Para lograr esto, una de las competencias más importantes a desarrollar es la evaluación del estado nutricional y el establecimiento de un diagnóstico claro. Esta obra transita por los aspectos generales de este proceso de evaluación, donde se incluyen antecedentes relacionados con la alimentación, antropometría, exámenes físicos y datos bioquímicos, entre otros. Es una herramienta útil, didáctica y de consulta que brinda la información y las prácticas necesarias para dominar las particularidades de la evaluación nutricional.

Contenidos y formas en la vanguardia universitaria Emma Camarero Calandria, 2015-06-26 Anochece ya en el mes de abril y nos convoca un propósito: compartir las investigaciones que hemos venido realizando en el último año en nuestras áreas de trabajo. Estas líneas describen (o intentan describir) la experiencia en América Latina, un pedazo del planeta en el que parecen confluir esperanzas y desatinos por igual. ¿Qué investigan en Latinoamérica?, ¿Cuáles son sus objetos de estudio?, ¿Cómo lo hacen? ¿Son los mismos objetos de estudio que los abrazados por investigadores de otras latitudes? El último informe publicado por Human Rights Watch en el pasado año hacía una terrible descripción del rosario de desencuentros con los que tenemos que convivir a diario desde este lado del charco. En Bolivia por ejemplo, se cuentan en más de 140 los homicidios asociados a violencia de género sólo en el último año. En Argentina, el cerco cada vez más estrecho y castrante define como “sicarios mediáticos” a quienes adversan al gobierno y de “balas de tinta” las denuncias que aún pueden hacerse en las páginas de los diarios. En Colombia sólo en el último año se encontraron más de 5.000.000 millones de desplazados a causa de la guerrilla y el narcotráfico. En México, en el mismo período se calcularon en más de 26.000 los desaparecidos por diversas e injustificadas razones y en el final del abecedario la pequeña Venecia, está herida en todos sus costados por la inflación más alta del mundo, un desabastecimiento que hace de la compra de lo necesario para alimentar una

familia, un rally de mal gusto, enfermarse es un lujo que sólo los más afortunados pueden darse, cárceles colapsadas, 1462 menores con medidas cautelares, 138 privados de libertad, más de 2636 detenidos, por levantar su voz contra la oscuridad que los cubre, todo esto ya en el 2014. Sólo en un fin de semana, y deteniéndonos sólo en la capital mueren más de 72 personas a manos de la delincuencia, ingresando a una atiborrada morgue que no se da abasto...

Enformasyon Savaşından Dezenformasyon Savaşına - Toplumlar Arası İletişimde Yeni Dönem Fahrettin Altun,1905-07-15 Gelişen teknoloji ve dijitalleşme bilgiye ulaşmayı çok kolaylaştırdı. Ancak bu kolaylık beraberinde başka kavramları hayatımıza soktu: Dezenformasyon, post-truth, manipülasyon, infobezite, mezenformasyon ve infodemi gibi kavramları daha sık duyar olduk. Gazete, dergi, televizyon ve filmlerin yanında artık sosyal medya ve dijital medya platformları da bizim tüketim alışkanlıklarımızı değiştirmeye, siyasi tercihlerimizi yönlendirmeye kısaca bütün hayatımızı şekillendirmeye çalışıyorlar. Büyük küresel şirketlerin ya da devletlerin kontrolü altındaki bu platformların talepleriyle başa çıkmak her zamankinden daha zor. Geniş kitleleri etkilemek için büyük bir yarış sürerken bu platformların kendi aralarındaki kıyasıya rekabet ve iktidar mücadelesi de devam ediyor. Elinizdeki kitap sosyal medyadan Hollywood'a, Netflix'ten Batı medyasına, dijital diplomasiden yapay zekaya kadar maruz kaldığımız bilgi bombardımanını ele alıyor. Analiz ettiği veriler ve gösterdiği örneklerle bizleri uyanık olmaya davet ediyor. Her ne kadar bu, akıntıya kürek çekmeye benzese de... Nutrition, Well-Being and Health Jaouad Bouayed, Torsten Bohn, 2012-02-23 In our modern society, expectations are high, also with respect to our daily diet. In addition to being merely nutritious, i.e. supplying a variety of essential nutrients, including macro-nutrients such as proteins or micro-nutrients such as minerals and vitamins, it is almost expected that a good diet offers further advantages - especially well-being and health and the prevention of chronic diseases, which are, as we generally tend to grow older and older, becoming a burden to enjoying private life and to the entire society. These additional qualities are often sought in diets rich also in non-nutritive components, such as phytochemicals. In contrast to drugs, which are taken especially to cure or ameliorate diseases, it is expected that a healthy diet acts in particular on the side of prevention, allowing us to become old without feeling old. In the present book, rather than trying to give an exhaustive overview on nutritional aspects and their link to well-being and health, selected topics have been chosen, intended to address presently discussed key issues of nutrition for health, presenting a reasonable selection of the manifold topics around diet, well-being, and health: from the antioxidants polyphenols and carotenoids, aroma-active terpenoids, to calcium for bone health, back to traditional Chinese Medicine.

Theories of Globalization Barrie Axford, 2014-01-09 Theories of Globalization offers students and scholars a comprehensive and critical introduction to the concept of globalization. Barrie Axford expertly guides readers through the full range of perspectives on the topic, from international political economy to geography, global anthropology to cultural and communication studies. In so doing he draws out the common threads between competing theories, as well as pinpointing the problems that challenge our understanding of globalization. Key terms such as 'globalism' and 'globality' are carefully explained and central themes like capitalism, governance, culture and history explored in full. In assessing the contribution made by globalization theory, Axford's account also sheds new light on several crucial current issues. These range from the changing shape of democracy and citizen engagement with governance, to issues surrounding 'just war' and humane intervention, and problems relating to empire and post-colonialism. This wide-ranging and detailed new book will be essential reading for students and scholars of international politics, sociology and any area where the concept of globalization is discussed and disputed.

Guiding Principles for Developing Dietary Reference Intakes Based on Chronic Disease National Academies of

Sciences, Engineering, and Medicine, Health and Medicine Division, Food and Nutrition Board, Committee on the Development of Guiding Principles for the Inclusion of Chronic Disease Endpoints in Future Dietary Reference Intakes, 2017-12-21 Since 1938 and 1941, nutrient intake recommendations have been issued to the public in Canada and the United States, respectively. Currently defined as the Dietary Reference Intakes (DRIs), these values are a set of standards established by consensus committees under the National Academies of Sciences, Engineering, and Medicine and used for planning and assessing diets of apparently healthy individuals and groups. In 2015, a multidisciplinary working group sponsored by the Canadian and U.S. government DRI steering committees convened to identify key scientific challenges encountered in the use of chronic disease endpoints to establish DRI values. Their report, Options for Basing Dietary Reference Intakes (DRIs) on Chronic Disease: Report from a Joint US-/Canadian-Sponsored Working Group, outlined and proposed ways to address conceptual and methodological challenges related to the work of future DRI Committees. This report assesses the options presented in the previous report and determines guiding principles for including chronic disease endpoints for food substances that will be used by future National Academies committees in establishing DRIs.

Dietary reference values for energy Scientific Advisory Committee on Nutrition, 2012-05-02 Dietary reference values (DRVs) for energy are based on estimating the total energy expenditure (TEE) for groups of people. TEE provides a measure of the energy requirement at energy balance i.e. when energy intake matches energy expenditure. The methodology to measure TEE – the doubly labelled water (DLW) method – has advanced and as a result, the evidence base on TEE in a wide variety of population groups has expanded considerably. With the high levels of overweight and obesity currently seen in the UK and the wealth of new data now available, it was considered timely for the Scientific Advisory Committee on Nutrition (SACN) to review recommendations for the UK population. This report details the evidence and approaches SACN have considered in order to update the DRVs for energy. SACN chose a prescriptive approach to estimating energy reference values; suitable reference body weight ranges consistent with long-term good health were used to calculate energy reference values. Thus, basal metabolic rate (BMR) values were predicted using healthy reference body weights. Using this approach, if overweight groups consume the amount of energy recommended for healthy weight groups, they are likely to lose weight, whereas underweight sections of the population should gain weight towards the healthy body weight range. SACN has derived new energy reference values. For most population groups, except for infants and young children, the values have increased. DRVs should be used to assess the energy requirements for large groups of people and populations, but should not be applied to individuals due to the large variation in physical activity and energy expenditure observed between people.
