Affect Regulation and the Origin of the Self Allan N. Schore,2015-11-19 For over three decades, Allan N. Schore has authored numerous volumes, chapters, and articles on regulation theory, a biopsychosocial model of the development, psychopathogenesis, and treatment of the implicit subjective self. The theory is grounded in the integration of psychology, psychiatry, and neuroscience, and it is now being used by both clinicians to update psychotherapeutic models and by researchers to generate research. First published in 1994, this pioneering volume represented the inaugural expression of his interdisciplinary model, and has since been hailed by a number of scientific and clinical disciplines as a groundbreaking and paradigm-shifting work. This volume appeared at a time when the problem of emotion, ignored for most of the last century, was finally beginning to be addressed by science, including the emergent field of affective neuroscience. After a century of the dominance of the verbal left brain, it presented a detailed characterization of the early developing right brain and its unique social, emotional, and survival functions, not only in infancy but across all later stages of the human life span. It also offered a scientifically testable and clinically relevant model of the development of the human unconscious mind. *Affect Regulation and the Origin of the Self* acts as a keystone and foundation for all of Schore's later writings, as every subsequent book, article, and chapter that followed represented expansions of this seminal work.

Life Breaks In Mary Cappello, Rosamond Purcell, 2016-10-21 Some books start at point A, take you by the hand, and carefully walk you to point B, and on and on. This is not one of those books. This

book is about mood, and how it works in and with us as complicated, imperfectly self-knowing beings existing in a world that impinges and infringes on us, but also regularly suffuses us with beauty and joy and wonder. You don't write that book as a linear progression—you write it as a living, breathing, richly associative, and, crucially, active, investigation. Or at least you do if you're as smart and inventive as Mary Cappello. What is a mood? How do we think about and understand and describe moods and their endless shadings? What do they do to and for us, and how can we actively generate or alter them? These are all questions Cappello takes up as she explores mood in all its manifestations: we travel with her from the childhood tables of “arts and crafts” to mood rooms and reading rooms, forgotten natural history museums and 3-D View-Master fairytale tableaux; from the shifting palette of clouds and weather to the music that defines us and the voices that carry us. The result is a book as brilliantly unclassifiable as mood itself, blue and green and bright and beautiful, funny and sympathetic, as powerfully investigative as it is richly contemplative. “I’m one of those people who mistrusts a really good mood,” Cappello writes early on. If that made you nod in recognition, well, maybe you’re one of Mary Cappello’s people; you owe it to yourself to crack *Life Breaks In* and see for sure.

Modernism à la Mode Elizabeth M. Sheehan, 2018-10-15 *Modernism à la Mode* argues that fashion describes why and how literary modernism matters in its own historical moment and ours. Bringing together texts, textiles, and theories of dress, Elizabeth Sheehan shows that writers, including Virginia Woolf, D.H. Lawrence, W.E.B. Du Bois, Nella Larsen, and F. Scott Fitzgerald, turned to fashion to understand what their own stylized works could do in the context of global capital, systemic violence, and social transformation. Modernists engage with fashion as a mood, a set of

material objects, and a target of critique, and, in doing so, anticipate and address contemporary debates centered on the uses of literature and literary criticism amidst the supposed crisis in the humanities. A modernist affect with a purpose, no less. By engaging modernism à la mode—that is, contingently, contextually, and in light of contemporary concerns—this book offers an alternative to the often-untenable distinctions between strong or weak, suspicious or reparative, and politically activist or quietist approaches to literature, which frame current debates about literary methodology. As fashion helps us to describe what modernist texts do, it enables us to do more with modernism as a form of inquiry, perception, and critique. Fashion and modernism are interwoven forms of inquiry, perception, and critique, writes Sheehan. It is fashion that puts the work of early twentieth-century writers in conversation with twenty-first century theories of emotion, materiality, animality, beauty, and history.

Behavioral Finance: The Second Generation Meir Statman, 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie

answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
