**Tarek Sobh, Khaled Elleithy, Ausif
Mahmood, Mohammad A. Karim**

The Dynamic Internet Christopher S. Yoo, 2012 Offers a comprehensive history of the Internet and efforts to regulate its use. Yoo contends that rather than engaging in prescriptive regulatory oversight, the government should promote competition in other ways, such as reducing costs for consumers, lowering entry barriers for new producers, and increasing transparency.

Biometric Technology Ravi Das, 2014-11-07 Most biometric books are either extraordinarily technical for technophiles or extremely elementary for the lay person. Striking a balance between the two, *Biometric Technology: Authentication, Biocryptography, and Cloud-Based Architecture* is ideal for business, IT, or security managers that are faced with the task of making purchasing, migration, or adoption decisions. It brings biometrics down to an understandable level, so that you can immediately begin to implement the concepts discussed. Exploring the technological and social implications of widespread biometric use, the book considers the science and technology behind biometrics as well as how it can be made more affordable for small and medium-sized business. It also presents the results of recent research on how the principles of cryptography can make biometrics more secure. Covering biometric technologies in the cloud, including security and privacy concerns, the book includes a chapter that serves as a how-to manual on procuring and deploying any type of biometric system. It also includes specific examples and case studies of actual biometric deployments of localized and national implementations in the U.S. and other countries. The book provides readers with a technical background on the various biometric technologies and how they work. Examining optimal application in various settings and their respective

strengths and weaknesses, it considers ease of use, false positives and negatives, and privacy and security issues. It also covers emerging applications such as biocryptography. Although the text can be understood by just about anybody, it is an ideal resource for corporate-level executives who are considering implementing biometric technologies in their organizations.

Bandwidth Allocation for Video under Quality of Service Constraints Bushra Anjum, Harry G.

Perros, 2015-01-20 We present queueing-based algorithms to calculate the bandwidth required for a video stream so that the three main Quality of Service constraints, i.e., end-to-end delay, jitter and packet loss, are ensured.

Conversational and streaming video-based applications are becoming a major part of the everyday Internet usage. The quality of these applications (QoS), as experienced by the user, depends on three main metrics of the underlying network, namely, end-to-end delay, jitter and packet loss. These metrics are, in turn, directly related to the capacity of the links that the video traffic traverses from its source to destination. The main problem that this book addresses is how much bandwidth we should allocate on the path from source to destination of a video traffic flow such that the end-to-end delay, jitter and packet loss of the video packets are within some expected required bounds.

Managing Web Usage in the Workplace Murugan Anandarajan, Claire Simmers, 2003-01-01 Covering the impact of domestic and international Internet abuse on individuals, groups, organizations, and societies, this research-based book focuses on the phenomenon of Internet abuse and its consequences for an increasingly technology-driven world. Online shopping, Internet gambling, telecommuting, and e-business practices are discussed with emphases on workplace behaviors and

abuses. Web management techniques and legal risks are addressed to provide solutions and policing strategies.

Network Usage Complete Self-Assessment Guide

Gerardus Blokdijk, 2019-02-26 Are improvement team members fully trained on Network Usage? How much are sponsors, customers, partners, stakeholders involved in Network Usage? In other words, what are the risks, if Network Usage does not deliver successfully? How did the Network Usage manager receive input to the development of a Network Usage improvement plan and the estimated completion dates/times of each activity? What key business process output measure(s) does Network Usage leverage and how? Do you feel that more should be done in the Network Usage area? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Network Usage investments work better. This Network Usage All-Inclusive Self-Assessment enables You to be that person. All the tools you need to an in-depth Network Usage Self-Assessment. Featuring 705 new and updated case-based questions, organized into seven core areas of process

design, this Self-Assessment will help you identify areas in which Network Usage improvements can be made. In using the questions you will be better able to: - diagnose Network Usage projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Network Usage and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Network Usage Scorecard, you will develop a clear picture of which Network Usage areas need attention. Your purchase includes access details to the Network Usage self-assessment dashboard download which gives you your dynamically prioritized projects-ready tool and shows your organization exactly what to do next. Escaping from the Great Firewall Sergio de Eccher, 2017-03-13 The strict regulations on the Internet imposed by the Chinese government on its cyberspace are well known and the Chinese web experience is heavily spoiled day by day. Nevertheless, the typical Chinese Internet user is often not aware of what is going on in China and users' perception of the Internet freedom issues is very low (Global Internet User Survey 2012). This book focuses its exploration on the implications and repercussions of a typical Chinese user, accustomed to the pervasive Internet censorship in China, who starts benefiting from an open and democratic Internet environment as the Italian one. Will the Chinese user's perception of the problems of freedom of speech and open access to information increase? Sergio de Eccher After having completed his Master degree in Political Science and International Relations at University of Padua (Italy) with a thesis centered on the new threats to States' security within the 2.0 era, Sergio de Eccher (1977) has focused his research on the role of the Internet within the authoritarian States. During his 5 years of Phd studies at University of St. Gallen (Switzerland), he has examined the role of the Internet in China and the strict regulations imposed by the Chinese government on its cyberspace. This book revolves around Chinese users' perception of the Internet freedom issues present in China and its core focuses on the Internet habits of the typical Chinese user within a controlled web environment. The innovation of this project is based on the implications occurring after that a Chinese user living in Italy, accustomed to the

pervasive Internet censorship present within the Chinese Internet, starts benefiting from an open Internet dimension within a democratic country, as the Italian cyber-society.

How to Accelerate Your Internet Rob

Flickenger, 2006-10-01

Computer Network Usage László Csaba, Katie

Tarnay, T. Szentiványi, 1986 This volume presents the contributions from the COMNET '85 conference - the third in a series of meetings devoted to the discussion and analysis of computer networks. Two important phenomena are currently connected with networks: one is the effort to achieve a high degree of universality, to have unbound access to different sources, and the other is the emphasis placed on the services which networks can provide nowadays. These considerations raise the questions: how can networks efficiently combine individual and independent services rendered by single machines or even by groups of them? and how can the range be widened, and what kind of difficulties arise in connection with these efforts? This book presents and discusses exactly these problems, utilizing the knowledge of specialists from throughout the world.

Managing Microsoft Exchange Server Paul Robichaux, 1999 Targeted at medium-sized installations and up, Managing Microsoft Exchange Server addresses the difficult problems these users face: Internet integration, storage management, cost of ownership, system security, and performance management. Going beyond the basics, it provides hands on advice about what one needs to know after getting a site up and running and facing issues of growth, optimization, or recovery planning.

Translation of ICT for Education Towards a Knowledge Society Machunwangliu Kamei, 2016-06 The growing importance of knowledge, research, innovation and

evolving perspectives on expertise with the usage of Information Communication Technologies (ICT) are changing the sociology of knowledge in the globalized world. Universities are the major institutions involved in the production and dissemination of knowledge. This book looks at ICT for education initiatives taken up towards building a Knowledge Society as emphasized in national education policy regimes for encouraging knowledge generation, knowledge acquisition, knowledge diffusion and the exploitation of knowledge. The research examines the present practice of ICT adoption in an existing framework of University of Hyderabad (UOH) and Tezpur University (TZU) through intensive case study. The research attempts to analyze issues of knowledge, governance and access using ICT; the application of communication technologies in Higher Education Sector that helps in fulfilling the goal of a Knowledge Society; the communication process and strategies in the networking of higher education into a Knowledge Society; existing 'digital divide' and the implications. The Stakeholder's perspective further highlights the advantages and the challenges faced in the actual implementation of ICT4E. Based on the study, the research offers recommendations for management, human resources, processes and institutional culture in ICT4E implementation.
