Computational Approaches to Assistive Technologies for People with Disabilities N.J. Cercone,K. Naruedomkul,2013-07-16 Assistive technologies have become increasingly important for people with disabilities in recent years. This book is the result of over a decade of research into computational approaches to assistive technology. Its chapters are based on a number of graduate theses, successfully completed over the past dozen or so years under the supervision of Kanlaya Naruedomkul of Mahidol University in Bangkok, Thailand and Nick Cercone of York University, Toronto, Canada. Some applications in the chapters use Thai language examples, but the techniques employed are not restricted to any single language. Each chapter is based on the Ph.D. work of a former or current student, suitably updated and presented for interested readers. The book is divided into four sections. Following an introduction, which includes a review of assistive technology products, part two covers applications, and includes chapters on alternative sign text MT for language learning, lexical simplification using word sense disambiguation and detecting and rating dementia through lexical analysis of spontaneous speech. Part three deals with theories and systems, and includes: granules for learning behavior, rough sets methods and applications for medical data and multimedia support systems as assistive technology for hearing impaired students. Part four presents a conclusion which includes a look into the future. Although this book is not a comprehensive treatise on assistive technology, it nevertheless provides a fascinating look at recent research, and will be of interest to all those whose work involves the application of assistive technologies for people with disabilities.

The Private Life of the Diary Sally Bayley,2016-04-21 Diaries keep secrets, harbouring our fantasies and fictional histories. They are substitute boyfriends, girlfriends, spouses and friends. But in this age of social media, the role of the diary as a private confidante has been replaced by a culture of public self-disclosure. The Private Life of the Diary: from Pepys to Tweets is an elegantly-told story of the evolution – and perhaps death – of the diary. It traces its origins to seventeenth-century naval administrator, Samuel Pepys, and continues to twentieth-century diarist Virginia Woolf, who recorded everything from her personal confessions about her irritation with her servants to her memories of Armistice Day and the solar eclipse of 1927. Sally Bayley explores how diaries can sometimes record our lives as we live them, but that we often indulge our fondness for self-dramatization, like the teenaged Sylvia Plath who proclaimed herself 'The Girl Who Would be God'. This book is an examination of the importance of writing and self-reflection as a means of forging identity. It mourns the loss of the diary as an acutely private form of writing. And it champions it as a conduit to self-discovery, allowing us to ask ourselves the question: Who or What am I in relation to the world?
