Rough Work Ruth Bleasdale,2018-03-01 The labourers at the heart of this study built the canals and railways undertaken as public works by the colonial governments of British North America and the federal government of Canada between 1841 and 1882. Ruth Bleasdale's fascinating journey into the little-known lives of these labourers and their families reveals how capital, labour and the state came together to build the transportation infrastructure that linked colonies and united an emerging nation. Combining census and community records, government documents, and newspaper archives Bleasdale elucidates the ways in which successive governments and branches of the state intervened between labour and capital and in labourers' lives. Case studies capture the remarkable diversity across regions and time in a labour force drawn from local and international labour markets. The stories here illuminate the ways in which men and women experienced the emergence of industrial capitalism and the complex ties which bound them to local and transnational communities. *Rough Work* is an accessibly written yet rigorous study of the galvanization of a major segment of Canada's labour force over four decades of social and economic transformation.

The School Promoters Alison Prentice,2004-01-01 We tend to think of contemporary concern for reform in education as unprecedented in its intensity and scope. But as this book about mid-nineteenth century educational ideology shows, the urge to improve society through its schools has been with us a long time. The author examines the attitudes that shaped the Ontario public school system during its formative years, when Upper Canadians first explored and the provincial government finally adopted the principle of compulsory mass schooling under the auspices and control of the state.

Dominion of Capital Don Nerbas,2013-12-06 In the critical decades following the First World War, the Canadian political landscape was shifting in ways that significantly recast the relationship between big business and government. As public pressures changed the priorities of Canada's political parties, many of Canada's most powerful businessmen struggled to come to terms with a changing world that was less sympathetic to their ideas and interests than before. *Dominion of Capital* offers a new account of relations between government and business in Canada during a period of transition between the established expectations of the National Policy and the uncertain future of the twentieth century. Don Nerbas tells this fascinating story through close portraits of influential business and political figures of this period – including Howard P. Robinson, Charles Dunning, Sir Edward Beatty, R.S. McLaughlin, and C.D. Howe – that provide insight into how events in different sectors of the economy and regions of the country shaped the political outlook and strategies of the country's business elite. Drawing on business, political, social, and cultural history, Nerbas revises standard accounts of government-business relations in this period and sheds new light on the challenges facing big business in early twentieth-century Canada.
