Social Media and Politics in Turkey Erkan Saka,2019-11-20 This book focuses on media and zeroes in some critical and oppositional aspects of internet usage within Turkey. It does not radically challenge some works on Turkey's recent grand narrative but presents empirical and minor accounts to this. However, in elaborating the long history of relatively resilient and multilayered oppositional digital media networks in Turkey, this book insists that an idea of authoritarian turn may be misleading as the internet communications are exposed to repressive measures and surveillance tactics from the very beginning of the country's recent past. While discussing from citizen journalism practices to political trolls and from Gezi Park protests to disinformation campaigns, this book pays tribute to digital activists and points out that mobilizing through digital networks can present glimmers of hope in challenging authoritarian regimes.

The Transformation of the Media System in Turkey Eylem Yanardağoglu,2021-12-02 The book focuses on the changes that the media system in Turkey went through since early 2000s. Its perspective considers sociology of citizenship and focuses on processes such as Europeanization, de-Europeanization, authoritarianism on the one hand and implications of digitalization and convergence on the other. It tracks the transformation of the media system through the trajectories of normative, participative, and entrepreneurial citizenship practices. The final sections focus on aspects of convergence evidenced in bottom-up and participatory forms of digital media such as the birth of citizen journalism and fact-checkers after the demise of conventional mainstream media in recent years.

Especially after the 2000s, Turkey has become a success story in every aspect of the social, political, and economic spectrums. As a result of the pace of the developments, academic studies fall behind Turkey in analysing and evaluating the changes it has encountered. Literature focusing on Turkey continuously needs rapid updating to fulfill the a ...

The Routledge Companion to Global Internet Histories Gerard Goggin,Mark McLelland,2017-02-17 The Routledge Companion to Global Internet Histories brings together research on the diverse Internet histories that have evolved in different regions, language cultures and social contexts across the globe. While the Internet is now in its fifth decade, the understanding and formulation of its histories outside of an anglophone framework is still very much in its infancy. From Tunisia to Taiwan, this volume emphasizes the importance of understanding and formulating Internet histories outside of the anglophone case studies and theoretical paradigms that have thus far dominated academic scholarship on Internet history. Interdisciplinary in scope, the collection offers a variety of historical lenses on the development of the Internet: as a new communication technology seen in the context of older technologies; as a new form of sociality read alongside previous technologically mediated means of relating; and as a new media vehicle for the communication of content.

Twitter and Tear Gas Zeynep Tufekci,2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.
