Chinese Outbound Tourism 2.0 Xiang (Robert) Li, 2016-02-03 Booming Mainland Chinese outbound travel is one of the most exciting phenomena in the world tourism industry's recent history. From 2000 to 2010, Chinese outbound travel increased at a compounded annual rate of 18.5 percent, and it is forecasted that by 2020 China will generate approximately 100 million outbound trips a year, making China the fourth largest source of outbound travel in the world. The new Chinese tourists are more confident, technologically savvy, value conscious, and ready to explore unfamiliar territory. For tourism marketers and researchers who are getting ready to or just celebrated their initial west-meets-east moments, the new Chinese tourists are showing up at their doors and presenting new challenges for marketing and service. In this book, leading authors from around the world share their most cutting-edge findings and thoughts on the Chinese outbound travel market. The book reflects on the paths of the Chinese outbound travel development, reports new trends and issues, and provides new insights and recommendations. For practitioners around the world (e.g., destination policymakers and marketers, travel and tourism service providers, owners, and managers), this book provides hands-on guidance on understanding tourists from Mainland China. For tourism scholars, educators, and students, this book provides basic yet essential knowledge on the Chinese outbound travel market and tourist behavior and points out important future directions. Most tourism programs today have an international component in their curriculum, usually including a global tourism class. This book serves as an excellent supplemental reading for students in these classes.

Resistant City: Histories, Maps And The Architecture Of Development Eunice Mei Feng Seng, 2020-02-24 This vivid book is an inquiry into the stagnation between the development of architectural practice and the progress in urban modernization. It is about islands as territories of resistance. It is about dense places where multitudes dwell in perennial contestations with the city on every front. It is about the histories, tactics and spaces of everyday survival within the hegemonic sway of global capital and unstoppable development. It is preoccupied with making visible the culture of resistance and architecture's entanglement with it. It is about urban resilience. It is about Hong Kong, where uncertainty is status quo. This interdisciplinary volume explores real and invented places and identities that are created in tandem with Hong Kong's urban development. Mapping contested spaces in the territory, it visualizes the energies and tenacity of the people as manifest in their daily life, social and professional networks and the urban spaces in which they inhabit. Embodying the multifaceted nature of the Asian metropolis, the book utilizes a combination of archival materials, public data sources, field observations and documentation, analytical drawings, models, and maps. Citizenship, Identity and Social Movements in the New Hong Kong Wai-man Lam, Luke Cooper, 2017-09-11 Hong Kong's 'Umbrella Revolution' has been widely regarded as a watershed moment in the polity's post-1997 history. While public protest has long been a routine part of Hong Kong's political culture, the preparedness of large numbers of citizens to participate in civil disobedience represented a new moment for Hong Kong society, reflecting both a very high level of politicisation and a deteriorating relationship with Beijing. The transformative processes underpinning the dramatic events of autumn 2014 have a wide relevance to scholarly debates on Hong Kong, China and the changing contours of world politics today. This book provides an accessible entry point into the political and social cleavages that underpinned, and were expressed through, the Umbrella Movement. A key focus is the societal context and issues that have led to growth in a Hong Kong identity and how this became highly politically charged during the Umbrella Movement. It is widely recognised that political and ethnic identity has become a key cleavage in Hong Kong society. But there is little agreement amongst citizens about what it means to 'be Hong Konger' today or whether this identity is compatible or conflicting with 'being Chinese'. The book locates these identity cleavages within their historical context and uses a range of theories to understand these processes, including theories of nationalism, social identity, ethnic conflict, nativism and cosmopolitanism. This theoretical plurality allows the reader to see the new localism in its full diversity and complexity and to reflect on the evolving nature of Hong Kong's relationship with Mainland China.

Green Asia Tania Lewis, 2016-09-13 Economic development in Asia is associated with expanding urbanism, overconsumption, and a steep growth in living standards. At the same time, rapid urbanisation, changing class consciousness, and a new rural-urban divide in the region have led to fundamental shifts in the way ecological concerns are articulated politically and culturally. Moreover, these changes are often viewed through a Western moralistic lens, which at the same time applauds Asia's economic growth as the welcome reviver of a floundering world economy and simultaneously condemns this growth as encouraging hyperconsumerism and a rupture with more natural ways of living. This book presents an analysis of a range of practices and activities from across Asia that demonstrate that people in Asia are alert to ecological concerns, that they are taking action to implement new styles of green living, and that Asia offers interesting alternatives to narrow Anglo-American models of sustainable living. Subjects explored include eco-tourism in the Philippines, green co-operatives in Korea, the importance of tradition within Asian discourses of sustainability, and much more.

Image, Imagination and Imaginarium Lu Pan, 2021-01-02 This book explores five cases of monument and public commemorative space related to World War II (WWII) in contemporary China (Mainland), Hong Kong and Taiwan, all of which were built either prior to or right after the end of the War and their physical existence still remains. Through the study on the monuments, the project illustrates past and ongoing controversies and contestations over Chinese nation, sovereignty, modernism and identity. Despite their historical affinities, the three societies in question, namely, Mainland China, Hong Kong and Taiwan, vary in their own ways of telling, remembering and forgetting WWII. These divergences are not only rooted in their different political circumstances and social experiences, but also in their current competitions, confrontations and integrations. This book will be of great interest to historians, sinologists and analysts of new Asian nationalism.

Regulating Information Asymmetry in the Residential Real Estate Market Devin Lin, 2017-07-06 This book conducts a detailed examination of the current form of the Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of values including information symmetry, consumer protection, the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unconscionable sales tactics (such as selective information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order to protect the interests of stakeholders in this ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is communicated to the prospective buyer and discusses misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in consumer protection and transparency-orientated legislation in commercialized real estate transactions, this book seeks to provide an in-depth discussion of the latest trends and directions of travel.

Greed, Corruption, and the Modern State Susan Rose-Ackerman, Paul Lagunes, 2015-09-25 What makes the control of corruption so difficult and contested? Drawing on the insights of political science, economics and law, the expert contributors to this book offer diverse perspectives. One group of chapters explores the nature of corruption in democracies and autocracies, and "reforms" that are mere facades. Other contributions examine corruption in infrastructure, tax collection, cross-border trade, and military procurement. Case studies from various regions – such as China, Peru, South Africa and New York City – anchor the analysis with real-world situations. The book pays particular attention to corruption involving international business and the domestic regulation of foreign bribery.

The Politics of People Shih-Diing Liu, 2019-09-01 Explores the cultural dimensions of protest and dissent in China, focusing on dramatic forms of bodily, spatial, strategic, and artistic performativity. Since the 1989 Tiananmen Square occupation, mainland China, Hong Kong, and Macau have experienced an increase in and persistence of mass gatherings, demonstrations, and blockades staged as a means of protesting the ways in which people are governed. In this book, Shih-Diing Liu argues that these popular protests are poorly understood, because they are viewed through the lens of protests and occupations globally, with insufficient attention given to their distinctively local aspects. He provides a better account of these distinctively Chinese-style occupations by describing, contextualizing, and analyzing a range of relevant recent case studies. Liu draws on theoretical concepts developed by Judith Butler, Jacques Rancière, Ernesto Laclau, and other contemporary critical theorists and shows the importance of considering bodily, spatial, and visual dimensions of these protests. By seeing them as staged, contentious performances, the author demonstrates how these precarious populations mobilize their bodies and symbolic resources offered by the Chinese government to open up temporary spaces of appearance to articulate their grievances, and argues that this kind of embodied and performative analysis should be more widely conducted in studies of popular politics worldwide. "The Politics of People is a direct challenge to the Sinological straightjacket of thinking about political action, resistance, and Occupy movements. It is also a thoroughgoing critique of how postcolonial studies has not pushed us very far in our thinking about popular politics, and how the rich literature on the Occupy movement in the United States and European context has failed to think recent protests and political action movements into the global theorization of Occupy." – Ralph Litzinger, coeditor of *Ghost Protocol: Development and Displacement in Global China*

The Child as Musician Gary E. McPherson, 2015-09-24 The new edition of *The Child as Musician: A Handbook of Musical Development* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music. It presents theory - both cutting edge and classic - in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills. The focus is on musical development from conception to late adolescences, although the bulk of the coverage concentrates on the period when children are able to begin formal music instruction (from around age 3) until the final year of formal schooling (around age 18). There are many conceptions of how musical development might take place, just as there are for other disciplines and areas of human potential. Consequently, the publication highlights the diversity in current literature dealing with how we think about and conceptualise children's musical development. Each of the authors has searched for a better and more effective way to explain in their own words and according to their own perspective, the remarkable ways in which children engage with music. In the field of educational psychology there are a number of publications that survey the issues surrounding child and adolescent development. Some of the more innovative present research and theories, and their educational implications, in a style that stresses the fundamental interplay among the biological, environmental, social and cultural influences at each stage of a child's development. Until now, no similar overview has existed for child and adolescent development in the field of music. *The Child as Musician* addresses this imbalance, and is essential for those in the fields of child development, music education, and music cognition.

Counter-hegemonic Resistance in China's Hong Kong Daniel Garrett, 2014-11-09 This book and associated collection of visual data and sociological observations examine how the Hong Kong Special Administrative Region (SAR) has been visually re-imagined, transformed, and utilized by its subalterns in the post-Handover period to reproduce their aspirations and demands for greater democracy and social justice while simultaneously contesting the hegemonic pressure exerted by China under the "One Country, Two Systems" ideology. It provides a rich visual description and narrative of how Hong Kong's many repressed social and political actors have struggled to make their voices heard under its competitive authoritarian political system. The book addresses the growing scholarly interest in the visual analysis of global protests and social movements as salient sources of sociological data

and on the creation of meaning. By innovatively tackling the visual culture and visibility of subaltern resistance in Hong Kong it contributes to our understanding of contentious SAR-China politics and the New Social Movement, and will be of great interest to Hong Kong, resistance, social movement, and visual studies scholars.

Routledge Handbook of New Media in Asia Larissa Hjorth, Olivia Khoo, 2015-11-06 While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a default setting for technology in the future, today we are seeing a much more complex picture of contesting new media practices and production. As new media becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices, boundaries between art, new media, and the everyday are transformed. This Handbook addresses the historical, social, cultural, political, philosophical, artistic and economic dimensions of the region's new media. Through an interdisciplinary revision of both new media and Asia the contributors provide new insights into the complex and contesting terrains of both notions. The Routledge Handbook of New Media in Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia. It provides an authoritative, up-to-date, intellectually broad, conceptually cutting-edge guide to the important aspects of new media in the region – as the first point of consultation for researchers, advanced level undergraduate and postgraduate students in fields of new media and Asian studies.

The Emerging Public Realm of the Greater Bay Area Miodrag Mitrašinić, Timothy Jachna, 2021-07-29 Through illustrated case studies and conceptual re-framings, this volume showcases ongoing transformations in public space, and its relationship to the public realm more broadly in the world's most populous urban megaregion—the Greater Bay Area of southeastern China—projected to reach eighty million inhabitants by the year 2025. This book assembles diverse approaches to interrogating the forms of public space and the public realm that are emerging in the context of this region's rapid urban development in the last forty years, bringing together authors from urbanism, architecture, planning, sociology, anthropology and politics to examine innovative ways of framing and conceptualizing public space in/of the Greater Bay Area. The blend of authors' first-hand practical experiences has created a unique cross-disciplinary book that employs public space to frame issues of planning, political control, social inclusion, participation, learning/education and appropriation in the production of everyday urbanism. In the context of the Greater Bay Area, such spaces and practices also present opportunities for reconfiguring design-driven urban practice beyond traditional interventions manifested by the design of physical objects and public amenities to the design of new social protocols, processes, infrastructures and capabilities. This is a captivating new dimension of urbanism and critical urban practice and will be of interest to academics, students and practitioners interested in urbanization in China.

Transnational Feminism and Women's Movements in Post-1997 Hong Kong Adelyn Lim, 2015-06-01 This study demonstrates that recognizing the differences of the women activists promoting disparate agendas leads to a fuller appreciation of the connections and commonalities in the relations among those involved. Transnational Feminism and Women's Movements in Post-1997 Hong Kong: Solidarity Beyond the State is the first comprehensive account of feminism and women's movements in Hong Kong. The unique geographical, historical and cultural situation of the city provides the backdrop for Adelyn Lim to bring diverse groups of activists organizing socially disadvantaged and disaffected women, many of whom originating from Mainland China or South and Southeast Asia, to the foreground. Feminism, Lim argues, is not premised on a collective identity; it should rather be understood as a collective frame of action. The book begins with a critical history of women's mobilization during the British colonial period and the lead up to governance under the People's Republic of China. Subsequent chapters discuss the organizational forms, rhetoric, and strategies of women's groups in addressing the feminization of poverty, engagement with state institutions, violence against women, prostitution, and domestic work. Conflicts between feminist ideals and the realities and demands of the sociopolitical environment are thrown into sharp relief. The empirical analysis makes a case for Hong Kong to be considered a prime site to challenge and renew the theorizing of transnational feminism. In this well written monograph, Adelyn Lim explores the multiple forms of women's activism in the tense political environment of post-1997 Hong Kong. Using feminist theory and social movement scholarship, she explores processes of framing social action and building coalitions in a context where unresolved conflicts abound. The result is a rich portrait of activism in one of the world's most globalized cities. —Andrew

Kipnis, author of China and Postsocialist Anthropology: Theorizing Power and Society after Communism A book about Hong Kong feminisms that manages to be both sweeping and intimate, with through-lines of historical and political context seamlessly interwoven with details of activist identities and commitments. Lim skillfully connects feminist and social movement theory with movement praxis to develop a compelling account of local feminist organizing situated in a clear transnational context. –Sharon Wesoky, author of Chinese Feminism Faces Globalization
