The NeWS Book James Gosling, David S.H. Rosenthal, Michelle J. Arden, 2012-12-06 This book is an introduction to NeWS: the Networked, Extensible, Window System from Sun Microsystems. It is oriented towards people who have a basic knowledge of programming and window systems who would like to understand more about window systems in general and NeWS in particular. A significant portion of the book is devoted to an overview and history of window systems. While there is enough detail here to allow readers to write simple NeWS applications, the NeWS Reference Manual [SUN87a] should be consulted for a more complete treatment. This book was written to refer to the NeWS 1.1 product, available from Sun and also available from several non-Sun suppliers. Shortly after this book is published, Sun will be releasing the next version of NeWS - the X11/NeWS merged window system. Chapter 10 is dedicated to an overview of that product, but X11/NeWS deserves a book of its own. All the code examples in this book have been tested on both NeWS and the X11/NeWS merge. Should there be another edition of this book, we will discuss some of the new development being done in the user interface tool kit area on NeWS. Significantly, the NeWS Development Environment (NDE) is now being developed at Sun; NDE promises to eclipse existing user interface toolkit designs and window programming environments.

Hit Refresh Satya Nadella, 2018-09-28 Microsoft dikenal sebagai salah satu penyokong besar revolusi digital. Tanpanya, kita semua tak akan menikmati betapa cepat dan nyamannya bekerja menggunakan personal computer. Namun, seiring berjalannya waktu, dunia komputasi mengalami perubahan yang luar biasa cepat. Tanpa inovasi yang benar-benar spektakuler, perusahaan ini diramalkan tak akan mampu mempertahankan popularitasnya. Inovasi tergantikan birokrasi. Kerja tim tergantikan politik internal. Microsoft mulai tertinggal. Hit Refresh berkisah tentang transformasi terbesar yang tengah berlangsung dalam tubuh Microsoft di bawah kepemimpinan Satya Nadella, sang CEO. Selama ini, ketika mendengar kata Microsoft, orang akan langsung mengaitkannya dengan Bill Gates yang cemerlang atau Steve Ballmer yang super energik. Nadella nyaris tak masuk ke radar para selebritas teknologi. Namun dalam tahun-tahun pertamanya memimpin, Nadella melakukan banyak gebrakan baru. Salah satunya adalah menciptakan budaya perusahaan yang menggabungkan antara empati dan teknologi. Dia juga membuat pertaruhan besar dalam beberapa teknologi kunci, seperti artificial intelligence (AI atau kecerdasan buatan) dan cloud computing (komputasi awan), yang membuat Microsoft menjadi unik. Di tangan Nadella, Microsoft mengubah fokusnya dari sekadar perusahaan pencari keuntungan menjadi perusahaan humanis yang berkontribusi bagi masa depan umat manusia. Tools and Weapons Brad Smith, Carol Ann Browne, 2019-09-10 The instant New York Times bestseller. From Microsoft's president and one of the tech industry's broadest thinkers, a frank and thoughtful reckoning with how to balance enormous promise and existential risk as the digitization of everything accelerates. "A colorful and insightful insiders' view of how technology is both empowering and threatening us. From privacy to cyberattacks, this timely book is a useful guide for how to navigate the digital future." -Walter Isaacson Microsoft President Brad Smith operates by a simple core belief: When your technology changes the world, you bear a responsibility to help address the world you have helped create. This might seem uncontroversial, but it flies in the face of a tech sector long obsessed with rapid growth and sometimes on disruption as an end in itself. While sweeping digital transformation holds great promise, we have reached an inflection point. The world has turned information technology into both a powerful tool and a formidable weapon, and new approaches are needed to manage an era defined by even more powerful inventions like artificial intelligence. Companies that create technology must accept greater responsibility for the future, and governments will need to regulate technology by moving faster and catching up with the pace of innovation. In Tools and Weapons, Brad Smith and Carol Ann Browne bring us a captivating narrative from the cockpit of one of the world's largest and most powerful tech companies as it finds itself in the middle of some of the thorniest emerging issues of our time. These are challenges that come with no preexisting playbook, including privacy, cybercrime and cyberwar, social media, the moral conundrums of artificial intelligence, big tech's relationship to inequality, and the challenges for democracy, far and near. While in no way a self-glorifying Microsoft memoir, the book pulls back the curtain remarkably wide onto some of the company's most crucial recent decision points as it strives to protect the hopes technology offers against the very real threats it also presents. There are huge ramifications for communities and countries, and Brad Smith provides a thoughtful and urgent contribution to that effort.

But cultures like this don't just happen overnight—leaders are responsible for fostering them. So, what really contributes to a thriving culture? What can a leader do to make a difference? Mark Miller and his team conducted a global study with more than 6,000 participants from ten countries to find the answers to these questions and more. In *Culture Rules*, leaders will learn the three simple rules that determine the health, vitality, and sustainability of culture, enabling them to build organizations that uncover untapped potential and transform it into performance. Reprogramming The American Dream Kevin Scott, Greg Shaw, 2020-04-07 ** #1 Wall Street Journal Bestseller ** In this essential book written by a rural native and Silicon Valley veteran, Microsoft's Chief technology officer tackles one of the most critical issues facing society today: the future of artificial intelligence and how it can be realistically used to promote growth, even in a shifting employment landscape. There are two prevailing stories about AI: for heartland low- and middle-skill workers, a dystopian tale of steadily increasing job destruction; for urban knowledge workers and the professional class, a utopian tale of enhanced productivity and convenience. But there is a third way to look at this technology that will revolutionize the workplace and ultimately the world. Kevin Scott argues that AI has the potential to create abundance and opportunity for everyone and help solve some of our most vexing problems. As the chief technology officer at Microsoft, he is deeply involved in the development of AI applications, yet mindful of their potential impact on workers—knowledge he gained firsthand growing up in rural Virginia. Yes, the AI Revolution will radically disrupt economics and employment for everyone for generations to come. But what if leaders prioritized the programming of both future technology and public policy to work together to find solutions ahead of the coming AI epoch? Like public health, the space program, climate change and public education, we need international understanding and collaboration on the future of AI and work. For Scott, the crucial question facing all of us is this: How do we work to ensure that the continued development of AI allows us to keep the American Dream alive? In this thoughtful, informed guide, he offers a clear roadmap to find the answer.

E-Commerce and Web Technologies Kurt Bauknecht, Birgit Pröll, Hannes Werthner, 2005-08-31 We welcome you to the 6th International Conference on E-Commerce and Web Technology (EC-Web 2005) held in Copenhagen, Denmark. It was held in conjunction with DEXA 2005. This conference was organized for the first time in Greenwich, UK, in 2000, and it has been able to attract an increasing number of participants and interest, reflecting the progress made in the field. As in the five previous years, EC-Web 2005 served as a forum that brought together researchers from academia and practitioners from industry to discuss the current state of the art in e-commerce and Web technologies. We are sure that inspirations and new ideas emerged from the intensive discussions that took place during the formal sessions and social events. Keynote addresses, research presentations and discussions during the conference helped to further develop the exchange of ideas among current researchers, developers and practitioners. The conference attracted 139 paper submissions and each paper was reviewed by three Program Committee members. The Program Committee selected 39 papers for presentation and publication (an acceptance rate of 28%). And we have to confess that this task was not that easy due to the high quality of the submitted papers.
