Tools and Weapons Brad Smith,Carol Ann Browne,2019-09-10
The instant New York Times bestseller. From Microsoft's president
and one of the tech industry's broadest thinkers, a frank and
thoughtful reckoning with how to balance enormous promise and
existential risk as the digitization of everything accelerates. "A
colorful and insightful insiders' view of how technology is both
empowering and threatening us. From privacy to cyberattacks, this
timely book is a useful guide for how to navigate the digital future."
—Walter Isaacson Microsoft President Brad Smith operates by a
simple core belief: When your technology changes the world, you
bear a responsibility to help address the world you have helped
create. This might seem uncontroversial, but it flies in the face of a
tech sector long obsessed with rapid growth and sometimes on
disruption as an end in itself. While sweeping digital transformation
holds great promise, we have reached an inflection point. The
world has turned information technology into both a powerful tool
and a formidable weapon, and new approaches are needed to
manage an era defined by even more powerful inventions like
artificial intelligence. Companies that create technology must
accept greater responsibility for the future, and governments will

need to regulate technology by moving faster and catching up with the pace of innovation. In Tools and Weapons, Brad Smith and Carol Ann Browne bring us a captivating narrative from the cockpit of one of the world's largest and most powerful tech companies as it finds itself in the middle of some of the thorniest emerging issues of our time. These are challenges that come with no preexisting playbook, including privacy, cybercrime and cyberwar, social media, the moral conundrums of artificial intelligence, big tech's relationship to inequality, and the challenges for democracy, far and near. While in no way a self-glorifying Microsoft memoir, the book pulls back the curtain remarkably wide onto some of the company's most crucial recent decision points as it strives to protect the hopes technology offers against the very real threats it also presents. There are huge ramifications for communities and countries, and Brad Smith provides a thoughtful and urgent contribution to that effort.
