Alice Munro

The View from Castle Rock Alice Munro, 2006-11-07 WINNER OF THE NOBEL PRIZE® IN LITERATURE 2013 Alice Munro mines her rich family background, melding it with her own experiences and the transforming power of her brilliant imagination, to create perhaps her most powerful and personal collection yet. A young boy, taken to Edinburgh's Castle Rock to look across the sea to America, catches a glimpse of his father's dream. Scottish immigrants experience love and loss on a journey that leads them to rural Ontario. Wives, mothers, fathers, and children move through uncertainty, ambivalence, and contemplation in these stories of hopes, adversity, and wonder. The View from Castle Rock reveals what is most essential in Munro's art: her compassionate understanding of ordinary lives.

Nobel Prize Winners of the World Prateeksha M. Tiwari, 2014-03-26 The Nobel Prize is awarded for achievements in physics, Chemistry, Medicine, and Literature and for Peace. The Nobel Prize is an international award given by the Nobel foundation in Stockholm, Sweden. In 1968, the prize in Economics was established in memory of Alfred Nobel, the founder of the Nobel Prize. Each Prize consists of medal, certificate of appreciation, and cash award. Founded in 1901 by the inventor of dynamite, Alfred Nobel, the Nobel Prize is the world's most celebrated honour. It grants its winners instant celebrity status and acclaim. It is very difficult to select the best out of best, because general perception is that a Nobel laureate is always the best in the concerned field. This book comprises brief biographies of many famous Nobel laureates. In last chapter, a list has been given that comprises the name of all the Nobel Prize winners in all six categories for the readers benefit. You would certainly find this book informative, inspiring and educative. It is a good reference book too.

100 Years of Nobel Prizes Baruch Aba Shalev, 2002 Winning a Nobel Prize is unquestionably the highest possible recognition of intellectual and personal achievement. This book provides a detailed statistical analysis of what is required to win a Nobel, why it sometimes takes a long time to collect the award, and what the prizes have meant to human progress.

Nobel Michael Worek, 2010-06-03 The story of the winners of the world's most prestigious prize, now updated to include the 2009 recipients. The Nobel Prize is widely regarded as the most prestigious award one can receive. The Prize is administered by the Nobel Foundation, and the award ceremonies receive extensive media coverage. The awards are often politically controversial, and many winners use their acceptance speech to further favorite causes. Along with background information, the book provides a look at the 200 most famous and most interesting Nobel winners. The profiles are arranged by prize and by year. A photo or illustration appears with each profiled Laureate. Other illustrations help to explain complex subjects in science and make it easier for the reader to appreciate the accomplishments for which the prize has been awarded. A number of fascinating facts emerge from this lively account. For example, only 40 of the 829 Nobel Laureates have been women, among them Marie Curie, who won twice. Linus Pauling is the only person to have been awarded two Nobel Prizes in different categories, the 1954 Nobel Prize in Chemistry and the 1962 Nobel Peace Prize. The youngest Laureate is Lawrence Bragg, who was 25 years old when he received the Nobel Prize in Physics with his father in 1915. The oldest is Leonid Hurwicz, who

was 90 years old when he received the 2007 Economics Prize. Two Laureates have declined the Nobel Prize: Jean-Paul Sartre, and Le Duc Tho. Other famous names include Ernest Hemingway, Albert Einstein, Albert Schweitzer, James Watson and Francis Crick, Paul Krugman, Charles Kao, Elizabeth Blackburn and Barack Obama. Nobel: A Century of Prize Winners is sure to find a readership among the millions who follow the awards each year and want to understand more about the most important prize in the world.

The Beginner's Guide to Winning the Nobel Prize Peter Doherty, 2006 In *The Beginner's Guide to Winning the Nobel Prize*, Doherty recounts his unlikely path to becoming a Nobel Laureate. Beginning with his humble origins in Australia, he tells how he developed an interest in immunology and describes his award-winning, influential work with Rolf Zinkernagel on T-cells and the nature of immune defense. In prose that is at turns amusing and astute, Doherty reveals how his nonconformist upbringing, sense of being an outsider, and search for different perspectives have shaped his life and work. Doherty offers a rare, insider's look at the realities of being a research scientist. He lucidly explains his own scientific work and how research projects are selected, funded, and organized; the major problems science is trying to solve; and the rewards and pitfalls of a career in scientific research. For Doherty, science still plays an important role in improving the world, and he argues that scientists need to do a better job of making their work more accessible to the public. Throughout the book, Doherty explores the stories of past Nobel winners and considers some of the crucial scientific debates of our time, including the safety of genetically modified foods and the tensions between science and religion. He concludes with some tips on how to win a Nobel Prize, including advice on being persistent, generous, and culturally aware, and he stresses the value of evidence. *The Beginner's Guide to Winning the Noble Prize* is essential reading for anyone interested in a career in science.

Nobel Prizes and Life Sciences Erling Norrby, 2010 The Nobel Prizes in natural sciences have achieved the reputation of being the ultimate accolade for scientific achievements. This book gives a unique insight into the selection of Nobel Prize recipients, in particular the life sciences. The evolving mechanisms of selection of prize recipients are illustrated by reference to archives, which have remained secret for 50 years. Many of the prizes subjected to particular evaluation concern awards given for discoveries in the field of infectious diseases and the interconnected field of genetics. The book illustrates the individuals and environments that are conducive to scientific creativity. Nowhere is this enigmatic activity-- the mime mover in advancing the human condition highlighted as lucidly as by identification individuals worthy of Nobel Prizes. --Book Jacket.

Women Nobel Peace Prize Winners, 2d ed. Anita Price Davis, Marla J. Selvidge, 2015-12-01 From the first woman Nobel Peace Prize recipient, Bertha von Suttner (1905), to the latest and youngest female Nobel laureate, Malala Yousafzai (2014), this book in its second edition provides a detailed look at the lives and accomplishments of each of these sixteen Prize winners. They did not expect recognition or fame for their work--economist Emily

Greene Balch (1946) was surprised to learn that anyone knew about her. But they did not work in isolation: all met with discouragement, derision, threats or--in Yousafazi's case--attempted murder and exile. A history of the Prize and a biographical sketch of Alfred Nobel are included.

How to Win the Nobel Prize in Literature David Carter, 2013-03-28 With humor, wit, and insight, David Carter sets out a number of fail-safe rules to follow in order to win the Nobel Prize in literature. There are acclaimed writers-- James Joyce, Marcel Proust, Tolstoy, Mark Twain-- who never won the Nobel Prize, and others, less well known, such as Henryk Sienkiewicz, Paul Heyse, and Romain Rolland, who did. What exactly does one have to do to impress, or be snubbed by, the Nobel Committee? This book is a fascinating survey of the Nobel Prize for literature, constructed as a tongue-in-cheek series of rules. Be a man is one of them, and Make sure your best work has been translated into Swedish another. Presenting biographical information as well as extracts from their work, David Carter will try to answer a number of questions about the prize, such as What are the outstanding qualities of the winners' works? Were there any unusual circumstances attending the award? and Who else was considered and rejected and why?

The Nobel Prize Agneta Wallin Levinovitz, Nils Ringertz, 2001 This wonderful book gives a comprehensive review of the Nobel prizes awarded since 1901. Reading the book is like reading a compressed history of humankind in the twentieth century. It shows how by and large the Nobel prizes have indeed tracked the epoch-making events in this turbulent century. M Veltman Nobel Laureate in Physics (1999) Emeritus Professor of Physics University of Michigan, Ann Arbor

Peace, They Say Jay Nordlinger, 2012-03-20 In this book, Jay Nordlinger gives a history of what the subtitle claims is the "world's most famous and problematic award." The Nobel Peace Prize, like the other Nobel prizes, began in 1901. So we have a neat, sweeping history of the 20th century, and about a decade beyond. The Nobel prize involves a first world war, a second world war, a cold war, a terror war, and more. It contends with many of the key issues of modern times, and of life itself. It also presents a parade of interesting people--some 120 laureates, not a dullard in the bunch. Some of these laureates have been historic statesmen, such as Roosevelt (Teddy) and Mandela. Some have been heroes or saints, such as Martin Luther King and Mother Teresa. Some belong in other categories--where would you place Arafat? Controversies also swirl around the awards to Kissinger, Gorbachev, Gore, and Obama, to name just a handful. Probably no figure in this book is more interesting than a non-laureate: Alfred Nobel, the Swedish scientist and entrepreneur who started the prizes. The book also takes up many a person who did not win the peace prize, but might have, or should have: Gandhi? Peace, They Say is enlightening and enriching, and, here and there, fun. It has its opinions, but it also provides what is necessary for readers to form their own opinions. What is peace, anyway? All these people who have been crowned "champions of peace," and the world's foremost--should they have been? Such is the stuff this book is made on.

Nobel Prize Women in Science Sharon Bertsch McGrayne, 2001-04-12 Since 1901 there have been over three hundred

recipients of the Nobel Prize in the sciences. Only ten of them—about 3 percent—have been women. Why? In this updated version of *Nobel Prize Women in Science*, Sharon Bertsch McGrayne explores the reasons for this astonishing disparity by examining the lives and achievements of fifteen women scientists who either won a Nobel Prize or played a crucial role in a Nobel Prize - winning project. The book reveals the relentless discrimination these women faced both as students and as researchers. Their success was due to the fact that they were passionately in love with science. The book begins with Marie Curie, the first woman to win the Nobel Prize in physics. Readers are then introduced to Christiane Nusslein-Volhard, Emmy Noether, Lise Meitner, Barbara McClintock, Chien-Shiung Wu, and Rosalind Franklin. These and other remarkable women portrayed here struggled against gender discrimination, raised families, and became political and religious leaders. They were mountain climbers, musicians, seamstresses, and gourmet cooks. Above all, they were strong, joyful women in love with discovery. *Nobel Prize Women in Science* is a startling and revealing look into the history of science and the critical and inspiring role that women have played in the drama of scientific progress.

Nobel Prizes that Changed Medicine Gilbert Thompson, 2012 This book brings together in one volume fifteen Nobel Prize-winning discoveries that have had the greatest impact upon medical science and the practice of medicine during the 20th century and up to the present time. Its overall aim is to enlighten, entertain and stimulate. This is especially so for those who are involved in or contemplating a career in medical research. Anyone interested in the particulars of a specific award or Laureate can obtain detailed information on the topic by accessing the Nobel Foundation's website. In contrast, this book aims to provide a less formal and more personal view of the science and scientists involved, by having prominent academics write a chapter each about a Nobel Prize-winning discovery in their own areas of interest and expertise.

Alfred Nobel Kathy-jo Wargin, 2011-09-01 Almost everyone has heard of the Nobel Prize, a collection of prizes awarded for accomplishments in science, medicine, literature, and peace. But few people know about the man who established the award and for whom it is named, Alfred Nobel. Alfred Nobel was born in Sweden in 1833. A quick and curious mind, combined with a love of science and chemistry, drove him to invent numerous technological devices throughout his long life. But he is perhaps most well known for his invention of dynamite. Intending it to help safely advance road and bridge construction, Nobel saw his most famous invention used in the development of military weaponry. After a newspaper headline mistakenly announces his death, Nobel was inspired to leave a legacy of another sort. *The Man Behind the Peace Prize* tells the story of the enduring legacy of Alfred Nobel. Kathy-jo Wargin is the bestselling author of more than 30 books for children. Among her many awards for her work are an International Reading Association Children's Choice Award for *The Legend of the Loon* and an IRA Teachers' Choice Award for *Win One for the Gipper*. She lives in the Great Lakes area. Zachary Pullen's character-oriented picture book illustrations have won awards and garnered starred reviews. He has been honored several times with acceptance into the prestigious Society of Illustrators juried shows and Communication Arts Illustration Annual of the best

in current illustration. Zachary lives in Wyoming.

Neighbouring Nobel Henry Nielsen, Keld Nielsen, 2001 To commemorate the centennial of the Nobel Prize in 2001, and in the light of recent, critical Nobel research, this volume provides an historical analysis of the work, the people, and the stories behind the thirteen Nobel Prizes awarded to Danes so far. This represents the first time that the Nobel population of a single country has been treated in depth as a unit. Danes have been awarded all five of the 'classic' Nobel Prizes: one Peace Prize, three Literature, three Physics, one Chemistry, and five Physiology or Medicine Prizes. Although only one recipient is internationally famous -- Niels Bohr, who won the Prize in 1922 for his application of quantum ideas to atomic structure -- the more obscure laureates are of interest precisely because they are obscure. Why were they selected? Who were they up against? How was the news about their prize received by colleagues abroad? Did the honor help or hinder their subsequent careers? Prior to 1974, all deliberations behind the awarding of the Prize were strictly confidential. In that year, the Nobel Foundation granted access to the archives relating to prizes more than fifty years old, and this now applies to nine of the Danish prizes. With regard to these prizes, the book explores what went on behind the scenes -- who nominated the laureates, how their achievements were assessed, and what role politics may have played. On the four more recent prizes, the authors interviewed the laureates about the work the Prize rewarded and the Prize's personal and professional aftermath. Before this book, such questions were impossible to answer, since nothing had been written about the circumstances that led to any of the Danish prizes, nor about how any of the thirteen laureates felt about receiving the most prestigious validation possible for a person's work. *Neighbouring Nobel* will be a valuable addition both to the literature on the Nobel Prize and to the study of 20th century Danish history.

Brave Genius Sean B. Carroll, 2014-09-23 The never-before-told account of the intersection of some of the most insightful minds of the 20th century, and a fascinating look at how war, resistance, and friendship can catalyze genius. In the spring of 1940, the aspiring but unknown writer Albert Camus and budding scientist Jacques Monod were quietly pursuing ordinary, separate lives in Paris. After the German invasion and occupation of France, each joined the Resistance to help liberate the country from the Nazis and ascended to prominent, dangerous roles. After the war and through twists of circumstance, they became friends, and through their passionate determination and rare talent they emerged as leading voices of modern literature and biology, each receiving the Nobel Prize in their respective fields. Drawing upon a wealth of previously unpublished and unknown material gathered over several years of research, *Brave Genius* tells the story of how each man endured the most terrible episode of the twentieth century and then blossomed into extraordinarily creative and engaged individuals. It is a story of the transformation of ordinary lives into exceptional lives by extraordinary events--of courage in the face of overwhelming adversity, the flowering of creative genius, deep friendship, and of profound concern for and insight into the human condition.

The Nobel Prize Burton Feldman, 2000 Discusses the Nobel Institution in detail, telling about the award and its

beginnings, what it means to win a Nobel Prize, the fields in which it is presented, who judges and how the prize is awarded, and more.

 web this is really delightful piece
 the opening has a wistful quality
 with a lush melody rising and
 falling over a flowing accompaniment
 the rag trips along with spritely
 semiquavers outlining the familiar
 rhythms it s really cheeky there s
 plenty to advance an intermediate
 player here plus it would make a
 great encore
