How to Actually Day Trade for a Living Tim Morris, 1901

————— Here's a Secret Other Authors Won't Tell You... ————— Day Trading is Hard and Most Day Trading Educators Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom memberships, video courses, and monthly subscriptions they sell to you! Before we get started, let me first go over what I don't include in this book... • I have no day trading chatroom which charges your credit card each month for a service you'll never use. • I have no monthly website subscription service for more advanced strategies that are needed to get started, but not

included in the book. • I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book:

————▼———— • Chapter 1: The Industry - In the first part of the book, I peel back the curtain and go over the actual day trading industry with you. I show you how so called pro traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. • Chapter 2: Terminology - Here we go over all the terms you'll need to know as we progress to through the book. Volume, chart types, indicators, order types... it's all covered! • Chapters 3 + 4: Pre-Trading Basics - In these chapters, I go over the basics of day trading. This includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. I then show you how to set up your trading screen, what time frame to use, and the most beneficial types of stocks to trade. • Chapter 5: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. • Chapter 6: Additional Advice - In the last part of the book, I give you my final bits of advice. This includes how to increase the probability of your trades, using a practice account, and more bits of wisdom I have learned over the years. ———▲———— I must admit to you, day trading is not easy and there is no guarantee of actually making it. However I feel this book gives you the best chance of actually getting started, as well providing a big picture of the day trading industry. If you've been on the fence about day trading, now is

your chance to finally learn what it's all about! As a complimentary bonus, only for book buyers, you'll receive my special report titled Crush the Market! This report goes over 14 beneficial tips I have learned throughout my trading career that will help keep your account profitable in the stock market. Stock Trading Intro Books, 2018-02-22 Risk control techniques, and self control practices are two essentials that are vital for a successful stock trader. Once the trader gets aware of the formula to assess risks, then success is not far at all. To calculate the money management angles, the trader has to spend on third of the time in doing effective searches, studies and researching. Stocks may look highly attractive but the risks parameters may not suit the specific trader. The vice versa can also be true in some other cases. Analysis and resultant clarity are vital at that point of time to take right decisions.

How to create your own Simple Stock Trading Strategy Josef LeFric, Investing and trading is a business, the business of making money with money and should be treated as such. In any business you have to work, whether you are the owner or you work for someone. You have to put in the time if you want to drive your own money train to the bank every day and the best part of it is that you don't need any fancy "junkware" or a hugely expensive charting package to tell you how to enter a trade, in fact, you only really need a basic charting platform which you most likely can get from your broker for free. The road to success in investing and trading is paved with the smoking blown up accounts of investors and traders; it did not have to be a long hard and expensive road though, it can be a road paved with gold and be fairly easy if you just take time to learn this business the right way from the start on your first day, trust me, the simpler you keep your stock trading the more money you will make. Use this book as an overview or a guide if you will, for what to study and learn first to become consistently profitable from day trading. I give you concise information as to what to learn first and what to look for as far as further information is concerned. I tell you only the most critical things to learn first because those are absolutely the most important and the ones that will make you money right away if

you do them. This book is written to provide straightforward, easy to understand and easy to apply advice, tips and techniques that can be the backbone of any stock trader's success in the financial markets.

Stock Trading & Investing Made Easy for Beginners Dr.

Aderemi Banjoko, 2011-04-11 Most people I meet tend to either think the Stock Market is complex and difficult or that it is easy to make money on the Stock Market. I fell into the category of thinking the Stock Market was easy but I soon found out that there are rules to trading and if applied correctly, could lead to profitable trading and investing. I have since taught people how to trade and invest wisely and dispel the many myths surrounding the Stock Market. This book on Stock Trading & Investing for Beginners has been published to give the reader an essential foundation as they venture into the exciting world of Trading & Investing.

Online Trading and Stock Investing for Beginners

Instafo, Michael Wells, 2019-09-05 The Beginner's Guide to "Online Trading and Stock Investing" Welcome Newbie - who wants to start trading and getting rich in the stock market... What if you were told that you're losing the money you own right now...simply by NOT investing it? Naturally, you would probably think "Argh, another scammer trying to con me into putting money in some false money-making opportunity to never be seen again" - or something along those lines, right? No, that's not the case here! The hard-to-swallow fact? Whatever money you have lying around somewhere and even saved in the bank is gradually losing its value due to "inflation" outpacing everything - resulting in the decreased buying power of the currency. To top it off, the middle class is diminishing and people are taking up extra jobs and working longer hours to make ends meet. Saving money and living below your means are no longer viable options to get by - leading to a wider wealth gap than ever with the poor getting poorer and the rich getting richer. For the latter group, however, there is a reason for that, because the rich have a different mindset on how

to generate wealth by having their money work for them through smart investing. Investing should no longer be an outlier for the rich only or those who can afford it, but a necessity for any normal person. But why aren't more people investing? The biggest hurdles are the unknown fear and the information overload discouraging people. Plus, they would have to go to an investment firm and find the right broker then pay all those fees that people hate, because let's face it - when you have no clue what you're doing and have to take money out of your pocket into another service without knowing if it's worth the risk, you avoid bothering with it altogether. Well, long gone are those days. Now with modern technology, more options, and better services, "do-it-yourself trading and investing" has never been easier and convenient, even if you have never filed taxes before and among other stuff they don't teach you in school. "Online Trading and Stock Investing for Beginners" will guide you through: - The confusing common terminologies simplified and types of investments available - The best stock trading platforms and brokerages with the crucial criteria to look for - The secret to generating huge wealth in investing through the power of compounding - The stock most people don't know about that has never failed for the past 100 years - The action steps to put everything into making your first investment today right away ...on top of everything else that beginners need to know. Still hesitant about investing? The truth is you don't really need to know everything about investing in order to get started; you just need to start! The best part is that this will take you from being a newbie who doesn't know anything to purchasing your first stock afterward. It's less academic and technical than most resources out there but rather more practical hands-on aimed at getting you started immediately. That's exactly how easy and fast our approach is designed. Begin your investment venture today!
