Stresses Around Rectangular Cutouts in Torsion Boxes Paul Kuhn,James P. Peterson,1953 A method is presented for calculating the stresses produced by rectangular cutouts of any size in torsion boxes. The problem is divided into a box problem and a cover problem. The box problem is a special case of the general method of analyzing torsion boxes without cutouts. In the cover problem, simple shear-lag theory is used to obtain key stresses; the final distributions are obtained from these key stresses by means of simple rules or empirical distribution curves. Comparisons with the results from three series of tests in which the dimensions of the cutouts varied over a wide range are shown.

Kafka Streams - Real-time Stream Processing Prashant Kumar Pandey,2019-03-26 The book Kafka Streams - Real-time Stream Processing helps you understand the stream processing in general and apply that skill to Kafka streams programming. This book is focusing mainly on the new generation of the Kafka Streams library available in the Apache Kafka 2.x. The primary focus of this book is on Kafka Streams. However, the book also touches on the other Apache Kafka capabilities and concepts that are necessary to grasp the Kafka Streams programming. Who should read this book? Kafka Streams: Real-time Stream Processing is written for software engineers willing to develop a stream processing application using Kafka Streams library. I am also writing this book for data architects and data engineers who are responsible for designing and building the organization's data-centric infrastructure. Another group of people is the managers and architects who do not directly work with Kafka implementation, but they work with the people who implement Kafka Streams at the ground level. What should you already know? This book assumes that the reader is familiar with the basics of Java programming language. The source code and examples in this book are using Java 8, and I will be using Java 8 lambda syntax, so experience with lambda will be helpful. Kafka Streams is a library that runs on Kafka. Having a good fundamental knowledge of Kafka is essential to get the most out of Kafka Streams. I will touch base on the mandatory Kafka concepts for those who are new to Kafka. The book also assumes that you have some familiarity and experience in running and working on the Linux operating system.

The Melanocortin Receptors Roger D. Cone,2000-03-14 Roger Cone and a distinguished team of expert investigators provide the first major treatment of this critically important receptor family. The book illuminates the structure and function of these receptors through a wide-ranging review of the latest findings concerning the biology, physiology, and pharmacology of their peptide ligands and covers the major melanocortin peptides, Melanocortin-1-Receptors through Melanocortin-5-Receptors. Topics include the characterization of the melanocortin receptors, the biochemical mechanism of receptor action, and receptor function and regulation. Timely and authoritative, The Melanocortin Receptors offers an up-to-date knowledge base on the remarkably complex structure and functions of the melanocortins, a guide that will prove invaluable for today's neuroscientists, endocrinologists, pharmacologists, and other clinical and experimental investigators working in this fast moving field.

The Maltese Archipelago at the Dawn of History Davide Tanasi,David Cardona,2020-08-27 This collection of essays provides a reassessment of the multifaceted evidence which emerged from excavations carried out in 1909 and 1959 in the settlement of Bahrija, both largely unpublished until now. Bahrija is a key site for understanding the later stages of Maltese prehistory before the beginning of the Phoenician colonial period.
