**Unleashing Children's Voices in New Democratic Primary Education** James Biddulph, Luke Rolls, Julia Flutter, 2022-09-30 As the world begins to emerge from the COVID-19 pandemic and grapples to find ways to respond to climate change, there is growing recognition of the need to give space and time in primary schools to hear children's experiences, ideas and perspectives on these matters and to promote their active participation in democratic solutions. This book presents vibrant examples from professional educators and researchers across the globe who are demonstrating how primary schools can nurture the conditions for new democratic education through empowering educators' and children's voices and agency. Written as a genuine partnership between research experts and experienced classroom teachers, the book delves into historic and contemporary theories and evidence about the children's voices movement, and new democratic education, helping to root teachers' practices to strong educational theoretical concepts. The second section presents a set of diverse and detailed examples drawn from primary classrooms and schools that illustrate how these ideas are taking shape in teaching and learning across the world; chapters will bring to life the principles upon which schools have empowered young voices, sharing examples of success and thriving students. Finally, a set of thought-provoking manifestos will offer new opportunities and fresh theories for educators to explore, with the purpose and intention to take forward in their own primary school contexts. This is a vital resource for any new or experienced teacher or school leader looking to take research-informed and principled approaches to changes in schools so that teaching and learning ignites the social imagination for 21st-century educators and learners.

**The Science of Diversity** Mona Sue Weissmark, 2020 Using a multidisciplinary approach, *The Science of Diversity* reveals the theories, principles, and paradigms that illuminate people's understanding of the issues surrounding human diversity, social equality, and justice. Noted psychologist and educator Dr. Mona Weissmark assembles a rich array of research from anthropology, biology, religious studies, and the social sciences to write a scholarly diorama of diversity. This book contextualizes diversity historically, tracing the evolution of ideas about the other and about we and them to various forms of social organization--from the hunter-gather, face-to-face, shared resource model to the anomie of megacities. Moreover, it explicates the concept of diversity, analyzing its meaning over time, place, and polity--from ancient Greece to the time of Donald Trump, from biblical parables to United Nations pronouncements. Ultimately, drawing on the author's groundbreaking research work with the children of Nazis and the children of holocaust survivors, the book suggests that one potential antidote to ethnic strife lies in the pursuit of Immanuel Kant's mandate, *sapere aude* (dare to know), combined with the development of compassion--
