Agneta Wallin Levinovitz,Nils Ringertz

The Nobel Prize Agneta Wallin Levinovitz, Nils Ringertz, 2001-08-14 The Nobel Prize, as founded in Alfred Nobel's will, was the first truly international prize. There is no other award with the same global scope and mission. The Nobel Prizes in Physics, Chemistry, Physiology or Medicine, Literature, Peace, and the Bank of Sweden Prize in Economic Sciences (from 1969) have not only captured the most significant contributions to the progress of mankind, they also constitute distinct markers of the major trends in their respective areas. The main reason for the prestige of the Prize today is, however, the lasting importance of the names on the list of Laureates and their contributions to human development. In celebration of the centennial of the Nobel Prize in 2001, this book offers a clear perspective on the development of human civilization over the past hundred years. The book serves to present the major trends and developments and also provide information about the life and philosophy of Alfred Nobel, the history of the Nobel Foundation, and the procedure for nominating and selecting Nobel Laureates. Contents: Introduction (M Sohlman) Life and Philosophy of Alfred Nobel (T Frängsmyr) The Nobel Foundation: A Century of Growth and Change (B Lemmel) Nomination and Selection of the Nobel Laureates (B Lemmel) The Nobel Prize in Physics (E B Karlsson) The Nobel Prize in Chemistry: The Development of Modern Chemistry (B G Malmström & B Andersson) The Nobel Prize in Physiology or Medicine (J Lindsten & N Ringertz) The Nobel Prize in Literature (K Espmark) The Nobel Peace Prize (G Lundestad) The Sveriges Riksbank (Bank of Sweden) Prize in Economic Sciences in Memory of Alfred Nobel 1969–2000 (A Lindbeck) Readership: General. Keywords: Reviews: "This wonderful book gives a comprehensive review of the Nobel prizes awarded since 1901 ... Reading the book is like reading a compressed history of humankind in the twentieth century. It shows how by and large the Nobel prizes have indeed tracked the epoch-making events in this turbulent century." M Veltman Nobel Laureate in Physics (1999), Emeritus Professor of Physics University of Michigan, Ann Arbor

The Nobel Prize Burton Feldman, 2000 Discusses the Nobel Institution in detail, telling about the award and its beginnings, what it means to win a Nobel Prize, the fields in which it is presented, who judges and how the prize is awarded, and more.

Nobel Prize Winners of the World Prateeksha M. Tiwari,2014-03-26 The Nobel Prize is awarded for achievements in physics, Chemistry, Medicine, and Literature and for Peace. The Nobel Prize is an international award given by the Nobel foundation in Stockholm, Sweden. In 1968, the prize in Economics was established in memory of Alfred Nobel, the founder of the Nobel Prize, Each Prize consists of medal, certificate of appreciation, and cash award. Founded in 1901 by the inventor of dynamite, Alfred Nobel, the Nobel Prize is the world's most celebrated honour. It grants its winners instant celebrity status and acclaim. It is very difficult to select the best out of best, because general perception is that a Nobel laureate is always the best in the concerned field. This book comprises brief biographies of many famous Nobel laureates. In last chapter, a list has been given that comprises the name of all the Nobel Prize winners in all six categories for the readers benefit. You would certainly find this book informative, inspiring and educative. It is a good reference book too.

Nobel Michael Worek,2010-06-03 The story of the winners of the world's most prestigious prize, now updated to include the 2009 recipients. The Nobel Prize is widely regarded as the most prestigious award one can receive. The Prize is administered by the Nobel Foundation, and the award ceremonies receive extensive media coverage. The awards are often politically controversial, and many winners use their acceptance speech to further favorite causes. Along with background information, the book provides a look at the 200 most famous and most interesting Nobel winners. The profiles are arranged by prize and by year. A photo or illustration appears with each profiled Laureate. Other illustrations help to explain complex subjects in science and make it easier for the reader to appreciate the accomplishments for which the prize has been awarded. A number of fascinating facts emerge from this lively account. For example, only 40 of the 829 Nobel Laureates have been women, among them Marie Curie, who won twice. Linus Pauling is the only person to have been awarded two Nobel Prizes in different categories, the 1954 Nobel Prize in Chemistry and the 1962 Nobel Peace Prize. The youngest Laureate is Lawrence Bragg, who was 25 years old when he received the Nobel Prize in Physics with his father in 1915. The oldest is Leonid Hurwicz, who was 90 years old when he received the 2007 Economics Prize. Two Laureates have declined the Nobel Prize: Jean-Paul Sartre, and Le Duc Tho. Other famous names include Ernest Hemingway, Albert Einstein, Albert Schweitzer, James Watson and Francis Crick, Paul Krugman, Charles Kao, Elizabeth Blackburn and Barack Obama. Nobel: A Century of Prize Winners is sure to find a readership among the millions who follow the awards each year and want to understand more about the most important prize in the world.

The Nobel Peace Prize Fredrik S. Heffermehl,2010-08-19 In this groundbreaking and controversial critique of the selections of Nobel Peace Prize winners, an eminent Norwegian lawyer and peace activist calls for its return to legal and moral compliance with the will of Alfred Nobel who wished to support disarmament to prevent war. The Nobel Peace Prize is the world's most coveted award, galvanizing the world's attention for 110 years. In

recent decades, it has also become the world's most reviled award, as heads of militarized states and out-and-out warmongers and terrorists have been showered with peace prizes. Delving into previously unpublished primary sources, Fredrik Heffermehl reveals the history of the inner workings of the Norwegian Nobel Committee as it has come under increasing political, geopolitical, and commercial pressures to make inappropriate awards. As a Norwegian lawyer, Heffermehl makes the case that the Norwegian politicians entrusted with the Nobel peace awards have brushed aside the legal requirements in Scandinavian estate law using the prize to promote their own political and personal interests instead of the peace ideas Alfred Nobel had in mind. Evaluating each of the 119 Nobel Peace Prizes awarded between 1901 and 2009, the author tracks the ever-widening divergence of the committee's selections from Nobel's intentions and concludes that all but one of the last ten prizes are illegitimate under the law.

The Nobel Prize Peter Wilhelm, 1983

Nobel Prize Winners in Physics Arun Agarwal, 2008 The book opens with the portrait of the man behind the awards: Alfred Bernhard Nobel and his biographical sketch. It gives an introduction to the Nobel foundation, prizes, selection of prize winners, and prize ceremonies. Nobel diplomas and Nobel Prize amounts are described in brief. In the end, a list of all 168 Nobel Prizewinners are given which includes the prize-awarding year and prize winning work. Also included is a short account of the laureates' life and work, followed by a historical and explanatory introduction to the particular discovery or achievement which gained him or her the prize.

The World's Most Prestigious Prize Geir Lundestad, 2019-07-26 The World's Most Prestigious Prize: The Inside Story of the Nobel Peace Prize is a fascinating, insider account of the Nobel Peace Prize. Drawing on unprecedented access to the Norwegian Nobel Institute's vast archive, it offers a gripping account of the founding of the prize, as well as its highs and lows, triumphs and disasters, over the last one-hundred-and-twenty years. But more than that, the book also draws on the author's unique insight during his twenty-five years as Director of the Norwegian Nobel Institute and Secretary of the Norwegian Nobel Committee. It reveals the real story of all the laureates of that period - some of them among the most controversial in the history of the prize (Gorbachev, Arafat, Peres and Rabin, Mandela and De Klerk, Obama, and Liu Xiaobo) - and exactly why they came to receive the prize. Despite all that has been written about the Nobel Peace Prize, this is the first-ever account written by a prominent insider in the Nobel system.

Peace, They Say Jay Nordlinger, 2012-03-20 In this book, Jay Nordlinger gives a history of what the subtitle claims is the "world's most famous and problematic award." The Nobel Peace Prize, like the other Nobel prizes, began in 1901. So we have a neat, sweeping history of the 20th century, and about a decade beyond. The Nobel prize involves a first world war, a second world war, a cold war, a terror war, and more. It contends with many of the key issues of modern times, and of life itself. It also presents a parade of interesting people—some 120 laureates, not a dullard in the bunch. Some of these laureates have been historic statesmen, such as Roosevelt (Teddy) and Mandela. Some have been heroes or saints, such as Martin Luther King and Mother Teresa. Some belong in other categories—where would you place Arafat? Controversies also swirl around the awards to Kissinger, Gorbachev, Gore, and Obama, to name just a handful. Probably no figure in this book is more interesting than a non-laureate: Alfred Nobel, the Swedish scientist and entrepreneur who started the prizes. The book also takes up many a person who did not win the peace prize, but might have, or should have: Gandhi? Peace, They Say is enlightening and enriching, and, here and there, fun. It has its opinions, but it also provides what is necessary for readers to form their own opinions. What is peace, anyway? All these people who have been crowned "champions of peace," and the world's foremost—should they have been? Such is the stuff this book is made on.

Nobel Prizes and Nature's Surprises Erling Norrby,2013-10-10 Each year the Nobel Prizes in the natural sciences reveal amazing discoveries. New milestones in the relentless advance of science are identified. The growth of knowledge and its evolution can be researched in the Nobel archives where nominations are kept secret for 50 years after the awards have been made. They represent a treasure for real-time assessment of science. Norrby's earlier book, *Nobel Prizes and Life Sciences* (2010) examined the unique archival records until 1959. The present book takes us up to 1962, surveying a range of dazzling discoveries. All prizes in immunology are reviewed. Their impact on our capacity to control infectious diseases and transplant organs are highlighted. The Nobel year 1962 is exceptional in recognizing the most major advance in biology since Darwin in 1859 presented his theory of evolution. This was the dramatic discovery of the double-helix structure of DNA by Watson and Crick in 1953. The era of molecular biology had begun. Its explosive development continues into the present. Contents:A Magician of Virology from AustraliaA Divided Nobel Prize and a New Era in ImmunologyMore Nobel Prizes in ImmunologyImmunity, Infections and TransplantationsTransgressing Borders in Science and Scenes of LifeMaking Sense of HearingUnraveling the Complexity of Protein Folding"It's So Beautiful, You See, So Beautiful"Coda Readership: General. Keywords:DNA;Nobel Prize;Life Science;Medical Discoveries;Molecular BiologyReviews: This book describes and explains one of the most important discoveries of the 20th century. It is a seminal work, that scholars of the History of Science will use to be able to understand how science evolves. Young scientists will find this book a valuable resource. Sir Aaron Klug Nobel laureate in Chemistry, 1982 Speculation about what happens in the selection of Nobel Prize winners is part of both the narrative and the 'gossip' of science. Interpreting what went on in the Nobel selection committees 50 years ago requires both an intimate understanding of how the process works and familiarity with subtleties of the Swedish language. Erling Norrby has the proper personal experiences to make such evaluations. In the present, his second, book he mainly reviews Medical Nobel awards during 1960 and 1962. Coming as it does near the beginnings of the modern medicine — recognizing exceptional advances in immunology and molecular biology — this is a fascinating era for those who are intrigued by the history of discovery. Peter C Doherty Nobel laureate in Physiology or Medicine, 1996 The moment the Nobel Foundation announces its Prizes in the sciences, decades of struggle and turmoil toward discovery enter the spotlight. To skillfully examine some of the most dramatic scientific advances in the middle of the twentieth century, Erling Norrby has reached deeply into the Nobel archives to examine firsthand how many of the most illustrious Prizes from that era came to be awarded. As a superb scientist, educator and administrator, Dr Norrby is able to tell these stories within the context of the scientific discoveries. Stanley B Prusiner Nobel laureate in Physiology or Medicine, 1997 "I particularly enjoyed Norrby's lengthy treatment of the 1962 chemistry prize — to James Watson, Francis Crick, and Maurice Wilkins, 1962 for their structural work on the structure of DNA ... This well-referenced and copiously illustrated book, featuring meditations, poetry, quotations, and miscellaneous musings, is a true labour of love. I heartily recommend it to anyone interested in the history of scientific discovery, the personalities of those who pursue it, and how it actually happens and is received." Chemistry & Industry

The Road to Stockholm István Hargittai,2003-08-28 The Nobel Prize is by far the highest recognition a scientist may receive and the only one with which the general public is familiar. Its prestige has reached improbable heights. At the same time a lot of myth surrounds the Nobel Prize, and this is compounded by the fact that people tend to view scientists with some bewilderment.This book introduces the process of selection of the laureates, discusses the ingredients for scientific discovery and for getting recognition. It reviews the decisive moments of scientific careers en route to the Nobel Prize, points to characteristic features of the laureates, the importance of mentors and venues in scientific careers and other components of success. It also covers some discoverers and discoveries for whom and for which the Nobel Prize never materialized.Whereas there is no general recipe

for receiving the Nobel Prize, there are common features of successful scientific careers. The book reveals some information about the scientists' lives and careers that may guide other scientists in increasing their chances of becoming more effective and better recognized players - although it is not expected to help anyone to receive the Nobel Prize! For the general reader *The Road to Stockholm* reveals the human face of scientists and the human side of their endeavours. The Nobel Prize has served as inspiration for scientists and the general public for a hundred years: this book discusses its problems and celebrates its triumphs.

The Nobel Peace Prize Ivar Libæk, Øivind Stenersen, Asle Sveen, 2012-06-16 THE NOBEL PEACE PRIZE was founded by the Swedish inventor and industrialist Alfred Bernhard Nobel (1833-1896). The prize has been awarded by the Norwegian Nobel Committee since 1901 and is regarded as the world's most prestigious award. NORWEGIAN HERITAGE is a series of books about our most important and best-known national icons. The respective titles introduce major personalities from the worlds of art and literature, science and sports, but also the many natural wonders of the country, as well as significant historical periods and cultural expressions. Each book offers an updated introduction to readers who wish to familiarize themselves with a given subject.

The Nobel Prize and the Formation of Contemporary World Literature Paul Tenngart, 2023-10-05 An exploration of the history, ambitions, and impact of the Nobel Prize in literature as it gained a central position in 20th-century global literary culture. Few scholars would deny that the Nobel Prize is the most prestigious literary award in the world. But what mechanisms made it possible for 18 Swedish intellectuals to become the world's most influential literary critics? Paul Tenngart argues that the Nobel Prize in literature has become a special kind of international canonization: exerted from a non-central, semi-peripheral position, the award sometimes confirms and reinforces hierarchical relations between literary languages and cultures, and sometimes disturbs established patterns of dominance and dependence. Drawing from a wide range of contemporary theories and methods, this multifaceted history of the Nobel Prize questions how the Swedish Academy has managed to keep the prize's global status through all the violent international crises of the last 120 years; how the selection of laureates shaped the idea of 'universal' literary values and defined literary quality across languages and cultures; and what impact the prize has had on the distribution and significance of particular works, literatures and languages. *The Nobel Prize and the Formation of Contemporary World Literature* explores the history and impact of the Nobel Prize in literature from the first award in 1901 through recent controversies involving Bob Dylan and #MeToo, arguing that the prize is a unique performative act that has been - and still is - central in our continual and collective construction of world literature.
