Subversion Lennart Maschmeyer, 2024-03-04 In *Subversion*, Lennart Maschmeyer provides a powerful new theory and analysis of an age-old concept. While a strategy of subversion offers great strategic promise in theory, it faces an underappreciated set of challenges that limit its strategic value in practice. Drawing from two major cases--the KGB's use of traditional subversion methods to crush the Prague Spring in 1968 and Russia's less successful use of cyberwarfare against Ukraine since 2014--Maschmeyer demonstrates both the benefits and weaknesses of the approach. While many believe that today's cyber-based subversion campaigns offer new strategic opportunities, they also come with their own challenges. Because of these disadvantages, cyber operations continue to fall short of expectations--most recently in the Russo-Ukrainian war. By showing that traditional subversion methods remain the more potent threat, *Subversion* forces us to reconsider our fears of the subversive potential of cyberwar.

OECD Regions and Cities at a Glance 2020

OECD,2020-11-30 Regions and Cities at a Glance 2020 provides a comprehensive assessment of how regions and cities across the OECD are progressing towards stronger, more sustainable and more resilient economies and societies. In the light of the health crisis caused by the COVID-19 pandemic, the report analyses outcomes and drivers of social, economic and environmental resilience.

Creolizing the Metropole H. Adlai Murdoch,2012 *Creolizing the Metropole* is a comparative study of postwar West Indian migration to the former colonial capitals of Paris and London. It studies the effects of this population shift on national and cultural identity and traces the postcolonial Caribbean experience through analyses of the concepts of identity and diaspora. Through close readings of selected literary works and film, H. Adlai Murdoch explores the ways in which these immigrants and their descendants represented their metropolitan identities. Though British immigrants were colonial subjects and, later, residents of British Commonwealth nations, and the French arrivals from the overseas departments

were citizens of France by law, both groups became subject to otherness and exclusion stemming from their ethnicities. Murdoch examines this phenomenon and the questions it raises about borders and boundaries, nationality and belonging.

Metropolitan Research Jens Martin Gurr,Rolf Parr,Dennis Hardt,2022-09-30 Metropolitan research requires multidisciplinary perspectives in order to do justice to the complexities of metropolitan regions. This volume provides a scholarly and accessible overview of key methods and approaches in metropolitan research from a uniquely broad range of disciplines including architectural history, art history, heritage conservation, literary and cultural studies, spatial planning and planning theory, geoinformatics, urban sociology, economic geography, operations research, technology studies, transport planning, aquatic ecosystems research and urban epidemiology. It is this scope of disciplinary - and increasingly also interdisciplinary - approaches that allows metropolitan research to address recent societal challenges of urban life, such as mobility, health, diversity or sustainability.

Agents of Subversion John P. Delury,2022-10-15 Agents of Subversion reconstructs the remarkable story of a botched mission

into Manchuria, showing how it fit into a wider CIA campaign against Communist China and highlighting the intensity—and futility—of clandestine operations to overthrow Mao. In the winter of 1952, at the height of the Korean War, the CIA flew a covert mission into China to pick up an agent. Trained on a remote Pacific island, the agent belonged to an obscure anti-communist group known as the Third Force based out of Hong Kong. The exfiltration would fail disastrously, and one of the Americans on the mission, a recent Yale graduate named John T. Downey, ended up a prisoner of Mao Zedong's government for the next twenty years. Unraveling the truth behind decades of Cold War intrigue, John Delury documents the damage that this hidden foreign policy did to American political life. The US government kept the public in the dark about decades of covert activity directed against China, while Downey languished in a Beijing prison and his mother lobbied desperately for his release. Mining little-known Chinese sources, Delury sheds new light on Mao's campaigns to eliminate counterrevolutionaries and how the chairman of the Chinese Communist Party used captive spies in diplomacy with the West. *Agents of Subversion* is an innovative work of transnational history, and it demonstrates both how the Chinese Communist regime used

the fear of special agents to tighten its grip on society and why intellectuals in Cold War America presciently worried that subversion abroad could lead to repression at home.

Distortion and Subversion Rodrigo Lopes de

Barros, 2022-10-15 An Open Access edition of this book will be available on the Liverpool University Press website and the OAPEN library. At the turn of the 21st century, the Brazilian punk and hardcore music scene joined forces with political militants to foster a new social movement that demanded the universal right to free public transportation. These groups collaborated in numerous venues and media: music shows, protests, festivals, conferences, radio stations, posters, albums, slogans, and digital and printed publications. Throughout this time, the single demand for free public transportation reconceptualized notions of urban space in Brazil and led masses of people across the country to protest. This book shows how the anti-capitalist, anti-bourgeoisie stance present in the discourse of a number of Brazilian bands that performed from the late 1990s to the beginning of the 21st century in the underground music scenes of Florianópolis and São Paulo encountered a reverberation in the rhetoric emanating from the Campaign for the Free Fare, subsequently known as the Free Fare

Movement (Movimento Passe Livre, or MPL). This allowed the engaged bands and the movement for free public transportation to contribute to each other's development. The book also includes reflections on the Bus Revolt that occurred in the northeastern city of Salvador, unveiling traces of the punk and anarcho-punk movements, and the Revolution Carnivals that occurred in the city of Belo Horizonte, an event that mixed lectures, vegetarianism, protests, soccer, and punk rock music.

Interconnectivity, Subversion, and Healing in World Christianity
Afe Adogame, Aminta Arrington, 2023-07-13 The rise of Christianity around the world has been the impetus for much religious and social change. The interconnectivity of religious centers has resulted in theological dialogue and innovation. The subversion of long-held categories of culture, gender, race, spirituality, theology, and politics has naturally occurred along with the transgressing of borders and boundaries. Yet at the same time, there has been occasion for healing through intercultural experiences of forgiveness, peacemaking, and reconciliation. Stimulated by the work and mentorship of Joel Carpenter, who has done much to

expand the study of world Christianity less through focusing on his own research and writing, and more through amplifying the voices of others, the international contributors to this volume from all six continents promote a deeper understanding of World Christianity through the exploration of such related themes. Whether discussing primal spirituality in northeast India, white supremacy in South Africa, evangelical women and civic engagement in Kenya, or Calvinism in Mexico, the contributors draw upon ethnographic case studies to more deeply understand interconnectivity, subversion, and healing in World Christianity. Their essays provoke a reorientation of Christian thought within the study of World Christianity, enriching the current discourse and promoting vistas for further interdisciplinary studies.

Urban Subversion and the Creative City Oli Mould, 2015-03-27

Check out the author's video to find out more about the book:

<https://vimeo.com/124247409> This book provides a comprehensive critique of the current Creative City paradigm, with a capital 'C', and argues for a creative city with a small 'c' via a theoretical exploration of urban subversion. The book argues that the Creative City (with a capital 'C') is a systemic requirement of neoliberal capitalist urban development and part of the wider policy framework of 'creativity' that includes the creative industries and the creative class, and also has inequalities and injustices in-built. The book argues that the Creative City does stimulate creativity, but through a reaction to it, not as part of it. Creative City policies speak of having mechanisms to stimulate individual, collective or civic creativity, yet through a theoretical exploration of urban subversion, the book argues that to be 'truly' creative is to be radically different from those creative practices that the Creative City caters for. Moreover, the book analyses the role that urban subversion and subcultures have in the contemporary city in challenging the dominant political economic hegemony of urban

creativity. Creative activities of people from cities all over the world are discussed and critically analysed to highlight how urban creativity has become co-opted for political and economic goals, but through a radical reconceptualisation of what creativity is that includes urban subversion, we can begin to realise a creative city (with a small 'c').
