Lunar Meteoroid Impacts and How to Observe Them Brian Cudnik,2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938. In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefied lunar atmosphere. The paper suggested the possibility of systematic searches for such possible lunar meteors. With these concepts in mind, I was surprised to note a transient moving bright speck on the Moon on July 10, 1941. It appeared to behave very much as a lunar meteor would - except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity. Thus, the idea of systematic searches for both possible lunar meteors and meteoritic impact fashes was born. It was appreciated that much time might need to be expended to achieve any positive results. Systematic searches were carried out by others and myself chiefly in the years 1945-1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers, or ALPO.

Digital Copyright Simon Stokes, 2019-01-24 The first edition of this book in 2002 was the first UK text to examine digital copyright together with related areas such as performers' rights, moral rights, database rights and competition law as a subject in its own right. Now in its fifth edition, the book has been substantially updated and revised to take account of legal and policy developments in copyright law and related areas, the new UK copyright exceptions, recent CJEU cases, the regulation of Collective Management Organisations, orphan works, and developments in EU copyright legislation and the EU's Digital Single Market Strategy. It also contains new sections on big data and data mining, the impact of artificial intelligence and blockchain on copyright, and the future for UK copyright after Brexit. The book helps put digital copyright law and policy into perspective and

provides practical guidance for those creating or exploiting digital content or technology, whether in academia, the software, information, publishing and creative industries, or other areas of the economy. The focus of Digital Copyright is on the specifics of the law in this area together with practical aspects. Both academics and practitioners will find the book an invaluable guide to this ever-expanding field of law. Review of Previous Edition: 'Overall, Digital Copyright is well worth the relatively modest price for a book that will be stimulating for anyone who has to think about copyright in the digital realm.' Francis Davey, Journal of Intellectual Property Law and Practice

The Big Humanities Richard J. Lane, 2016-11-25 This book provides an accessible introduction to, and overview of, the digital humanities, one of the fastest growing areas of literary studies. Lane takes a unique approach by focusing on the technologies and the new environment in which the digital humanities largely takes place: the digital laboratory. The book provides a brief history of DH, explores and explains the methodologies of past and current DH projects, and offers resources such as detailed case studies and bibliographies. Further, the focus on the digital laboratory space reveals affiliations with the types of research that have traditionally taken place in the sciences, as well as convergences with other fast-growing research spaces, namely innovation labs, fabrication labs, maker spaces, digital media labs, and change labs. The volume highlights the profound transformation of literary studies that is underway, one in which the adoption of powerful technology – and concomitantly being situated within a laboratory environment – is leading to an important re-engagement in the arts and humanities, and a renewed understanding of literary studies in the digital age, as well as a return to large-scale financial investment in humanistic research. It will be useful to students and teachers, as well as administrators and managers in

charge of research infrastructure and funding decisions who need an accessible overview of this technological transformation in the humanities. Combining useful detail and an overview of the field, the book will offers accessible entry into this rapidly growing field.
