*Dictionaries. An International Encyclopedia of Lexicography* Rufus Gouws, Ulrich Heid, Wolfgang Schweickard, Herbert Ernst Wiegand, 2013-12-18 The basis for this additional volume are the three volumes of the handbooks *Dictionaries. An International Encyclopedia of Lexicography* (HSK 5.1-5.3), published between 1989 and 1991. An updating has been perceived as an important desideratum for a considerable time. In the present Supplementary Volume the premises and subjects of HSK 5.1-5.3 are complemented by new articles that take account of the practice-internal and theoretical developments of the last 15 years. Special attention has been given to the following topics: the status and function of lexicographic reference works, the history of lexicography, the theory of lexicography, lexicographic processes, lexicographic training and lexicographic institutions, new metalexicographic methods, electronic and, especially, computer-assisted lexicography.

*Alone in the Light* Brian Kenneth Swain, 2011-05-25 In Chechnya, a terrible mistake costs a brilliant young engineer his family. In Istanbul, an oil tanker on its maiden voyage sinks for no apparent reason. In Moscow, an astonishing new weapon threatens to upset the balance of world power. And in Sochi, a cutting-edge energy facility opens for business. Movlady Saidov is a young man struggling to navigate a tightrope between rage and love, embroiled in a complex web of conspiracy only partly of his own making. His story is fiction, but the technology, the politics, and the tension are as real as the headlines of yesterdays newspaper. This is Swains most compelling thriller yet, drawing together the seemingly unrelated worlds of cryogenic fuel technology and directed energy weaponry and placing them at the center of a high-stakes game of global geopolitics. It will keep you guessing. It will keep you thinking. It will keep you engrossed until the final climactic moments.

*Die slavischen Sprachen / The Slavic Languages. Halbband 2* Sebastian Kempgen, Peter Kosta, Tilman Berger, Karl Gutschmidt, 2014-11-26 The present second volume completes the handbook *Die slavischen Sprachen The Slavic languages. Ein internationales Handbuch zu ihrer Struktur, ihrer Geschichte und ihrer Erforschung. An International Handbook of their History, their Structure and their Investigation*. While the general conception is continued, the present volume now contains articles concerning inner and outer language history as well as problems of sociolinguistics, contact linguistics, standardology and language typology.

*Contemporary Ukraine on the Cultural Map of Europe* Larissa M. L. Zaleska Onyshkevych, Maria G. Rewakowicz, 2014-12-18 The concept of a 'return to Europe' has been integral to the movement for Ukrainian national rebirth since the nineteenth century. While the goal of a more fully reformed politics remains elusive, numerous expressions of Ukrainian culture continue to develop in the European spirit. This wide-ranging book explores Ukraine's European cultural connection, especially as it has been reestablished since the country achieved independence in 1991. The contributors discuss many aspects of Ukraine's contemporary culture - history, politics, and religion in Part I; literary culture in Part II; and language, popular culture, and the arts in Part III. What emerges is a fascinating picture of a young country grappling with its divided past and its colonial heritage, yet asserting its voice and preferences amid the diverse and at times conflicting realities of the contemporary political scene. Europe becomes a powerful point of reference, a measure against which the situation in post-independence Ukraine is gauged and debated. This framework allows for a better understanding of the complexities deeply ingrained in the social fabric of Ukrainian society.

**Accelerating MATLAB with GPU Computing** Jung W. Suh, Youngmin Kim, 2013-11-18 Beyond simulation and algorithm development, many developers increasingly use MATLAB even for product deployment in computationally heavy fields. This often demands that MATLAB codes run faster by leveraging the distributed parallelism of Graphics Processing Units (GPUs). While MATLAB successfully provides high-level functions as a simulation tool for rapid prototyping, the underlying details and knowledge needed for utilizing GPUs make MATLAB users hesitate to step into it. Accelerating MATLAB with GPUs offers a primer on bridging this gap. Starting with the basics, setting up MATLAB for CUDA (in Windows, Linux and Mac OS X) and profiling, it then guides users through advanced topics such as CUDA libraries. The authors share their experience developing algorithms using MATLAB, C++ and GPUs for huge datasets, modifying MATLAB codes to better utilize the computational power of GPUs, and integrating them into commercial software products. Throughout the book, they demonstrate many example codes that can be used as templates of C-MEX and CUDA codes for readers' projects. Download example codes from the publisher's website: <http://booksite.elsevier.com/9780124080805/> Shows how to accelerate MATLAB codes through the GPU for parallel processing, with minimal hardware knowledge Explains the related background on hardware, architecture and programming for ease of use Provides simple worked examples of

MATLAB and CUDA C codes as well as templates that can be reused in real-world projects

**Two-tiered Relexification in Yiddish** Paul Wexler, 2011-06-01 The book claims that Yiddish was created when Judaized Sorbs first relexified their language to High German between the 9th-12th centuries; by the 15th century, the descendants of the Judaized Khazars also relexified their Kiev-Polessian (northern Ukrainian and southern Belarusian) speech to Yiddish and German, Yiddish thus uses a mixed West-East Slavic grammar and suggests that converted Khazars were a major component in the Ashkenazic ethnogenesis.

*The Soul in the Axiosphere from an Intercultural Perspective, Volume One* Joanna Jurewicz, Ewa Masłowska, Dorota Pazio-Włazłowska, 2020-05-04 The essays collected in this volume form a multifaceted discourse on religious, philosophical, historical, ethnocultural and sociocultural, literary and linguistic issues. A multicultural approach to the problem of the soul allows the presentation of it on a microscale, focused on national and regional specificity, as well as on the

macroscale, oriented toward universal values which can be observed in the cultures of peoples distant from each other in both time and space. The book consists of 28 chapters, addressing the fundamental themes of human existence, which find expression in cultural texts in both colloquial and artistic language, and which have a prominent place in anthropological, psychological, metaphysical and theological debates.
