The Tangible in Music Marko Aho,2016-05-26 In the age of digital music it seems striking that so many of us still want to produce music concretely with our bodies, through the movement of our limbs, lungs and fingers, in contact with those materials and objects which are capable of producing sounds. The huge sales figures of musical instruments in the global market, and the amount of time and effort people of all ages invest in mastering the tools of music, make it clear that playing musical instruments is an important phenomenon in human life. By combining the findings made in music psychology and performative ethnomusicology, Marko Aho shows how playing a musical instrument, and the pleasure musicians get from it, emerges from an intimate dialogue between the personally felt body and the sounding instrument. An introduction to the general aspects of the tactile resources of musical instruments, musical style and the musician is followed by an analysis of the learning process of the regional kantele style of the Perho river valley in Finnish Central Ostrobothnia.

Musical Instruments at the World's Columbian Exposition Frank D. Abbott,1895

The World Encyclopedia of Musical Instruments Max Wade-Matthews,2000 A comprehensive encyclopedia of musical instruments, covering all sections of the orchestra: strings, woodwind and brass, percussion, keyboard and the voice, as well as historical, rare and non-western instruments. An illustrated guide to instruments and their historical relatives, with specially commissioned photographs of all the modern instruments. Famous players, orchestras and concert halls, and the role of the composer and the conductor. A history of music-making, beginning with man's first discovery of music and its development in the ancient civilizations of Egypt, Greece, India, China and Japan, charting key turning points such as the invention of the bow and valves, and ending with the modern instruments of the twentieth century. Includes information on the evolution of the orchestra -- from medieval consorts, baroque and classical orchestras, through to the modern symphony orchestra we know today. Explores other forms such as folk music, brass and military bands, country music, jazz bands, big bands and pop groups.

The Manual of Musical Instrument Conservation Stewart Pollens,2015-07-09 This is the first book to combine museum-based conservation techniques with practical instructions on the maintenance, repair, adjustment, and tuning of virtually every type of historical musical instrument. As one of the world's leading conservators of musical instruments, Stewart Pollens gives practical advice on the handling, storage, display and use of historic musical instruments in museums and other settings, and provides technical information on such wide-ranging subjects as acoustics, cleaning, climate control, corrosion, disinfestation, conservation ethics, historic stringing practice, measurement and historic metrology, retouching, tuning historic temperaments, varnish and writing reports. There are informative essays on the conservation of each of the major musical instrument groups, the treatment of paper, textiles, wood and metal, as well as historic techniques of wood and metalworking as they apply to musical instrument making and repair. This is a practical guide that includes equations, formulas, tables and step-by-step instructions.

Handbook of Materials for Wind Musical Instruments Voichita Bucur,2019-09-06 This book addresses key questions about the materials used for the wind instruments of classical symphony orchestra such as flutes, clarinets, saxophones, oboes, bassoons and pipe organs. The content of this book is structured into four parts. Part 1- Description of materials for wind instruments deals with wood species and materials for reeds used for making clarinet, oboe and bassoon- and, with metallic materials and alloys for - horn, trumpet, trombone, etc. Auxiliary materials associated with the manufacturing of wind instruments are felt, cork, leather and parchment. Part 2- Basic acoustics of wind instruments, in which are presented succinctly, some pertinent aspects related to the physics of the resonant air column. An important aspect discussed is related to the effect of wall

material on the vibration modes of the walls of wind instruments. The methods for measuring the acoustical properties of wind instruments are presented. Part 3- Manufacturing of wind instruments, describes the technology used in manufacturing metallic tubes and pipes made of wood. Part 4 - The durability and degradation of materials addresses data about methods for cleaning wind instruments, studies factors producing degradation of organ pipes, describes methods of conservation and restoration of brass instruments and of historical pipe organs. Finally, the properties of marble are described, being the only one nondegradable and sustainable material used for pipes for organs.
