World Press Photo Yearbook 2023 World Press Photo Foundation, 2023-07-13 Since 1955, the annual World Press Photo Contest has set the standard in visual journalism. The 2023 Yearbook showcases the most striking press photographs and compelling reports from 2022, carefully selected from thousands of entries by six regional and one global jury of acclaimed independent professionals. Providing a diversity of perspectives from all over the world, the awarded works bear witness to the events that shaped this past year, and document in long-term projects the ongoing issues we face. Recognizing the importance of photojournalism and documentary photography at a time, when the truth is contested, the awarded images share courageous stories and present invaluable insights— from warzones, the struggle for civil rights and political empowerment, to the visible impact of the climate crisis, which could be felt in 2022 more acutely than ever. For six decades, the WORLD PRESS PHOTO FOUNDATION has been working from its home in Amsterdam as an independent, non-profit organization. To provide

truly global perspectives, the foundation launched a new regional strategy in 2022. From January to March 2023 six regional and one global jury will decide on 24 regional and 4 global winners.

The Contest of Meaning Richard Bolton,1992-02-25 Photography's great success gives the impression that the major questions that have haunted the medium are now resolved. On the contrary, the most important questions about photography are just beginning to be asked. These fourteen essays, with over 200 illustrations, critically examine prevailing beliefs about the medium and suggest new ways to explain the history of photography. They are organized around the questions: What are the social consequences of aesthetic practice? How does photography construct sexual difference? How is photography used to promote class and national interests? What are the politics of photographic truth? The Contest of Meaning summarizes the challenges to traditional photographic history that have developed in the last decade out of a consciously political critique of photographic production. Contributions by a wide range of important Americans critics reexamine the complex—and often contradictory—roles of photography within society. Douglas Crimp,

Christopher Phillips, Benjamin Buchloh, and Abigail Solomon Godeau examine the gradually developed exclusivity of art photography and describe the politics of canon formation throughout modernism. Catherine Lord, Deborah Bright, Sally Stein, and Jan Zita Grover examine the ways in which the female is configured as a subject, and explain how sexual difference is constructed across various registers of photographic representation. Carol Squiers, Esther Parada, and Richard Bolton clarify the ways in which photography serves as a form of mass communication, demonstrating in particular how photographic production is affected by the interests of the powerful patrons of communications. The three concluding essays, by Rosalind Krauss, Martha Rosler, and Allan Sekula, critically examine the concept of photographic truth by exploring the intentions informing various uses of objective images within society.
