5000 Years of Tiles Hans Van Lemmen,2013-10-22 A comprehensive, full-color exploration of tile art and production worldwide, from earliest times to the present day. The book is both an authoritative work of reference and a visual delight, ranging from ancient Greece, where the first fired roof tiles date from as early as the third millennium BC, to twentieth-century Mexico. Along the way we encounter stunning examples of the tiler's art: the enormous English medieval floor pavements from Byland Abbey and Clarendon Palace; figural tiles from China, intended to adorn roofs and ward off evil; the famous Iznik tiles from the Islamic world, with their richly decorative patterns; the highly stylised ceramic tiles of the Arts and Crafts movement; and the tiles created by some of the finest ceramic artists and potters of the twenty-first century. Placing the tiles firmly in their historical and cultural context, the book highlights both continuity and diversity, the dissemination of techniques and designs, and how tile art in one time and place has inspired and rejuvenated those in others. Tiles are also studied in terms of function as well as form, and the full range of architectural and practical purposes for which they have been used - from floors to roofs, stoves to bathrooms, cathedrals to metro stations - will be explored, along with the various techniques employed to create such versatile pieces. 5000 Years of Tiles is the essential, most comprehensive single volume for anyone interested in the ceramic, decorative, and architectural arts.

Wang Tiles in Computer Graphics Ares Lagae,2022-06-01 Many complex signals in computer graphics, such as point distributions and textures, cannot be efficiently synthesized and stored. This book presents tile-based methods based on Wang tiles and corner tiles to solve both these problems. Instead of synthesizing a complex signal when needed, the signal is synthesized beforehand over a small set of Wang tiles or corner tiles. Arbitrary large amounts of that signal can then efficiently be generated when needed by generating a stochastic tiling, and storing only a small set of tiles reduces storage requirements. A tile-based method for generating a complex signal consists of a method for synthesizing the signal over a set of Wang tiles or corner tiles, and a method for generating a stochastic tiling using the set of tiles. The method for generating a stochastic tiling using the set of tiles is independent of the signal. This book covers scanline stochastic tiling algorithms and direct stochastic tiling algorithms for Wang tiles and corner tiles. The method for synthesizing the signal over a set of tiles is dependent on the signal. This book covers tile-based methods for texture synthesis and for generating Poisson disk distributions. This book also explores several applications such as tile-based texture mapping and procedural modeling and texturing. Although the methods for constructing a complex signal over a set of Wang tiles or corner tiles are dependent on the signal, the general idea behind these methods generalizes to other kinds of signals. The methods presented in this book therefore have the potential to make the generation and storage of almost any complex signal efficient. Blue Tiles Erik Orrantia,2007-09 Mexico City is a tough enough place to live--crime and corruption, underemployment, drugs, poverty. Francisco has long been feeling the pressure from his mother, a hotel house-cleaner, to find work. His youngest brother, Mario, is frying his brain on paint thinner. His girlfriend is expecting commitment that he's not ready to give. Since his father's not around, he's the man of the house. Isn't he supposed to solve these problems? When he meets Leon, an upper class, self-accepting gay, everything begins to change. He is introduced to a different side of the City...and a different side of himself. But the problems are far from solved. Mario's drug addiction comes to a brink. Veronica is pregnant. And employment is far from paradise. At the same time, can he give Leon what he expects? Is a back-alley abortion clinic the way to go? Is there any hope of treatment for Mario? What really happened to his father? Is leaving the City with Leon a solution or does it mean abandoning his family when he's most needed? It's time for Francisco to become a man and make decisions for himself. He needs to balance his own future with the needs of his family and the pressures of society. He needs to find a way, in the legacy of a famous nobleman, to build his House of Blue Tiles.
