Football and Supporter Activism in Europe Borja García,Jinming Zheng,2017-09-12 This book is the first to explore and compare football governance, fandom culture and supporter engagement in Europe. With a specific focus on supporter activism and campaigning, the collection provides a

comparative study of several European countries. The authors argue that supporters, despite being the pillar or the 'lifeblood' of their club, see their role in football governance marginalised. The volume is unique in that it challenges the widely accepted assumption that membership football clubs encourage the democratic participation of supporters. Covering football fandom in both the traditional 'big five' leagues and non-'big five' countries such as Portugal, Turkey, Croatia, Poland and Czech Republic, the volume will be of interest to students and scholars across a range of disciplines, including sociology, history, sport management, sport governance and political science.

New Ethnographies of Football in Europe Alexandra Schwell, Micha? Buchowski, Malgorzata Kowalska, Nina Szogs, 2016-04-29 Football has emerged as an important symbolic field through which various social, cultural, political, economic, and historical dimensions and antagonisms are negotiated. This volume covers a variety of themes illuminating the multiple ways that football impacts on people's everyday lives. Using anthropological research methods and data collected from ethnographic fieldwork, the contributors scrutinize not only the social fields of football fans and the specific socio-cultural contexts in which they are embedded, but also other actors beyond the pitch, and the possibilities for both agency and subversion. Taking into account processes of Europeanization, globalization, commercialization and migration, the collection offers fresh insights into fan identity formations and practices and highlights the importance of anthropology's self-reflexive and actor-centred perspective.

sports this involves labour, movement from one country to another within or between continents. In other sports, athletes assume an almost nomadic migratory lifestyle, constantly on the move from one sport festival to another. In addition, it appears that sport migration is gaining momentum and that it is closely interwoven with the broader process of global sport development taking place in the late twentieth century.
