Ozawa Ichirō and Japanese Politics Aurelia George

Mulgan,2014-11-27 Ozawa Ichirō was the axis on which Japanese politics turned for more than two decades. He helped to reshape the electoral system, political funding rules, the evolution of the party system, the nature of executive government, the roles and powers of bureaucrats, and the conduct of parliamentary and policymaking processes. Admired and reviled in almost equal measure, Ozawa has been the most debated and yet least understood politician in Japan, with little agreement to be found amongst the many who have debated his patent political assets and palpable political flaws. This book examines the political goals, behaviour, methods and practices of Ozawa Ichirō, and in doing so, provides fascinating insights into the inner workings of Japanese politics. It explores Ozawa's paradoxical and conflicting contributions in terms of two contrasting models of 'old' and 'new' politics. Indeed, therein lies the problem of understanding the 'real' Ozawa: he remained a practitioner of old politics despite his rhetorical agenda of change to bring about new politics. In seeking to unravel the Ozawa enigma, Aurelia George Mulgan reveals his primary motivations, to establish whether he sought power primarily to enact reforms, or, whether his reform goals simply disguised power-seeking objectives. This volume seeks to illuminate Ozawa's true character as a politician, and untangle the complex elements of old and new politics that he represents. Through an in-depth study of Ozawa and his political activities, this book shows how the Japanese political system works at the micro level of individual politicians, political relationships and systems. As such it will be of huge interest to students and scholars of Japanese politics, Asian politics and political systems.

Successes and New Directions in Data Mining Poncelet, Pascal, Masseglia, Florent, Teisseire, Maguelonne, 2007-10-31 The problem of mining patterns is becoming a very active research area and efficient techniques have been widely applied to problems in industry, government, and science. From the initial definition and motivated by real-applications, the problem of mining patterns not only addresses the finding of itemsets but also more and more complex patterns. *Successes and New Directions in Data Mining* addresses existing solutions for data

mining, with particular emphasis on potential real-world applications. Capturing defining research on topics such as fuzzy set theory, clustering algorithms, semi-supervised clustering, modeling and managing data mining patterns, and sequence motif mining, this book is an indispensable resource for library collections.

The Routledge Companion to Urban Regeneration

Michael E. Leary, John McCarthy, 2013-10-30 In the past decade, urban regeneration policy makers and practitioners have faced a number of difficult challenges, such as sustainability, budgetary constraints, demands for community involvement and rapid urbanization in the Global South. Urban regeneration remains a high profile and important field of government-led intervention, and policy and practice continue to adapt to the fresh challenges and opportunities of the 21st century, as well as confronting long standing intractable urban problems and dilemmas. This Companion provides cutting edge critical review and synthesis of recent conceptual, policy and practical developments within the field. With contributions from 70 international experts within the field, it explores the meaning of 'urban regeneration' in differing national contexts, asking questions and providing informed discussion and analyses to illuminate how an apparently disparate field of research, policy and practice can be rendered coherent, drawing out common themes and significant differences. The Companion is divided into six sections, exploring: globalization and neo-liberal perspectives on urban regeneration; emerging reconceptualizations of regeneration; public infrastructure and public space; housing and cosmopolitan communities; community centred regeneration; and culture-led regeneration. The concluding chapter considers the future of urban regeneration and proposes a nine-point research agenda. This Companion assembles a diversity of approaches and insights in one comprehensive volume to provide a state of the art review of the field. It is a valuable resource for both advanced undergraduate

and postgraduate students in Urban Planning, Built Environment, Urban Studies and Urban Regeneration, as well as academics, practitioners and politicians.

Information Trapping Tara Calishain, 2006-12-07 How many times have you run a Google search that resulted in thousands of results? With over 8 billion pages online and more posted every day, the Web more than likely contains the information you're looking for — if only you could find it. In *Information Trapping*:

Real-Time Research on the Web, Internet-search-engine expert Tara Calishain makes researching more efficient and rewarding for anyone for whom the Web is an indispensable tool — academics, journalists, scientists, and professionals, as well as bloggers, genealogists, and hobbyists. She does so by teaching the latest techniques for building automated information-gathering systems. As an alternative to the typical one-time search for information, Tara demonstrates how readers can use RSS feeds, page monitoring tools, and other software to set up information streams of many different data types — from text to multimedia to conversations — for capture and review.

The Ownership of the News Great Britain: Parliament: House of Lords: Select Committee on Communications, 2008 This report examines the impact that media ownership can have on the news and the effect of consolidation on the newspaper, television and radio industries. The newspaper industry is facing severe problems as readership levels fall; young people turn to other sources of news; and advertising moves to the internet. Newspaper companies are having to make savings and this is having a particular impact on investment in news gathering and investigative journalism. In television news the same trends are evident. Most news programmes have smaller audiences than they had ten years ago; younger people in particular are watching less television news; commercial television channels are losing advertising revenue to the internet. New media, in particular the internet, are having a major impact on the way news is produced and consumed, but the traditional forms of news are likely to be the most popular sources of news for the foreseeable future. The proliferation of news sources has not been matched by a corresponding expansion in professional and investigative journalism. Owners can and do influence the news in a variety of ways. They are in a position to have significant political impact. The consolidation of media ownership adds to the risk of disproportionate influence. The Committee recommends reform

of the public interest test criteria for newspaper mergers and also believes that reforming cross-media ownership restrictions on regional and local newspaper and radio mergers is necessary. The Committee does not consider changes in ownership regulation and competition law to be enough if the aim is to ensure a range of voices and high quality news. The public service broadcasting system in the United Kingdom provides an invaluable news service for the citizen and it is crucial that the contribution of all the public service broadcasters is maintained.

Reagan Versus The Sandinistas Thomas W Walker, Harvey Williams, Peter Kornbluh, Eva Gold, 2019-07-11 The product of research and investigation by a team of sixteen authors, Reagan versus the Sandinistas is the most comprehensive and current study to date of the Reagan administration's mounting campaign to reverse the Sandinista revolution. The authors thoroughly examine all major aspects of Reagan's low-intensity war, from the U.S. government's attempts at economic destabilization to direct CIA sabotage and the sponsorship of the contras or freedom fighters. They also explore less-public tactics such as electronic penetration, behind-the-scenes manipulation of religious and ethnic tensions, and harassment of U.S. Nicaraguan specialists and fellow travelers. The book concludes with a consideration of the impact of these activities and their implications for international law, U.S. interests, U.S. polity, and Nicaragua itself. Reagan versus the Sandinistas is designed not only for courses on Latin America, U.S. foreign policy, and international relations, but also for students, scholars, and others interested in understanding one of the most massive, complex efforts—short of direct intervention—organized by the United States to overthrow the government of another country.

Governig by fake news Jacques Baud, 2023-03-07 What are Islamic State is seeking to create a civil war in France; that Syrian President Bashar al-Assad used chemical weapons; that

Vladimir Putin is trying to destabilise our democracies; that terrorism has struck France, not for what it does, but for what it is; that the genocide in Darfur has claimed 400,000 victims?... Literally none, but these assertions are enough to establish the foreign policy of Western countries. The author, a former agent of the Swiss strategic intelligence service, reviews the main contemporary conflicts that Western countries have managed with fake news over the last thirty years. Jacques Baud, a colonel, chemical and nuclear weapons expert, trained in counter-terrorism and counter-guerrilla warfare, designed the Geneva International Centre for Humanitarian Demining (GICHD) and its Information Management System for Mine Action (IMSMA). In the service of the United Nations, he served as Chief of Doctrine for Peacekeeping Operations in New York, and was engaged in Africa. In NATO, he led the fight against the proliferation of small arms. He is the author of several books on intelligence, asymmetric warfare and terrorism.
