Every Nation for Itself Ian Bremmer, 2012-05-03 Following the acclaim for *The End of the Free Market*, Ian Bremmer is back with *Every Nation for Itself*, where he addresses the next big issue for the shifting world economy. 'Smart and snappy ... provides the most cogent prediction of how the politics of a post-America world will play out' *New Statesman* What happens when nobody's running the world? The United States is in financial crisis and can't hold onto the reins of the G-20. But China has no interest in international leadership, Europe is trying to save the euro, and emerging powers like Brazil and India are focused on domestic development. No government has the time, resources or political capital needed to take an international lead. The world power structure is about to have a vacancy...at the top. Welcome to the G-Zero world, in which no single country has the power to shape a truly global agenda. That means we are about to see 20 years of conflict over economics, finance and climate change. Bestselling author and strategist Ian Bremmer reveals how world powers are rapidly turning into gated communities, locked in competition. Who will prevail? 'A prodigy in the US global commentariat. Mr Bremmer's rehearsal of the consequences should make us all wise up' *Financial Times* 'An author who is always full of insights' *George Osborne* Ian Bremmer is the president of the world's leading global political risk research and consulting firm, Eurasia Group. He has written for the *Wall Street Journal*, *Washington Post*, *Newsweek*, and *Harvard Business Review*. His six books include *The J Curve* and *The End Of The Free Market*.

Why Nations Fail Daron Acemoglu, James A. Robinson, 2013-09-17 Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will

it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? *Why Nations Fail* will change the way you look at—and understand—the world.

American Nations Colin Woodard, 2012-09-25 • A New Republic Best Book of the Year • The Globalist Top Books of the Year • Winner of the Maine Literary Award for Non-fiction Particularly relevant in understanding who voted for who during presidential elections, this is an endlessly fascinating look at American regionalism and the eleven "nations" that continue to shape North America According to award-winning journalist and historian Colin Woodard, North America is made up of eleven distinct nations, each with its own unique historical roots. In *American Nations* he takes readers on a journey through the history of our fractured continent, offering a revolutionary and revelatory take on American identity, and how the conflicts between them have shaped our past and continue to mold our future. From the Deep South to the Far West, to Yankeedom to El Norte, Woodard (author of *American Character: A History of the Epic Struggle Between Individual Liberty and the Common Good*) reveals how each region continues to uphold its distinguishing ideals and identities today, with results that can be seen in the composition of the U.S. Congress or on the county-by-county election maps of any hotly contested election in our history.

One Nation, Two Cultures Gertrude Himmelfarb, 2001-01-30 From one of today's most respected historians and cultural critics comes a new book examining the gulf in American society--a division that cuts across class, racial, ethnic, political and sexual lines. One side originated in the tradition of republican virtue, the other in the counterculture of the late 1960s. Himmelfarb argues that, while the latter generated the dominant culture of today--particularly in universities, journalism, television, and film--a dissident culture continues to promote the values of family, a civil society, sexual morality, privacy, and patriotism. Proposing democratic remedies for our moral and cultural diseases, Himmelfarb concludes that it is a tribute to Americans that we remain one nation even as we are divided into two cultures.

One Gospel for All Nations Brad Vaughn, 2015-12-14 The Bible tells us what to believe—the gospel. Did you know it also shows how to contextualize the gospel? In *One Gospel for All Nations*, Jackson Wu does more than talk about principles. He gets practical. When the biblical writers explain the gospel, they consistently use a pattern that is both firm and flexible. Wu builds on this insight to demonstrate a model of contextualization that starts with interpretation and can be applied in any culture. In the process, he explains practically why we must not choose between the Bible and culture. Wu highlights various implications for both missionaries and theologians. Contextualization should be practical, not pragmatic; theological, not theoretical.

Disunited Nations Peter Zeihan, 2020-03-03 Should we stop caring about fading regional powers like China, Russia, Germany, and Iran? Will the collapse of international cooperation push France, Turkey, Japan, and Saudi Arabia to

the top of international concerns? Most countries and companies are not prepared for the world Peter Zeihan says we're already living in. For decades, America's allies have depended on its might for their economic and physical security. But as a new age of American isolationism dawns, the results will surprise everyone. In *Disunited Nations*, geopolitical strategist Peter Zeihan presents a series of counterintuitive arguments about the future of a world where trade agreements are coming apart and international institutions are losing their power. Germany will decline as the most powerful country in Europe, with France taking its place. Every country should prepare for the collapse of China, not North Korea. We are already seeing, as Zeihan predicts, a shift in outlook on the Middle East: It is no longer Iran that is the region's most dangerous threat, but Saudi Arabia. The world has gotten so accustomed to the "normal" of an American-dominated order that we have all forgotten the historical norm: several smaller, competing powers and economic systems throughout Europe and Asia. America isn't the only nation stepping back from the international system. From Brazil to Great Britain to Russia, leaders are deciding that even if plenty of countries lose in the growing disunited chaos, their nations will benefit. The world isn't falling apart—it's being pushed apart. The countries and businesses prepared for this new every-country-for-itself ethic are those that will prevail; those shackled to the status quo will find themselves lost in the new world disorder. Smart, interesting, and essential reading, *Disunited Nations* is a sure-to-be-controversial guidebook that analyzes the emerging shifts and resulting problems that will arise in the next two decades. We are entering a period of chaos, and no political or corporate leader can ignore Zeihan's insights or his message if they want to survive and thrive in this uncertain new time.

Cities and the Wealth of Nations Jane Jacobs, 2016-08-17 In this eye-opening work of economic theory, Jane Jacobs argues that it is cities—not nations—that are the drivers of wealth. Challenging centuries of economic orthodoxy, in *Cities and the Wealth of Nations* the beloved author contends that healthy cities are constantly evolving to replace imported goods with locally-produced alternatives, spurring a cycle of vibrant economic growth. Intelligently argued and drawing on examples from around the world and across the ages, here Jacobs radically changes the way we view our cities—and our entire economy.

Nationalism Liah Greenfeld, 2019-03-26 "We need a nation," declared a certain Phillippe Grouvelle in the revolutionary year of 1789, "and the Nation will be born."—from *Nationalism: A Short History* Nationalism, often

the scourge, always the basis of modern world politics, is spreading. In a way, all nations are willed into being. But a simple declaration, such as Grouvelle's, is not enough. As historian Liah Greenfeld shows in her new book, a sense of nation–nationalism–is the product of the complex distillation of ideas and beliefs, and the struggles over them. Greenfeld takes the reader on an intellectual journey through the origins of the concept “nation” and how national consciousness has changed over the centuries. From its emergence in sixteenth century England, nationalism has been behind nearly every significant development in world affairs over succeeding centuries, including the American and French revolutions of the late eighteenth centuries and the authoritarian communism and fascism of the twentieth century. Now it has arrived as a mass phenomenon in China as well as gaining new life in the United States and much of Europe in the guise of populism. Written by an authority on the subject, *Nationalism: A Short History* stresses the contradictory ways of how nationalism has been institutionalized in various places. On the one hand, nationalism has made possible the realities of liberal democracy, human rights, and individual self-determination. On the other hand, nationalism also has brought about authoritarian and racist regimes that negate the individual as an autonomous agent. That tension is all too apparent today.
