-15 This book provides cities with strategies and methodologies for applying land value capture financing schemes for capital-intensive transit and transit-related investments, based on the successful experiences of Mass Transit Railway Corporation in Hong Kong SAR, China, and Japanese railway companies in Tokyo metropolitan areas.

**Metro Rail Projects in India** M. Ramachandran, 2011-10-21

Taking stock of the urban transport scenario in Indian cities, this is the first full-length study of the metro rail system in India. In recent times the metro rail has come up as a favoured alternative of mass transport in urban spaces faced with growing population, heightened vehicular traffic, and increased pollution. Using data, analysis, and first-hand information, this book tells the story of metro rail as proposed and undertaken across India from Kolkata in the east and Mumbai in the west to Delhi and Jaipur in the north and Chennai, Bangalore, Hyderabad, and Kochi in the south. Focusing on the complexities of project planning and contrasting the Indian experience with those of its global counterparts, this volume distils important lessons for future infrastructure projects. While the metro rail system has considerably improved inter-city connectivity, the metro story in India is an ongoing one. With a Foreword by E. Sreedharan setting the stage, this volume will appeal to anybody keen to know more about urban transport in India, as well as policymakers, management professionals, and students and researchers of economics and business studies.

*Poverty in Metropolitan Cities* Shah Manzoor Alam, Fatima Alikhan, 1987 Papers presented at the National Seminar on Problems of Low-income Groups in Metropolitan Cities of India, Osmania University, Hyderabad, in March 1983, and organized by the Planning Department, Government of Andhra Pradesh, Hyderabad Urban Development Authority, and the Centre for Area Studies, Osmania University.

**The Palgrave Handbook of Socio-ecological Resilience in the Face of Climate Change** Sunil Nautiyal, Anil Kumar Gupta, Mrinalini Goswami, Y. D. Imran Khan, 2023-09-01 This book shares experiences and knowledge on climate change impacts and adaptation, risk reduction strategies, communities' responses, and best practices from different landscapes of India. It provides insights into climate change risk reduction in trans-disciplinary frameworks. The findings and discussions put forward in the chapters, largely based on micro-level case studies, provide an in-depth understanding of interactions among ecology, society, and economy under different conditions of changing climate. It contains critical discussion on both existing and required actions as adjustments to climate change impacts by different actors at diverse scales and contexts. The recommendations will be beneficial in climate change adaptation planning for India and other developing countries, where a large portion of the population directly depends on climate-sensitive sectors. The content of the book is interdisciplinary and it will be beneficial for scholars and practitioners from natural science, social science, policy, and governance across the continents.

*Private Equity Financing in Infrastructure and Real Estate* Josephine Gemson, Thillai Rajan A., 2023-04-08 This book provides a comprehensive overview of Private Equity (PE) financing in the infrastructure and real estate sectors. In doing so, it analyzes the

impact of such investments in the two sectors, evaluates the types of financing strategies, and explores the value created by such investments. Infrastructure and Real Estate have emerged as a significant asset class for PE investors. In the last three decades, PE firms have invested significant amounts of capital in infrastructure and real estate – sectors which did not feature in their radar before 2000. Between 2000 and 2009, PE firms invested more than USD 200 billion in infrastructure. Real estate sector also witnessed investments of a similar scale as that of infrastructure. Fundraising for infrastructure and real estate was about USD 100 billion and USD 150 billion respectively in 2019, setting new records and reaching all-time highs. This book examines such PE investments – both at a global level and at an emerging economy level, to identify how PE firms have created an impact with their investments, to provide both ready capital and value-addition to sectors which seem to urgently need both. The book is divided into three sections – impact of PE investments, strategies used by PE firms, and value created by such investments. The findings of this research and the corresponding best practices are useful and applicable to students, academicians, researchers, financial institutions, policy makers and law makers, commercial banks and funding agencies, practitioners, the Government, and other parties who are directly or indirectly associated with the development of infrastructure and real estate; and could aid funding agencies, practitioners and policy makers who are directly responsible for creating and developing infrastructure and real estate for their economies.

**Entrepreneurial Ecosystems for Tech Start-ups in India** M H Bala Subrahmanya, 2021-01-18 Why do tech start-ups emerge rapidly in emerging economies like India? What kind of entrepreneurial

ecosystems have evolved for tech start-up promotion? What is their structure? What role do they play in the nurturing of tech start-ups to the advantage of regional economies? This book examines the trend of evolving entrepreneurial ecosystems for tech start-ups in India, ascertains its structure and examines its role in the nurturing of tech start-ups over its lifecycle, to bring out its implications for Indian economy. At the outset, it traces and conceptualizes what it terms an ideal ecosystem for tech start-ups in the Indian context, and explores the historical evolution of entrepreneurial ecosystems in two of the six leading start-up hubs in the country, namely, Bangalore and Hyderabad. It describes the characteristics and the structure of these ecosystems as they prevailed in the two start-up hubs, and analyses the role that they play in nurturing the development of tech start-ups. Finally, this book explores the ecosystem gaps that exist in the two cities, the factors causing these gaps, and makes policy recommendations to encourage the growth of a healthy and vibrant entrepreneurial ecosystem for the accelerated growth of tech start-ups in these two cities in particular, to promote employment, innovation and economic growth in the country at large. Policy makers, researchers, engineering and management students, technology and business mentors, angels, venture capitalists, and MNC executives will find the book informative, revealing and a source of valuable insights into a new, rapidly emerging entrepreneurial India.
