Skinnytaste Meal Planner Gina Homolka,2017

Spychips Katherine Albrecht,Liz McIntyre,2006-09-26 Winner of the Lysander Spooner Award for Advancing the Literature of Liberty As you walk down the street, a tiny microchip implanted in your tennis shoe tracks your every move; chips woven into your clothing transmit the value of your outfit to nearby retailers; and a thief scans the chips hidden inside your money to decide if you're worth robbing. This isn't science fiction; in a few short years, it could be a fact of life. Sychips takes readers into the frightening world of Radio Frequency Identification (RFID). While manufacturers and the government want you to believe that they would never misuse the technology, the future looks like an Orwellian nightmare when you consider the possibilities of surveillance and tracking these chips embody. Combining in-depth research with firsthand reporting, Sychips reveals how RFID technology, if left unchecked, could soon destroy our privacy, radically alter the economy, and open the floodgates for civil liberty abuses.

And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right *The Professor Is In* addresses all of these issues, and many more.

These innovations will also help mitigate carbon emissions. This volume presents the latest research on railway engineering and transportation and discusses the practices and processes involved in shaping modern railways.
