Free Public Transit Prince Jason Prince,2019-10-15 Just like we don't pay to use elevators, this book argues that we shouldn't pay to ride public transit. In an age of increasing inequalities and ecological crisis, movements advocating free public transit push us to rethink the status quo and consider urban transit as a fundamental human right. Editors Jason Prince and Judith Dellheim have collected a panorama of case studies from around the world: the United States, Canada, Estonia, Greece, France, Italy, Sweden, Poland, China, Australia, Brazil, Mexico, and more. These movements are spread across the world, and they aim to achieve two main outcomes-ecological good and fair wealth distribution. Free public transit-coupled with increased capacity and improving service of public transit-might well be the only viable strategy to eliminating car usage and achieving greenhouse gas targets in industrialized cities within a reasonable timeframe. Movements for free mass transit also aim to see public transit treated as a public good, like water and garbage service, that should be paid for out of general tax revenues or a fairer regional tax strategy. This book covers the rapidly changing transport options in cities today, including bike and car share options, Uber and Lyft, and the imminent arrival of driver-less vehicles. The first English-language book ever written on the subject, Free Public Transit is a ground breaking book for those concerned about the future of our cities and an essential resource for those who make, or try to change, urban planning and transport policies.

Governing the Island of Montreal Andrew Sancton,2023-04-28 Located at the junction of the St. Lawrence and Ottawa rivers, Montreal Island is the main contact point between French and English Canadians. Prior to Quebec's Quiet Revolution of the 1960s, local governments in Montreal both reflected and perpetuated the mutual isolation of French and English. Residential concentration in autonomous suburbs, together with self-contained networks of schools and social services, enabled English-speaking Montrealers to control the city's economy and to conduct their community's affairs with little regard for the French-speaking majority. The modernization of the Quebec state in the 1960s dramatically challenged this arrangement. The author demonstrates how the English-speaking politicians in cooperation with certain French-speaking allies have succeeded in preventing the wholesale adoption of ambitious schemes for metropolitan reorganization. He describes the workings of a society divided by language and ethnicity, where the pervasiveness of the politics of language impedes all plans for comprehensive metropolitan reform. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1985.

The Way to Go Partners for Livable Places,1983 This publication examines a variety of cases that demonstrate the aesthetic quality of

transportation projects. These range from the relatively inexpensive painted Gus Bus in Grand Rapids to the large-scale project of designing the Montreal Metro. The purpose is to develop a fresh perspective on ways the visual appeal of transportation can be identified as a distinct element for consideration, and on the degree to which quality design contributes to the economics and function of transportation systems. A second purpose is to develop guidance and examples to assist transportation planners and citizens in dealing with these issues. The projects presented represent a wide range of costs and circumstances encountered in transportation planning. The study shows that the aesthetic benefits provided by quality materials, sensitive design, careful maintenance, and appropriate inclusion of works of art translate directly into increased patronage, cost efficiencies, and a better public environment.

Computer-Aided Transit Scheduling Joachim R. Daduna, Anthony Wren, 2012-12-06 This volume consists of papers presented at the Fourth International Workshop on Computer-Aided Scheduling of Public Transport, which was held in Hamburg from 28th to 31st July 1987. The first of this series of Workshops was held in Chicago in 1975. Papers presented then tended to look forward to what might be done in the future application of computers to problems in transit scheduling. No presentations described systems which had been implemented and were being used on a regular basis, although a few papers discussed apparently successful once-off applications in both bus scheduling and bus crew scheduling (or run-cutting). However, within a few months of the end of that first workshop some systems had been implemented, both in Europe and in North America. By the time of the second Workshop, in Leeds in 1980, several systems were in regular use. Most of the crew scheduling implementations were based on heuristic methods (e.g., RUCUS), although mathematically based methods were being used in Quebec City and in Hamburg, and several papers described further mathematical methods in the course of development. A wide variety of bus scheduling approaches was reported, many of them being in regular use.

The Rapid Transit Railways of the World Henry F. Howson,2021-05-11 When originally published in 1975, (here re-issuing the 3rd edition of 1985), this was the only genuinely introductory textbook to the subject of transportation planning. The introductory chapter places the issue of transport in its broader societal context, relating it to demographic, socio-economic, political and environmental considerations. The increasing importance of technology is recognized in the chapter which covers commonly used software packages. As a whole the book provides a basic introduction to the traffic estimation stage of the transport planning process and forms a general guide and survey to the whole subject.

Citizen-Centered Cities, Volume II Paul R. Messinger,2017-03-22 Modern cities are increasingly involving citizens in decisions that affect them. This trend is a part of a movement toward a new standard of city management and planning—falling under the names public involvement, public engagement, collaborative governance, civic renewal, participatory democracy, and citizen-centered change. City administrators have long focused on attaining excellence in their technical domains; they are now expected to achieve an equal standard of excellence in public involvement. Toward this end, *Citizen-Centered Cities* provides a body of experience about public involvement that would take years for municipal administrators to accumulate on the job. The twelve city studies in the present volume were written to provide city administrators with a comparative perspective about how U.S. and Canadian cities carry out their public involvement activities. The opening chapter summarizes general themes and salient differences in approaches to public involvement across twelve cities. The close government-academic cooperation required to carry out this project builds on an innovative partnership between the City of Edmonton and the University of Alberta called the Center for Public Involvement.
