How to Win a Nobel Prize Barry Marshall,2018-04-02 Mary has always wanted to win a Nobel Prize. She loves running her own science experiments at home. But how can she become a real scientist and win the greatest prize of all? One day Mary stumbles on a secret meeting of Nobel Prize winners. Swearing her to secrecy, Professor Barry Marshall agrees to be her guide as she travels around the world and through time to learn the secrets behind some of the most fascinating and important scientific discoveries. They talk space and time with Albert Einstein, radiation with Marie Curie, DNA with Crick, Watson and Wilkins – and much more. Join Mary on her time-travel adventure – and do your own experiments along the way!

How to Win the Nobel Prize J. Michael BISHOP,2009-06-30 In 1989 Michael Bishop and Harold Varmus were awarded the Nobel Prize for their discovery that normal genes under certain conditions can cause cancer. In this book, Bishop tells us how he and Varmus made their momentous discovery. More than a lively account of the making of a brilliant scientist, *How to Win the Nobel Prize* is also a broader narrative combining two major and intertwined strands of medical history: the long and ongoing struggles to control infectious diseases and to find and attack the causes of cancer. Alongside his own story, that of a youthful humanist evolving into an ambivalent medical student, an accidental microbiologist, and finally a world-class researcher, Bishop gives us a fast-paced and engrossing tale of the microbe hunters. It is a narrative enlivened by vivid anecdotes about our deadliest microbial enemies--the Black Death, cholera, syphilis, tuberculosis, malaria, smallpox, HIV--and by biographical sketches of the scientists who led the fight against these scourges. Bishop then provides an introduction for nonscientists to the molecular underpinnings of cancer and concludes with an analysis of many of today's most important science-related controversies--ranging from stem cell research to the attack on evolution to scientific misconduct. *How to Win the Nobel Prize* affords us the pleasure of hearing about science from a brilliant practitioner who is a humanist at heart. Bishop's perspective will be valued by anyone interested in biomedical research and in the past, present, and future of the battle against cancer. Table of Contents: List of Illustrations Preface 1. The Phone Call 2. Accidental Scientist 3. People and Pestilence 4. Opening the Black Box of Cancer 5. Paradoxical Strife Notes Credits Index Reviews of this book: Despite his book's encouraging title, Bishop--who won a Nobel Prize in Physiology and Medicine in 1989--cautions that I have not written an instruction manual for pursuit of the prize. Instead, he has written an amiable reflection on the experience of being a Nobelist, intertwined with some history and anecdotes about the award, and balanced by a wide-ranging review of his own career as an accidental scientist...Along the way, Bishop reflects on the history of our knowledge of microbes, cancer, the politics of funding research and present-day disenchantment with science. His main purpose in writing this book, Bishop says, is to show that scientists are supremely human--which he does with grace and charm. --Publishers Weekly Reviews of this book: *How to Win the Nobel Prize* is typical Bishop: modest, funny, insightful and offering an extremely clear and brief explanation of the basic scientific achievement that won the 1989 Nobel Prize in physiology or medicine for himself and longtime colleague, Harold Varmus, now president of the Memorial Sloan-Kettering Cancer Center. --David Perlman, San Francisco Chronicle Reviews of this book: In these pages Bishop reveals himself as a good writer blessed with enviable clarity, someone sensible and levelheaded who likes people and is enamored of his science. --John Tyler Bonner, New York Times Book Review Reviews of this book: This is a treasure...Above all, *How to Win the Nobel Prize* is a civilised book and a lavishly rewarding one. --Roy Herbert, New Scientist Reviews of this book: At its heart this analysis of science and the scientific world is a jewel. *How to Win the Nobel Prize* is an inspirational book, full of careful analysis and judgement. --John Oxford, Times Higher Education Supplement Reviews of this book: Bishop is a gifted communicator and teacher, and he sets about his task of educating scientists and the public by describing his career in science and science politics...In the end, Bishop's book provides a road map for scientists and the public to build a robust scientific community that serves our society well. --Andreas Trumpp and Daniel Kalman, Nature Cell Biology J. Michael Bishop has written his book 'to show that scientists are supremely human.' The book is also a lucid explanation of how science has been harnessed to fight the human afflictions of cancer and infectious disease. And the story ends with a wide-ranging overview of today's challenges to the scientific enterprise. Overall, a must-read for all those interested in science and scientists--even those with absolutely no interest in winning a Nobel Prize! --Bruce Alberts, President, National Academy of Sciences J. Michael Bishop is that rare scientist who is widely read in literature and poetry. Most importantly, he remembers what he reads and thinks deeply about it, as well as about all else in his rich life. The Nobel Prize he won and richly deserved, his political activism, his understanding of cancer and microbiology, his devotion to the practice of science--all these provide fodder for his writerly craft. Quite a wonderful book! --David Baltimore, Nobel Laureate and President, California Institute of Technology

Peace, They Say Jay Nordlinger,2012-03-20 In this book, Jay Nordlinger gives a history of what the subtitle claims is the “world’s most famous and problematic award.” The Nobel Peace Prize, like the other Nobel prizes, began in 1901. So we have a neat, sweeping history of the 20th century, and about a decade beyond. The Nobel prize involves a first world war, a second world war, a cold war, a terror war, and more. It contends with many of the key issues of modern times, and of life itself. It also presents a parade of interesting people—some 120 laureates, not a dullard in the bunch. Some of these laureates have been historic statesmen, such as Roosevelt (Teddy) and Mandela. Some have been heroes or saints, such as Martin Luther King and Mother Teresa. Some belong in other categories—where would you place Arafat? Controversies also swirl around the awards to Kissinger, Gorbachev, Gore, and Obama, to name just a handful. Probably no figure in this book is more interesting than a non-laureate: Alfred Nobel, the Swedish scientist and entrepreneur who started the prizes. The book also takes up many a person who did not win the peace prize, but might have, or should have: Gandhi? *Peace, They Say* is enlightening and enriching, and, here and there, fun. It has its opinions, but it also provides what is necessary for readers to form their own opinions. What is peace, anyway? All these people who have been crowned “champions of peace,” and the world’s foremost—should they have been? Such is the stuff this book is made on.

Nobel Prize Women in Science Sharon Bertsch McGrayne, 2001-04-12 Since 1901 there have been over three hundred recipients of the Nobel Prize in the sciences. Only ten of them—about 3 percent—have been women. Why? In this updated version of *Nobel Prize Women in Science*, Sharon Bertsch McGrayne explores the reasons for this astonishing disparity by examining the lives and achievements of fifteen women scientists who either won a Nobel Prize or played a crucial role in a Nobel Prize - winning project. The book reveals the relentless discrimination these women faced both as students and as researchers. Their success was due to the fact that they were passionately in love with science. The book begins with Marie Curie, the first woman to win the Nobel Prize in physics. Readers are then introduced to Christiane Nusslein-Volhard, Emmy Noether, Lise Meitner, Barbara McClintock, Chien-Shiung Wu, and Rosalind Franklin. These and other remarkable women portrayed here struggled against gender discrimination, raised families, and became political and religious leaders. They were mountain climbers, musicians, seamstresses, and gourmet cooks. Above all, they were strong, joyful women in love with discovery. *Nobel Prize Women in Science* is a startling and revealing look into the history of science and the critical and inspiring role that women have played in the drama of scientific progress.

Women Nobel Peace Prize Winners, 2d ed. Anita Price Davis, Marla J. Selvidge, 2015-12-01 From the first woman Nobel Peace Prize recipient, Bertha von Suttner (1905), to the latest and youngest female Nobel laureate, Malala Yousafzai (2014), this book in its second edition provides a detailed look at the lives and accomplishments of each of these sixteen Prize winners. They did not expect recognition or fame for their work--economist Emily Greene Balch (1946) was surprised to learn that anyone knew about her. But they did not work in isolation: all met with discouragement, derision, threats or--in Yousafzai's case--attempted murder and exile. A history of the Prize and a biographical sketch of Alfred Nobel are included.

Nobel Peace Prize Winners VIKAS KHATRI, 2012-11-15 The Noble Peace Prize has been awarded 92 times to about 124 Noble Laureates between 1901 and 2011 - 99 times to individuals and around 23 times to organizations. It is awarded to those who have done the most or the best work for fraternity between nations, for the abolition or reduction of standing armies and for the holding and promotion of world peace. *Nobel Peace Prize Winners* contains an exhaustive list of about 100 Noble Laureates, their brief life histories, education, achievements, work towards human welfare and their invaluable contribution to bring global peace and harmony. Some of the well-known names included in this book are Jane Addams, Kofi Annan, Aung San Suu Kyi, Emily Greene Balch, Jimmy Carter, Michael Gorbachev, Dalai Lama, Nelson Mandela, Mother Teresa, Betty Williams, Woodrow Wilson, Barack Obama and many more. These eminent personalities have devoted their entire lives for the betterment and well-being of the human society, irrespective of cast, creed, colour, race or sex. They have brought fighting nations and people together, abolishing wars and war threats, advocating peace and brotherhood across the globe. In fact these people who strived hard and worked for a noble cause are always a source of inspiration for all of us especially the children and the youth. Read and learn from their lives works and achievement and try to adhere to their principles, bringing peace success happiness glory and fulfillment. #v&spublishers

The Nobel Peace Prize and the Laureates Anne C. Kjelling, 1994 The articles which are published in this volume investigate, on the basis of selected cases of mainly European winners of the Nobel Peace Prize, the meaning of the Prize and the award in the Prize winner's own countries. The case studies, which are mainly of a biographical nature, offer a varied picture with regard to the reactions of public opinion in the respective countries. They consent, however, in so far as the immediate impact of the award was only limited and of short duration.

Nobel Prize Winners in Physics Arun Agarwal, 2008 The book opens with the portrait of the man behind the awards: Alfred Bernhard Nobel and his biographical sketch. It gives an introduction to the Nobel foundation, prizes, selection of prize winners, and prize ceremonies. Nobel diplomas and Nobel Prize amounts are described in brief. In the end, a list of all 168 Nobel Prizewinners are given which includes the prize-awarding year and prize winning work. Also included is a short account of the laureates' life and work, followed by a historical and explanatory introduction to the particular discovery or achievement which gained him or her the prize.

A Life of Magic Chemistry George A. Olah, 2002-01-17 The fascinating autobiographical reflections of Nobel Prizewinner George Olah How did a young man who grew up in Hungary between the two World Wars go from cleaning rubble and moving pianos at the end of World War II in the Budapest Opera House to winning the Nobel Prize in Chemistry? George Olah takes us on a remarkable journey from Budapest to Cleveland to Los Angeles—with a stopover in Stockholm, of course. An innovative scientist,

George Olah is truly one of a kind, whose amazing research into extremely strong acids and their new chemistry yielded what is now commonly known as superacidic magic acid chemistry. A Life of Magic Chemistry is an intimate look at the many journeys that George Olah has traveled—from his early research and teaching in Hungary, to his move to North America where, during his years in industry, he continued his study of the elusive cations of carbon, to his return to academia in Cleveland, and, finally, his move to Los Angeles, where he built the Loker Hydrocarbon Research Institute to find new solutions to the grave problem of the world's diminishing natural oil and gas resources and to mitigate global warming by recycling carbon dioxide into hydrocarbon fuels and products. Professor Olah invites the reader to enjoy the story of his remarkable path—marked by hard work, imagination, and never-ending quests for discovery—which eventually led to the Nobel Prize. Intertwining his research and teaching with a unique personal writing style truly makes A Life of Magic Chemistry an engaging read. His autobiography not only touches on his exhilarating life and pursuit for new chemistry but also reflects on the broader meaning of science in our perpetual search for understanding and knowledge.

The Beginner's Guide to Winning the Nobel Prize Peter Doherty, 2006 In *The Beginner's Guide to Winning the Nobel Prize*, Doherty recounts his unlikely path to becoming a Nobel Laureate. Beginning with his humble origins in Australia, he tells how he developed an interest in immunology and describes his award-winning, influential work with Rolf Zinkernagel on T-cells and the nature of immune defense. In prose that is at turns amusing and astute, Doherty reveals how his nonconformist upbringing, sense of being an outsider, and search for different perspectives have shaped his life and work. Doherty offers a rare, insider's look at the realities of being a research scientist. He lucidly explains his own scientific work and how research projects are selected, funded, and organized; the major problems science is trying to solve; and the rewards and pitfalls of a career in scientific research. For Doherty, science still plays an important role in improving the world, and he argues that scientists need to do a better job of making their work more accessible to the public. Throughout the book, Doherty explores the stories of past Nobel winners and considers some of the crucial scientific debates of our time, including the safety of genetically modified foods and the tensions between science and religion. He concludes with some tips on how to win a Nobel Prize, including advice on being persistent, generous, and culturally aware, and he stresses the value of evidence. *The Beginner's Guide to Winning the Nobel Prize* is essential reading for anyone interested in a career in science.

Nobel Prizes that Changed Medicine Gilbert Thompson, 2012 This book brings together in one volume fifteen Nobel Prize-winning discoveries that have had the greatest impact upon medical science and the practice of medicine during the 20th century and up to the present time. Its overall aim is to enlighten, entertain and stimulate. This is especially so for those who are involved in or contemplating a career in medical research. Anyone interested in the particulars of a specific award or Laureate can obtain detailed information on the topic by accessing the Nobel Foundation's website. In contrast, this book aims to provide a less formal and more personal view of the science and scientists involved, by having prominent academics write a chapter each about a Nobel Prize-winning discovery in their own areas of interest and expertise.

How to Win the Nobel Prize in Literature David Carter, 2013-03-28 With humor, wit, and insight, David Carter sets out a number of fail-safe rules to follow in order to win the Nobel Prize in literature. There are acclaimed writers—James Joyce, Marcel Proust, Tolstoy, Mark Twain—who never won the Nobel Prize, and others, less well known, such as Henryk Sienkiewicz, Paul Heyse, and Romain Rolland, who did. What exactly does one have to do to impress, or be snubbed by, the Nobel Committee? This book is a fascinating survey of the Nobel Prize for literature, constructed as a tongue-in-cheek series of rules. Be a man is one of them, and Make sure your best work has been translated into Swedish another. Presenting biographical information as well as extracts from their work, David Carter will try to answer a number of questions about the prize, such as What are the outstanding qualities of the winners' works? Were there any unusual circumstances attending the award? and Who else was considered and rejected and why?
