Data Mining Facebook, Twitter, LinkedIn, Google+, GitHub, and More Eugène Kasbergen,2014-11-08 Social media marketing is the process of gaining website traffic or attention through social media sites. Social media marketing programs usually center on efforts to create content that attracts attention and encourages readers to share it across their social networks. The resulting electronic word of mouth (eWoM) refers to any statement consumers share via the Internet (e.g., web sites, social networks, instant messages, news feeds) about an event, product, service, brand or company. When the underlying message spreads from user to user and presumably resonates because it appears to come from a trusted, third-party source, as opposed to the brand or company itself, this form of marketing results in earned media rather than paid media. Canary in the Coal Mine William Cooke,2023-05-09 One doctor's courageous fight to save a small town from a silent epidemic that threatened the

community's future--and exposed a national health crisis. When Dr. Will Cooke, an idealistic young physician just out of medical training, set up practice in the small rural community of Austin, Indiana, he had no idea that much of the town was being torn apart by poverty, addiction, and life-threatening illnesses. But he soon found himself at the crossroads of two unprecedented health-care disasters: a national opioid epidemic and the worst drug-fueled HIV outbreak ever seen in rural America. Confronted with Austin's hidden secrets, Dr. Cooke decided he had to do something about them. In taking up the fight for Austin's people, however, he would have to battle some unanticipated foes: prejudice, political resistance, an entrenched bureaucracy--and the dark despair that threatened to overwhelm his own soul. *Canary in the Coal Mine* is a gripping account of the transformation of a man and his adopted community, a compelling and ultimately hopeful read in the vein of *Hillbilly Elegy*, *Dreamland*, and *Educated*.

Mine! Michael A. Heller, James Salzman, 2021-03-02 "Mine" is one of the first words babies learn, and by the time we grow up, the idea of ownership seems natural, whether we are buying a cup of coffee or a house. But who controls the space behind your airplane seat: you, reclining, or the squished laptop user behind you? Why is plagiarism wrong, but it's okay to knock off a recipe or a dress design? And after a snowstorm, why does a chair in the street hold your parking space in Chicago, while in New York you lose both the space and the chair? In *Mine!*, Michael Heller and James Salzman, two of the world's leading authorities on ownership, explain these puzzles and many more. Remarkably, they reveal, there are just six simple rules that everyone uses to claim everything. Owners choose the rule that steers us to do what they want. But we can pick differently. This is true not just for airplane seats, but also for battles over digital privacy, climate change, and wealth inequality. *Mine!* draws on mind-bending, often infuriating, and always fascinating accounts from business, history, courtrooms, and everyday life to reveal how the rules of ownership control our lives and shape our world.

Canaries in the Data Mine Gregory T. Donovan, 2020-10-21 *Canaries in the Data Mine* offers an account of the lived experiences and cultural expectations of

young people growing up in digital environments increasingly owned by others and designed for profit. At the book's core is a participatory research project that first interviewed New York City teens about their digital habits and then engaged a group of five young people in designing the prototypical platform of their time: a social network. In this engaging book, Gregory T. Donovan penetrates beyond the interface to consider the digital geography of contemporary youth, arguing that understanding what young people are grappling with portends what is, or will soon be, felt by society at large. Drawing from in-depth interviews and design workshops, he shows how informational capitalism is reproduced at an intimate scale as well as how involving young people in digital design can foster capacities for reworking and resisting the conditions of a rising rentier society.

Post, Mine, Repeat Helen Kennedy, 2016-05-14 In this book, Helen Kennedy argues that as social media data mining becomes more and more ordinary, as we post, mine and repeat, new data relations emerge. These new data relations are characterised by a widespread desire for numbers and the troubling consequences of this desire, and also by the possibility of doing good with data and resisting data power, by new and old concerns, and by instability and contradiction. Drawing on action research with public sector organisations, interviews with commercial social insights companies and their clients, focus groups with social media users and other research, Kennedy provides a fascinating and detailed account of living with social media data mining inside the organisations that make up the fabric of everyday life.

Reality Mining Nathan Eagle, Kate Greene, 2014-08 In this book, the authors explore the positive potential of big data, showing the ways in which the analysis of big data (reality mining) can be used to improve human systems as varied as political polling and disease tracking, while considering user privacy. They describe reality mining at five different levels: the individual, the neighborhood and organization, the city, the nation, and the world. For each level, they offer a nontechnical explanation of data collection methods and describe applications and systems that have been or could be built. These include a mobile app that helps smokers quit smoking; a workplace knowledge system; the use of GPS, Wi-Fi, and mobile phone data to manage and predict traffic flows; and the analysis of social media to track the spread of disease. The authors argue that big data, used respectfully and responsibly, can help people live better, healthier, and happier lives. --

When Kathryn Walsh arrives in tiny Calvada, a mining town nestled in the Sierra Nevadas, falling in love is the farthest thing from her mind. Banished from Boston by her wealthy stepfather, she has come to claim an inheritance from the uncle she never knew: a defunct newspaper office on a main street overflowing with brothels and saloons, and a seemingly worthless mine. Moved by the oppression of the local miners and their families, Kathryn decides to relaunch her uncle's newspaper--and then finds herself in the middle of a maelstrom, pitted against Calvada's most powerful men. But Kathryn intends to continue to say--and publish--whatever she pleases, especially when she knows she's right. Matthias Beck, owner of a local saloon and hotel, has a special interest in the new lady in town. He instantly recognizes C. T. Walsh's same tenacity in the beautiful and outspoken redhead--and knows all too well how dangerous that family trait can be. While Kathryn may be right about Calvada's problems, her righteousness could also get her killed. But when the handsome hotelier keeps finding himself on the same side of the issues as the opinionated Miss Walsh, Matthias's restless search for purpose becomes all about answering the call of his heart. Everyone may be looking to strike it rich in this lawless boomtown, but it's a love more precious than gold that will ultimately save them all.
