Man-Made Monsters Bob Curran, 2010-11-20 Life exists all around us, in forms that we can readily and easily identify. But what if there were, lurking in the shadows, other forms of life that are not so familiar, creatures created not by Nature, but by Man? We know their names—Frankenstein, the Golem, the homunculi of the ancient alchemists; they exist in our stories and myths. But just what are these mysterious creatures, and do they actually have some basis in reality? In his fascinating and wide-ranging new book, Dr. Bob Curran explores man-made monsters and the truth behind the myths. You'll learn fascinating details about: The 19th century scientist who tried to bring the dead back to life—the model for Mary Shelley's Frankenstein The Man of Clay who lumbered through the streets of medieval Prague at the command of early rabbis Tales of robots that may have existed in the ancient world and threatened Greek and Roman warriors. Cloning and the artificial creation of life, and what strange and mysterious areas they may be heading into. Man-Made Monsters is essential reading for anyone who wants to explore artificial beings and peer into the dark recesses of the human mind...where they may indeed be hiding.

The Paranormal Equation James Stein, 2012-12-26 Most of us think science is incapable of explaining supernatural phenomena. This would include everything from ghosts and communication with the dead to extrasensory perception (ESP), precognition, and telekinesis. Scientists are generally highly skeptical of the existence of such phenomena because of the lack of the rigorous documentation that science requires. Nevertheless, many great scientists have believed—and do believe—in the supernatural. The Paranormal Equation presents an argument for the existence of supernatural phenomena based on the mathematics and science discovered during the last century. It also explains why supernatural phenomena must exist if the universe satisfies certain conditions—conditions which are accepted by many working scientists. The Paranormal Equation explores such questions as: How can we distinguish between the truly unknown and the supernatural? How have scientists attempted to study the supernatural? What are the rational reasons for believing in the supernatural? Which hypotheses about the universe mandate the existence of supernatural phenomena? Anyone interested in how science is beginning to understand and even explain the seemingly unexplainable will want to read this fascinating new title.

Confessions of a Reluctant Ghost Hunter Von Braschler, 2014-08-16 A how-to primer on safe ghost removal with accounts of the author's most dangerous spirit confrontations • Includes lists of what to do and what to avoid and explains how to identify what kind of spirit you are dealing with and whether it is safe to attempt removal • Details the author's difficult attempts to remove spirits from haunted buildings • Reveals how haunting spirits may not simply be ghosts of deceased people but may be powerful entities manifested from rage, hatred, and frustration Despite early recognition of his own psychic sensitivities and ability to see spirits, Von Braschler did not seek to become a ghost hunter. He entered on this path through a chance encounter with a professional ghost hunter. After training with her, he returned to Oregon where he began exorcising ghosts for friends and acquaintances and, as he reveals in these pages, quickly stumbled upon forces far beyond his level of experience. Sharing his true story of what can go wrong when ghost hunting, Braschler describes his training sessions with the professional ghost hunter and details his most difficult and dangerous attempts to remove spirits from haunted buildings, including an old church in Portland and an herbalist's trailer on Mount Hood, where he encountered a spirit known to choke people in their sleep. He explains how not all spirits are simply ghosts of deceased people reluctant to move on from this plane of existence. They may be entities created from the rage, hatred, or frustrations of a building's current or former inhabitants, and disturbing them can lead to dark confrontations without easy resolution. Offering a primer on ghost removal, Braschler provides practical lists of what to do and what to avoid when removing ghosts from a haunted building. He outlines how to identify what kind of spirit you are dealing with, whether it is safe to attempt removal, and how to approach the ghost and convince it to leave. Detailing his own intense and sometimes hellish battles with unseen spirits, he also includes an impassioned plea of caution to those who try to contact ghosts and spirits purely for entertainment.

Haunting Experiences Diane Goldstein, Sylvia Grider, Jeannie Banks Thomas, 2007-09-15 Ghosts and other supernatural phenomena are widely represented throughout modern culture. They can be found in any number of entertainment, commercial, and other contexts, but popular media or commodified representations of ghosts can be quite different from the beliefs people hold about them, based on tradition or direct experience. Personal belief and cultural tradition on the one hand, and popular and commercial representation on the other, nevertheless continually feed each other. They frequently share space in how people think about the supernatural. In Haunting Experiences, three well-known folklorists seek to broaden the discussion of ghost lore by examining it from a variety of angles in various modern contexts. Diane E. Goldstein, Sylvia Ann Grider, and Jeannie Banks Thomas take ghosts seriously, as they draw on contemporary scholarship that emphasizes both the basis of belief in experience (rather than mere fantasy) and the usefulness of ghost stories. They look closely at the narrative role of such lore in matters such as socialization and gender. And they unravel the complex mix of mass media, commodification, and popular culture that today puts old spirits into new contexts.

Each story is unique in its own personal experience and has been told to the author, Selinda Hart. Having worked as an investigator and as a researcher for the paranormal radio show Tia Maria she has brought together some of the best hauntings, accounts of paranormal mysteries, and true ghost stories in this collection. The sixteen stories in this book include diverse paranormal phenomenon and unexplained mysteries set in different locations in the United States, and one compelling frightening story from Spain. The House off Greenville, Red Balloon, Ghost in the Bedroom, and Who's been playing with my kids? are real stories about events and paranormal activity that took place in the Dallas house where the author lived in as a single mom for over five years. Her children are grown now, but to this day they do not like talking about the strange activity and events that took place in that house. If you like reading scary stories, paranormal mysteries, and unexplained phenomenon, then True Ghost Stories will leave you with chills. So snuggle up, get under the covers and get ready for some serious goosebumps!

The Telltale Lilac Bush and Other West Virginia Ghost Tales Ruth Ann Musick,2010-09-12 West Virginia boasts an unusually rich heritage of ghost tales. Originally West Virginians told these hundred stories not for idle amusement but to report supernatural experiences that defied ordinary human explanation. From jealous rivals and ghostly children to murdered kinsmen and omens of death, these tales reflect the inner lives—the hopes, beliefs, and fears—of a people. Like all folklore, these tales reveal much of the history of the region: its isolation and violence, the passions and bloodshed of the Civil War era, the hardships of miners and railroad laborers, and the lingering vitality of Old World traditions.
