Climate Change, Moral Panics and Civilization

Amanda Rohloff, 2018-07-17 In recent years, interest in climate change has rapidly increased in the social sciences and yet there is still relatively little published material in the field that seeks to understand the development of climate change as a perceived social problem. This book contributes to filling this gap by theoretically linking the study of the historical development of social perceptions about 'nature' and climate change with the figurational sociology of Norbert Elias and the study of moral panics. By focusing sociological theory on climate change, this book situates the issue within the broader context of the development of ecological civilizing processes and comes to conceive of contemporary campaigns surrounding climate change as instances of moral panics/civilizing offensives with both civilizing and decivilizing effects. In the process, the author not only proposes a new approach to moral panics research, but makes a fundamental contribution to the development of figuration sociology and the understanding of how climate change has developed as a social problem, with significant implications regarding how to improve the efficacy of climate change campaigns. This highly innovative study should be of interest to students and researchers working in the fields of sociology, environment and sustainability, media studies and political science.

Other People's Children Lisa D. Delpit, 2006 An updated edition of the award-winning analysis of the role of race in the classroom features a new author introduction and framing essays by Herbert Kohl and Charles Payne, in an account that shares ideas about how teachers can function as cultural transmitters in contemporary schools and communicate more effectively to overcome race-related academic challenges. Original.

Introducing Social Semiotics Theo Van Leeuwen, 2005 *Introducing Social Semiotics* uses a wide variety of texts including photographs, adverts, magazine pages and film stills to explain how meaning is created through complex semiotic interactions. Practical exercises and examples as wide ranging as furniture arrangements in public places, advertising jingles, photojournalism and the rhythm of a rapper's speech provide readers with the knowledge and skills they need to be able to analyse and also produce successful multimodal texts and designs. The book traces the development of semiotic resources through particular channels such as the history of the Press and advertising; and explores how and why these resources change over time, for reasons such as advancing technology. Featuring a full glossary of terms, exercises, discussion points and suggestions for further reading, *Introducing Social Semiotics* makes concrete the complexities of meaning making and is essential reading for anyone interested in how communication works.

The Politics of Climate Change and Uncertainty in India Lyla Mehta, Hans Nicolai Adam, Shilpi Srivastava, 2021-12-24 This book brings together diverse perspectives concerning uncertainty and climate change in India. Uncertainty is a key factor shaping climate and environmental policy at international, national and local levels. Climate change and events such as cyclones, floods, droughts and changing rainfall patterns create uncertainties that planners, resource managers and local populations are regularly confronted with. In this context, uncertainty has emerged as a wicked problem for scientists and policymakers, resulting in highly debated and disputed decision-making. The book focuses on India, one of the most climatically vulnerable countries in the world, where there are stark socio-economic inequalities in addition to diverse geographic and climatic

settings. Based on empirical research, it covers case studies from coastal Mumbai to dryland Kutch and the Sundarbans delta in West Bengal. These localities offer ecological contrasts, rural-urban diversity, varied exposure to different climate events, and diverse state and official responses. The book unpacks the diverse discourses, practices and politics of uncertainty and demonstrates profound differences through which the above, middle and below understand and experience climate change and uncertainty. It also makes a case for bringing together diverse knowledges and approaches to understand and embrace climate-related uncertainties in order to facilitate transformative change. Appealing to a broad professional and student audience, the book draws on wide-ranging theoretical and conceptual approaches from climate science, historical analysis, science, technology and society studies, development studies and environmental studies. By looking at the intersection between local and diverse understandings of climate change and uncertainty with politics, culture, history and ecology, the book argues for plural and socially just ways to tackle climate change in India and beyond. Multidisciplinary Design of Sharing Services Maurizio Bruglieri, 2018-04-17 This book explores all aspects of the sharing economy, pursuing a multidisciplinary approach encompassing Service Design, Spatial Design, Sociology, Economics, Law, and Transport and Operations Research. The book develops a unified vision of sharing services, and pinpoints the most important new challenges. The first, more theoretical part covers general topics from the perspectives of experts in the respective disciplines. Among the subjects addressed are the role of the user in co-design and co-production; impacts of sharing services on cities, communities, and private spaces; individual rewarding and social outcomes; regulatory issues; and the scope for improving the efficiency of design, management, and analysis of sharing services. In turn, the second part of the book presents a selection of case studies of specific sharing services, in which many of the concepts described in the first part are put into practice. Readers will gain a deeper understanding of the dynamics of sharing services and of the hidden

problems that may arise. Key factors responsible for the success (or failure) of sharing services are identified by analyzing some of the best (and worst) practices. Given its breadth of coverage, the book offers a valuable guide for researchers and for all stakeholders in the sharing economy, including startup founders and local administrators.

Rembrandt – Studies in his Varied Approaches to Italian Art Amy Golahny, 2020-07-20 *Rembrandt: Studies in his Varied Approaches to Italian Art* explores his engagement with imagery by Italian masters. His references fall into three categories: pragmatic adaptations, critical commentary, and conceptual rivalry. These are not mutually exclusive but provide a strategy for discussion. This study also discusses Dutch artists' attitudes toward traveling south, surveys contemporary literature praising and/or criticizing Rembrandt, and examines his art collection and how he used it. It includes an examination of the vocabulary used by Italians to describe Rembrandt's art, with a focus on the patron Don Antonio Ruffo, and closes by considering the reception of his works by Italian artists.

Food Rebellions Eric Holt-Gimenez, Raj Patel, 2012-11-06 Today there are over a billion hungry people on the planet, more than ever before in history. While the global food crisis dropped out of the news in 2008, it returned in 2011 (and is threatening us again in 2012) and remains a painful reality for the world's poor and underserved. Why, in a time of record harvests, are a record number of people going hungry? And why are a handful of corporations making record profits? In *Food Rebellions! Crisis and the Hunger for Justice*, authors Eric Holt-Giménez and Raj Patel with Annie Shattuck offer us the real story behind the global food crisis and document the

growing trend of grassroots solutions to hunger spreading around the world. *Food Rebellions!* contains up to date information about the current political and economic realities of our food systems. Anchored in political economy and an historical perspective, it is a valuable academic resource for understanding the root causes of hunger, growing inequality, the industrial agri-foods complex, and political unrest. Using a multidisciplinary approach, Holt-Giménez and Patel give a detailed historical analysis of the events that led to the global food crisis and document the grassroots initiatives of social movements working to forge food sovereignty around the world. These social movements and this inspiring book compel readers to confront the crucial question: Who is hungry, why, and what can we do about it?

What's Gaby Cooking Gaby Dalkin, 2018-04-17
What's Gaby Cooking: Everyday California Food is "a celebration of the way we eat here in Southern California, reflecting the region's diversity, the abundance of fresh, vibrant produce, and the fact that we're always tinkering with our diets" (Los Angeles Times). Here is the go-to guide for bringing the West Coast vibe to your kitchen, with 125 fresh, market-driven recipes from everyone's favorite California food blogger, Gaby Dalkin. In *What's Gaby Cooking: Everyday California Food*, Gaby shares her favorite simple and fresh recipes and offers a glimpse into what it's like to "go coastal." It's about always having something tasty to eat, thanks to handy and delicious pantry staples (avocado oil! quinoa! limes! dark chocolate!), as well as an arsenal of easy and healthy recipes, like: Chimichurri Cauliflower Rice Bowl with Grilled Fish Taco Skillet Bake Street Corn Pizza Black Rice and Roasted Mushroom

Bowl Chicken Larb Bowl with Coconut Rice
Caramelized Onion, Leek, and Red Pepper Crustless
Quiche Charred Octopus Tacos Gaby's Famous
Guacamole Pulled Pork Pizza with Cabbage Slaw
Pesto Lasagna Bolognese Bean, Cheese, and Chicken
Tortas And over 100 more! The book covers all the
staples—avocado toast, grain bowls, greens, carbs,
healthy mains, cocktails, and more. For Gaby,
California is not so much a place but a state of
mind, and this cookbook proves that no matter
where you live, you can still apply the same
philosophy. All it takes is finding the freshest
produce you can, stocking up on some versatile
pantry staples, and keeping flavors and techniques
simple. After that, the only thing left to do is
kick back, pour yourself a California Girl
Margarita, and listen for those ocean waves.

Global Media Discourse David Machin, Theo Van
Leeuwen, 2007-05-17 Featuring a wide range of
exercises, examples, and images, this textbook
provides a practical way of analyzing the
discourses of the global media industries.

Building on a comprehensive introduction to the history and theory of global media communication, specific case studies of lifestyle and entertainment media are explored with examples from films, global women's magazines, Vietnamese news reporting and computer war games. Finally, this book investigates how global media communication is produced, looking at the formats, languages and images used in creating media materials, both globally and in localized forms. At a time when the media is becoming increasingly global, often with the same films, news and television programmes shown all over the world; Global Media Discourse provides an accessible, lively introduction into how globalization is changing the language and communicative practices of the media. Integrating a range of approaches, including political economy, discourse analysis and ethnography, this book will be of particular interest to students of media and communication studies, applied linguistics, and (critical) discourse analysis.

European Drawings 2 George R. Goldner, Lee Hendrix, Kelly Pask, 1992-10-08 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

Underrepresentation and the Question of Diversity Rosemary Gillett-Karam, Suanne D. Roueche, John E. Roueche, 1991 Within the context of

the history of educational discrimination and related social movements in the United States, this book examines the underrepresentation of women and of racial and ethnic minorities in community college leadership. Chapter 1, Finding Equality in Egalitarian Educational Institutions, presents the premise of the book, that community colleges have not met their responsibilities to these underrepresented groups. In chapter 2, Confronting the Language of Diversity, the debates concerning equality and inequality, the meaning of justice, the critical role of culture, and American democracy and pluralism are explored. Chapter 3, Women: Expression and Experience in Academic Literature, looks at the historical and philosophical premises upon which the woman question rests, and reviews recent findings concerning the role of women in education and leadership. In chapter 4, Minorities: Expression and Experience in Academic Literature, the dilemmas and controversies surrounding racial and ethnic equality are scrutinized, drawing on the legal and educational histories of minority groups. Chapter 5, Affirmative Action: Then and Now, examines the issues and politics of social movements and their challenges to the status quo. In chapter 6, Inclusionary Practices: Highlighting Exemplary Programs, the achievements of several organizations, programs, and policies now existing throughout the United States are discussed. Chapter 7, What the Leaders Are Saying: The Voices of Diversity, presents the views of community college leaders from underrepresented groups. Finally, chapter 8, Getting There from Where You Are: Increasing Representation and Recognition, provides a timeline and strategies for transforming community colleges. (JMC)

Accounting for Sustainability Anthony

Hopwood, Jeffrey Unerman, 2010-09-23 If businesses

and other organizations are to meet the many and complex challenges of sustainable development, then they all, both public and private, need to embed sustainability considerations into their decision-making and reporting. However, the translation of this aspiration into effective action is often inhibited by the lack of systems and procedures that take sustainability into account. Accounting for Sustainability: Practical Insights will help organizations to address these issues. The book sets out a number of tools and approaches that have been developed and applied by leading organizations to: - embed sustainability into decision-making, extending beyond an organization's boundaries to take into account suppliers, customers and other stakeholders; - measure and link sustainability and financial performance; - integrate sustainability into 'mainstream' reporting, both to management and external stakeholders. In-depth cases studies from Aviva, BT, the Environment Agency, EDF Energy, HSBC, Novo Nordisk, Sainsbury's and West Sussex County Council show in detail how accounting for sustainability works in practice in a wide range of organizational contexts.
