Epic Landscapes Julia Sienkewicz, 2019-11-13 *Epic Landscapes* is the first study devoted to architect Benjamin Henry Latrobe's substantial artistic oeuvre from 1795, when he set sail from Britain to Virginia, to late 1798, when he relocated to Pennsylvania. Thus, this book offers the only extended consideration of Latrobe's Virginian watercolors, including a series of complex trompe l'oeil studies and three significant illustrated manuscripts. Though Latrobe's architecture is well known, his watercolors have received little critical attention. *Epic Landscapes* rediscovers Latrobe's watercolors as an ambitious body of work and reconsiders the close relationship between the visual and spatial sensibility of these images and his architectural designs. It also offers a fresh analysis of Latrobe within the context of creative practice in the Atlantic world at the end of the eighteenth century as he explored contemporary ideas concerning the form of art for Republican society and the social impacts of revolution. Published by University of Delaware Press. Distributed worldwide by Rutgers University Press.

The Viewer as Poet: The Renaissance Response to Art, 1994 In *The Viewer as Poet*, Norman Land provides the first comprehensive survey of ekphrasis in literature and art criticism from antiquity through the Renaissance. Land demonstrates, more fully than anyone has so far, that Renaissance art criticism assimilated the poetic tradition of ekphrasis while maintaining its function of analyzing works of art. Broadly speaking, the book shows that purely literary descriptions of art in poetry and prose contain a response like that found in art-critical ekphrasis. This is true in both antiquity and the Renaissance. The response to art in the elder Philostratus's *Imagines*, for example, is like that found in the descriptions of Apuleius and Lucian. Later Dante, Boccaccio, and Poliziano, among others, respond to imaginary works of art in their poetry in much the same way that Lorenzo Ghiberti, Aretino, and Vasari respond to real works in their writings. Land offers for the first time a synthetic description of the Renaissance response to, or experience of, art as embodied in literature, including art criticism. This book will form the basis for a deeper understanding of Renaissance art than we have now, for it provides not only a tool for viewing works of art as they were originally seen and experienced—that is, from a historical perspective—but also an outline of the tradition out of which modern writings about art grew.

The Cave and the Light Arthur Herman, 2014-06-03 The definitive sequel to New York Times bestseller *How the Scots Invented the Modern World* is a magisterial account of how the two greatest thinkers of the ancient world, Plato and Aristotle, laid the foundations of Western culture—and how their rivalry shaped the essential features of our culture down to the present day. Plato came from a wealthy, connected Athenian family and lived a comfortable upper-class lifestyle until he met an odd little man named Socrates, who showed him a new world of ideas and ideals. Socrates taught Plato that a man must use reason to attain wisdom, and that the life of a lover of wisdom, a philosopher, was the pinnacle of achievement. Plato dedicated himself to living that ideal and went on to create a school, his famed Academy, to teach others the path to enlightenment through contemplation. However, the same Academy that spread Plato's teachings also fostered his greatest rival. Born to a family of Greek physicians, Aristotle had learned early on the value of observation and hands-on experience. Rather than rely on pure contemplation, he insisted that the truest path to knowledge is through empirical discovery and exploration of the world around us. Aristotle, Plato's most brilliant pupil, thus settled on a philosophy very different from his instructor's and launched a rivalry with profound effects on Western culture. The two men disagreed on the fundamental purpose of the philosophy. For Plato, the image of the cave summed up man's destined path, emerging from the darkness of material existence to the light of a higher and more spiritual truth. Aristotle thought otherwise. Instead of rising above mundane reality, he insisted, the philosopher's job is to explain how the real world works, and how we can find our place in it. Aristotle set up a school in Athens to rival Plato's Academy: the Lyceum. The competition that ensued between the two schools, and between Plato and Aristotle, set the world on an intellectual adventure that lasted through the Middle Ages and Renaissance and that still continues today. From Martin Luther (who named Aristotle the third great enemy of true religion, after the devil and the Pope) to Karl Marx (whose utopian views rival Plato's), heroes and villains of history have been inspired and incensed by these two master philosophers—but never outside their influence. Accessible, riveting, and eloquently written, *The Cave and the Light* provides a stunning new perspective on the Western world, certain to open eyes and stir debate. Praise for *The Cave and the Light* "A sweeping intellectual history viewed through two ancient Greek lenses . . . breezy and enthusiastic but resting on a sturdy rock of research."—Kirkus Reviews "Examining mathematics, politics, theology, and architecture, the book demonstrates the continuing relevance of the ancient world."—Publishers Weekly "A fabulous way to understand over two millennia of history, all in one book."—Library Journal "Entertaining and often illuminating."—The Wall Street Journal

Vision and the Visionary in Raphael Christian K. Kleinbub, 2011 Studies Raphael's images of supernatural phenomena, including apparitions and prophetic visions, within their contemporary artistic and religious contexts. Asks how a fundamentally naturalistic style of painting like that of the Italian Renaissance can accommodate representations of the supernatural without self-contradiction--Provided by publisher.

The Perfect Genre. Drama and Painting in Renaissance Italy Kristin Phillips-Court, 2016-12-05 Proposing an original and important re-conceptualization of Italian Renaissance drama, Kristin Phillips-Court here explores how the intertextuality of major works of Italian dramatic literature is not only poetic but also figurative. She argues that not only did the painterly gaze, so prevalent in fifteenth- and sixteenth-century devotional art, portraiture, and visual allegory, inform humanistic theories, practices and themes, it also led prominent Italian intellectuals to write visually evocative works of dramatic literature whose topical plots and structures provide only a fraction of their cultural significance. Through a combination of interpretive literary criticism, art historical analysis and cultural and intellectual historiography, Phillips-Court offers detailed readings of individual plays juxtaposed with specific developments and achievements in the realm of painting. Revealing more than historical connections between artists and poets such as Tasso and Giorgione, Mantegna and Trissino, Michelangelo and Caro, or Bruno and Caravaggio, the author locates the history of Renaissance art and drama securely within the history of ideas. She provides us with a story about the emergence and eventual disintegration of Italian Renaissance drama as a rigorously philosophical and empirical form. Considering rhetorical, philosophical, ethical, religious, political-ideological, and aesthetic dimensions of each of the plays she treats, Kristin Phillips-Court draws our attention to the intermedial conversation between the theater and painting in a culture famously dominated by art. Her integrated analysis of visual and dramatic works brings to light how the lines and verses of the text reveal an ongoing dialogue with visual art that was far richer and more intellectually engaged than we might reconstruct from stage diagrams and painted backdrops.

Music In Video Games K.J. Donnelly, William Gibbons, Neil Lerner, 2014-03-26 From its earliest days as little more than a series of monophonic outbursts to its current-day scores that can rival major symphonic film scores, video game music has gone through its own particular set of stylistic and functional metamorphoses while both borrowing and recontextualizing the earlier models from which it borrows. With topics ranging from early classics like Donkey Kong and Super Mario Bros. to more recent hits like *Plants vs. Zombies*, the eleven essays in *Music in Video Games* draw on the scholarly fields of musicology and music theory, film theory, and game studies, to investigate the history, function, style, and conventions of video game music.

Forms of Faith in Sixteenth-Century Italy Matthew Treherne, 2016-12-05 The sixteenth century was a period of tumultuous religious change in Italy as in Europe as a whole, a period when movements for both reform and counter-reform reflected and affected shifting religious sensibilities. Cinquecento culture was profoundly shaped by these religious currents, from the reform poetry of the 1530s and early 1540s, to the efforts of Tridentine theologians later in the century to renew Catholic orthodoxy across cultural life. This interdisciplinary volume offers a carefully balanced collection of essays by leading international scholars in the fields of Italian Renaissance literature, music, history and history of art, addressing the fertile question of the relationship between religious change and shifting cultural forms in sixteenth-century Italy. The contributors to this volume are throughout concerned to demonstrate how a full understanding of Cinquecento religious culture might be found as much in the details of the relationship between cultural and religious developments, as in any grand narrative of the period. The essays range from the art of Cosimo I's Florence, to the music of the Confraternities of Rome; from the private circulation of religious literature in manuscript form, to the public performances of musical laude in Florence and Tuscany; from the art of Titian and Tintoretto to the religious poetry of Vittoria Colonna and Torquato Tasso. The volume speaks of a Cinquecento in which religious culture was not always at ease with itself and the broader changes around it, but was nonetheless vibrant and plural. Taken together, this new and ground-breaking research makes a major contribution to the development of a more nuanced understanding of

cultural responses to a crucial period of reform and counter-reform, both within Italy and beyond.

Cartographic Mexico Raymond B. Craib,2004 Analyzes spatial history of 19th and early 20th century Mexico, particularly political uses of mapping and surveying, to demonstrate multiple ways that space can be negotiated in the service of local or national agendas.

Social and Organizational Impacts of Emerging Mobile Devices: Evaluating Use Lumsden, Joanna,2012-02-29 This book focuses on human-computer interaction related to the innovation and research in the design, evaluation, and use of innovative handheld, mobile, and wearable technologies in order to broaden the overall body of knowledge regarding such issue--Provided by publisher.

Augmented Reality Jon Peddie,2023-07-29 This book provides an in-depth exploration of the field of augmented reality (AR) in its entirety and sets out to distinguish AR from other inter-related technologies like virtual reality (VR), mixed reality (MR) and extended reality (XR). The author presents AR from its initial philosophies and early developments, and in this updated 2nd edition discusses the latest advances and the ramifications they bring and the impact they have on modern society. He examines the new companies that have entered the field and those that have failed or were acquired giving a complete history of AR progress. He explores the possible future developments providing readers with the tools to understand issues relating to defining, building, and using their perception of what is represented in their perceived reality, and ultimately how we assimilate and react to this information. In *Augmented Reality: Where We Will All Live 2nd Edition*, Jon Peddie has amassed and integrated a corpus of material that is finally in one place. It will serve as a comprehensive guide and provide valuable insights for technologists, marketers, business managers, educators and academics who are interested in the field of augmented reality, its concepts, history, practices, and the science behind this rapidly advancing field of research and development.

Doug Wheeler Doug Wheeler,2020-01-07 Over five decades, Doug Wheeler has pioneered the art of light and space. His work powerfully explores the way we perceive “empty” space—the way light can affect our perception and make emptiness feel full and dense. From his early experiences flying across the desert with his father, a doctor in Globe, Arizona, Wheeler developed a passion for the intensity and stillness of vast expanses, seeing in them a whole new set of possibilities for visual art. Although Wheeler began his career as a painter, his wall-mounted artworks soon began incorporating light as a medium and quickly gave way to an unprecedented art-historical breakthrough: his construction of an absolute light environment, crafted in his studio in 1967. Since that unparalleled moment, Wheeler’s work has been exhibited widely all over the world; in the past decade, with numerous major gallery and museum installations, his reputation as the definitive light and space artist has been solidified. This volume, featuring new scholarship by renowned art historian Germano Celant, traces the entire course of Wheeler’s career to date, from his first mature paintings to his immersive installations. Writing on Wheeler’s intense and direct engagement with the absoluteness in the optical fields he creates, Celant provides a detailed account for Wheeler’s development as one of the most original and influential artists of his generation. Wheeler’s work not only changes how we encounter reality after we see it, but also how we envision what is possible more broadly in visual art.
