Development-Oriented Corporate Social Responsibility: Volume 2 Dima Jamali, Charlotte Karam, Michael Blowfield, 2017-09-08 This volume provides a platform for localized perspectives on CSR in developing countries across the globe. The chapters bring local context and business to the forefront and highlight the efforts spearheaded by indigenous actors from within the developing world. They present insights from developing countries through successful and less successful examples of locally-led CSR efforts. Together, these perspectives capture the complex paradoxes of CSR in developing countries and highlight common features in national institutions across the developing world, such as weak political and regulatory institutions, that shape local CSR initiatives and often limit its developmental impact. The editors argue the need to embrace partnership models that leverage the strengths of different actors to promote effective development and tackle the complex challenges facing the developing world. This important series will be the reference source for academics, practitioners, policy-makers and NGOs involved in development-oriented CSR.

CSR 2.0 Wayne Visser, 2013-10-15 The book examines the evolution and current state of corporate social responsibility (CSR), using a five-stage maturity model: defensive,

charitable, promotional, strategic and transformative CSR. The first four stages are dubbed CSR 1.0 and characterise most current CSR practice, while the fifth stage is named CSR 2.0 (also transformative or systemic CSR) and describes emergent and future CSR practices. Reasons are given why CSR 1.0 approaches have failed to have any significant impact on the most serious global social, environmental and ethical challenges. The emergent CSR 2.0 will then be explored in detail by elaborating on five principles underlying the new approach, including: creativity, scalability, responsiveness, glocality and circularity. A four-part DNA Model is also introduced, covering value creation, good governance, societal contribution and ecological integrity, which provides the basis for defining and measuring CSR 2.0. Finally, a 70-question CSR 2.0 self-assessment diagnostic tool developed by the author is presented, with sample data to show how the tool can be used for future research and practitioner application.

Mapping Corporate Education Reform Wayne Au, Joseph J. Ferrare, 2015-04-10 Mapping Corporate Education Reform outlines and analyzes the complex relationships between policy actors that define education reform within the current, neoliberal context. Using social network analysis and powerful data visualization tools, the authors identify the problematic roots of these relationships and describe their effects both in the U.S. and abroad. Through a series of case studies, each chapter reveals how powerful actors, from billionaire philanthropists to multinational education corporations, leverage their resources to implement free market mechanisms within public education. By comprehensively connecting the dots of neoliberal education reforms, the authors reveal not only the details of the reforms themselves, but the relationships that enable actors to amass troubling degrees of political power through network governance. A critical analysis of the actors and interests behind education policies, Mapping Corporate Education Reform uncovers the frequently obscured operations of educational governance and offers key insights into education reform at the present moment.

Mobile Technology and Social Transformations Stefanie Felsberger, Ramesh Subramanian, 2021 This book investigates the ways in which the mobile telephone has transformed societies around the world, bringing both opportunities and challenges. At a time when knowledge and truth are increasingly contested, the book asks how mobile technology has changed the ways in which people create, disseminate, and access knowledge. Worldwide, mobile internet access has surpassed desktop access, and it is estimated that by 2022 there will be an excess of 6 billion mobile phone users in the world. This widespread proliferation raises all sorts of questions around who creates knowledge, how is that knowledge shared and proliferated, and what are the structural political, economic, and legal conditions in which knowledge is accessed. The practices and power dynamics around mobile technologies are location specific. They look different depending on whether one chooses to highlight the legal, social, political, or economic context. Bringing together scholars, journalists, activists and practitioners from around the world, this book embraces this complexity, providing a multifaceted picture that acknowledges the tensions and contradictions surrounding accessing knowledge through mobile technologies. With case studies from Hong Kong, South Korea, India, Syria, Egypt, Botswana, Brazil, and the US, this book provides an important account of the changing nature of our access to knowledge, and is key reading for students, researchers, activists and policy makers with an interest in technology and access to knowledge, communication, social transformation,

and global development--
