All Joy and No Fun Jennifer Senior,2014-01-28 Thousands of books have examined the effects of parents on their children. In All Joy and No Fun, award-winning journalist Jennifer Senior now asks: what are the effects of children on their parents? In All Joy and No Fun, award-winning journalist Jennifer Senior tries to tackle this question, isolating and analyzing the many ways in which children reshape their parents' lives, whether it's their marriages, their jobs, their habits, their hobbies, their friendships, or their internal senses of self. She argues that changes in the last half century have radically altered the roles of today's mothers and fathers, making their mandates at once more complex and far less clear. Recruiting from a wide variety of sources—in history, sociology, economics, psychology, philosophy, and anthropology—she dissects both the timeless strains of parenting and the ones that are brand new, and then brings her research to life in the homes of ordinary parents around the country. The result is an unforgettable series of family portraits, starting with parents of young children and progressing to parents of teens. Through lively and accessible storytelling, Senior follows these mothers and fathers as they wrestle with some of parenthood's deepest vexations—and luxuriate in some of its finest rewards. Meticulously researched yet imbued with emotional intelligence, All Joy and No Fun makes us reconsider some of our culture's most basic beliefs about parenthood, all while illuminating the profound ways children deepen and add purpose to our lives. By focusing on parenthood, rather than parenting, the book is original and essential reading for mothers and fathers of today—and tomorrow.

Play Anything Ian Bogost,2016-09-13 How filling life with play-whether soccer or lawn mowing, counting sheep or tossing Angry Birds -- forges a new path for creativity and joy in our impatient age Life is boring: filled with meetings and traffic, errands and emails. Nothing we'd ever call fun. But what if we've gotten fun wrong? In Play Anything, visionary game designer and philosopher Ian Bogost shows how we can overcome our daily anxiety; transforming the boring, ordinary world around us into one of endless, playful possibilities. The key to this playful mindset lies in discovering the secret truth of fun and games. Play Anything, reveals that games appeal to us not because they are fun, but because they set limitations. Soccer wouldn't be soccer if it wasn't composed of two teams of eleven players using only their feet, heads, and torsos to get a ball into a goal; Tetris wouldn't be Tetris without falling pieces in characteristic shapes. Such rules seem needless, arbitrary, and difficult. Yet it is the limitations that make games enjoyable, just like it's the hard things in life that give it meaning. Play is what happens when we accept these limitations, narrow our focus, and, consequently, have fun. Which is also how to live a good life. Manipulating a soccer ball into a goal is no different than treating ordinary circumstances- like grocery shopping, lawn mowing, and making PowerPoints-as sources for meaning and joy. We can play anything by filling our days with attention and discipline, devotion and love for the world as it really is, beyond our desires and fears. Ranging from Internet culture to moral philosophy, ancient poetry to modern consumerism, Bogost shows us how today's chaotic world can only be tamed- and enjoyed-when we first impose boundaries on ourselves.

Mama Tried Emily Flake,2015-10-06 New Yorker cartoonist Emily Flake relates the hilarious horrors of pregnancy, birth, and early parenting in this funny, poignant, and beautifully illustrated book. For most people, having a child doesn't go exactly as planned. Not many are willing to admit that not only did they dislike the early days of parenting, they sometimes hated it. Mama Tried is a relatable collection of cartoons and essays pertaining to the good, bad, and (very) ugly parenting experiences we all face. Subjects range from are you ready for children? to baby gear class-warfare. With incredible honesty, Flake tackles everything from morning sickness to sleep training, shedding much needed light on the gnarly realities of breastfeeding, child proofing, mommy groups, and every unrealistic expectation in between. Mama Tried will be an indispensable companion for sleepless parents and a fond reminder for those already out of the woods.

Little Weirds Jenny Slate,2019-11-05 One of Vanity Fair's Great Quarantine Reads: Step into Jenny Slate's wild imagination in this magical (Mindy Kaling), delicious (Amy Sedaris), and poignant (John Mulaney) New York Times bestseller about love, heartbreak, and being alive -- this book is something new and wonderful (George Saunders). You may know Jenny Slate from her Netflix special, Stage Fright, as the creator of Marcel the Shell, or as the star of Obvious Child. But you don't really know Jenny Slate until you get bonked on the head by her absolutely singular writing style. To see the world through Jenny's eyes is to see it as though for the first time, shimmering with strangeness and possibility. As she will remind you, we live on an ancient ball that rotates around a bigger ball made up of lights and gasses that are science gasses, not farts (don't be immature). Heartbreak, confusion, and misogyny stalk this blue-green sphere, yes, but it is also a place of wild delight and unconstrained vitality, a place where we can start living as soon as we are born, and we can be born at any time. In her dazzling, impossible-to-categorize debut, Jenny channels the pain and beauty of life in writing so fresh, so new, and so burstingly alive, we catch her vision like a fever and bring it back out into the bright day with us, where everything has changed.

The Disappearing Spoon Sam Kean,2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Data, a Love Story Amy Webb,2014-01-28 “Amy Webb found her true love after a search that's both charmingly romantic and relentlessly data-driven. Anyone who uses online dating sites must read her funny, fascinating book.”—Gretchen Rubin, #1 New York Times bestselling author of The Happiness Project After yet another disastrous date, Amy Webb was preparing to cancel her JDate membership when epiphany struck: her standards weren't too high, she just wasn't approaching the process the right way. Using her gift for data strategy, she found which keywords were digital-man magnets, analyzed photos, and then adjusted her (female) profile to make the most of that intel. Then began the deluge—dozens of men who actually met her own stringent requirements wanted to meet her. Among them: her future husband, now the father of her child.

Parenting Out of Control Margaret K. Nelson,2010-05-01 They go by many names: helicopter parents, hovercrafts, PFHs (Parents from Hell). The news media is filled with stories of well-intentioned parents going to ridiculous extremes to remove all obstacles from their child's path to greatness . . . or at least to an ivy league school. From cradle to college, they remain intimately enmeshed in their children's lives, stifling their development and creating infantilized, spoiled, immature adults unprepared to make the decisions necessary for the real world. Or so the story goes. Drawing on a wealth of eye-opening interviews with parents across the country, Margaret K. Nelson cuts through the stereotypes and hyperbole to examine the realities of what she terms “parenting out of control.” Situating this phenomenon within a broad sociological context, she finds several striking explanations for why today's prosperous and well-educated parents are unable to set realistic boundaries when it comes to raising their children. Analyzing the goals and aspirations parents have for their children as well as the strategies they use to reach them, Nelson discovers fundamental differences among American parenting styles that expose class fault lines, both within the elite and between the elite and the middle and working classes. Nelson goes on to explore the new ways technology shapes modern parenting. From baby monitors to cell phones (often referred to as the world's longest umbilical cord), to social networking sites, and even GPS devices, parents have more tools at their disposal than ever before to communicate with, supervise, and even spy on their children. These play important and often surprising roles in the phenomenon of parenting out of control. Yet the technologies parents choose, and those they refuse to use, often seem counterintuitive. Nelson shows that these choices make sense when viewed in the light of class expectations. Today's parents are faced with unprecedented opportunities and dangers for their children, and are evolving novel strategies to adapt to these changes. Nelson's lucid and insightful work provides an authoritative examination of what happens when these new strategies go too far.

What happens when one frustrated dad turns his kids' lives upside down in search of a new way to be a family? Dan Kois and his wife always did their best for their kids. Busy professionals living in the D.C. suburbs, they scheduled their children's time wisely, and when they weren't arguing over screen time, the Kois family-Dan, his wife Alia, and their two pre-teen daughters-could each be found searching for their own happiness. But aren't families supposed to achieve happiness together? In this eye-opening, heartwarming, and very funny family memoir, the fractious, loving Kois' go in search of other places on the map that might offer them the chance to live away from home-but closer together. Over a year the family lands in New Zealand, the Netherlands, Costa Rica, and small-town Kansas. The goal? To get out of their rut of busyness and distractedness and to see how other families live outside the East Coast parenting bubble. HOW TO BE A FAMILY brings readers along as the Kois girls-witty, solitary, extremely online Lyra and goofy, sensitive, social butterfly Harper-like

through the Kiwi bush, ride bikes to a Dutch school in the pouring rain, battle iguanas in their Costa Rican kitchen, and learn to love a town where everyone knows your name. Meanwhile, Dan interviews neighbors, public officials, and scholars to learn why each of these places work the way they do. Will this trip change the Kois family's lives? Or do families take their problems and conflicts with them wherever we go? A journalistic memoir filled with heart, empathy, and lots of whining, HOW TO BE A FAMILY will make readers dream about the amazing adventures their own families might take.
