Television and the Second Screen James Blake,2016-11-10 Television is changing almost beyond recognition. In the battle for consumers, social media sites, smart phones and tablets have become rivals to traditional linear TV. However, audiences and producers are also embracing mobile platforms to enhance TV viewing itself. This book examines the emerging phenomenon of the second screen: where users are increasingly engaging with content on two screens concurrently. The practice is transforming television into an interactive, participatory and social experience. James Blake examines interactive television from three crucial angles: audience motivation and agency, advances in TV production and the monetisation of second screen content. He also tracks its evolution by bringing together interviews with more than 25 television industry professionals - across the major UK channels - including commissioning editors, digital directors, producers and advertising executives. These reveal the successes and failures of recent experiments and the innovations in second screen projects. As the second screen becomes second nature for viewers and producers, the risks and opportunities for the future of television are slowly beginning to emerge. Television and the Second Screen will offer students and scholars of television theory, industry professionals and anyone with an abiding interest in television and technology, an accessible and illuminating guide to this important cultural shift.

Infancy Lisa M. Oakes,Vanessa Lobue,Marianella Casasola,2023-09-08 Lisa M. Oakes, Vanessa Lobue, and Marianella Casasola’s Infancy: The Development of the Whole Child unites historically important and cutting-edge theories and research to illustrate the development of the whole child from birth to age three. Topically organized and written in a conversational tone, the text illustrates the interconnected nature of development through links within its bio-psycho-social coverage. Through its inclusive approach, students see individual similarities and differences in development as a function of factors such as culture, language experience, parenting style, and socioeconomic status. Stories from the authors’ own experiences with infants highlight connections between research and parenting, social policy, and everyday contexts, effectively bringing the topics to life for students. The Experience of Neoliberal Education Bonnie Urciuoli,2018-05-22 The college experience is increasingly positioned to demonstrate its value as a worthwhile return on investment. Specific, definable activities, such as research experience, first-year experience, and experiential learning, are marketed as delivering precise skill sets in the form of an individual educational package. Through ethnography-based analysis, the contributors to this volume explore how these commodified experiences have turned students into consumers and given them the illusion that they are in control of their investment. They further reveal how the pressure to plan every move with a constant eye on a demonstrable return has supplanted traditional approaches to classroom education and profoundly altered the student experience.
