Biharmonic Submanifolds And Biharmonic Maps In Riemannian Geometry Ye-lin Ou, Bang-yen Chen, 2020-04-04 The book aims to present a comprehensive survey on biharmonic submanifolds and maps from the viewpoint of Riemannian geometry. It provides some basic knowledge and tools used in the study of the subject as well as an overall picture of the development of the subject with most up-to-date important results. Biharmonic submanifolds are submanifolds whose isometric immersions are biharmonic maps, thus biharmonic submanifolds include minimal submanifolds as a subclass. Biharmonic submanifolds also appeared in the study of finite type submanifolds in Euclidean spaces. Biharmonic maps are maps between Riemannian manifolds that are critical points of the bienergy. They are generalizations of harmonic maps and biharmonic functions which have many important applications and interesting links to many areas of mathematics and theoretical physics. Since 2000, biharmonic submanifolds and maps have become a vibrant research field with a growing number of researchers around the world, with many interesting results have been obtained. This book containing basic knowledge, tools for some fundamental problems and a comprehensive survey on the study of biharmonic submanifolds and maps will be greatly beneficial for graduate students and beginning researchers who want to study the subject, as well as researchers who have already been working in the field.

The Skin Map Stephen R Lawhead, 2013-03-22 Set in 17th century and 21st century London, the Enlightenment-era court of the Hapsburgs, China during the Qing Dynasty and ancient Egypt, Bright Empires is a five-volume fantasy. In The Skin Map, Kit Livingstone and his great- grandfather, Cosimo, are brought together to find a map originally tattooed on the skin of its author, a seventeenth-century explorer who had discovered the secret of access to other worlds and parallel universes. Malign forces are also after the map and, to the surprise of all, the map proves to be not the end of the quest but its beginning. A far greater prize remains, and a much more dangerous search will need to be undertaken.

Plays by Augustin Daly Don M. B. Wilmeth, Rosemary Cullen, 1984-04-26 The American playwright and manager-director Augustin Daly dominated the theatrical scene in the United States during the last half of the nineteenth century. His plays and productions set a new standard for American theatre and exerted a strong influence in England, beginning with a first European tour in 1884 and culminating in the opening of Daly's own theatre in London in 1893. Daly, with the assistance of his brother Joseph, had over ninety of his plays or adaptations performed. This unique collection brings together three disparate examples from his prolific output: A Flash of Lightning (1868), Horizon (1871) and Love on Crutches (1884). Daly, an exceptional contriver of theatrical effects, offered the theatre of the 1870s and 1880s melodramas and comedies greatly superior to those of his competitors. These three plays represent the range and energy of his talent.
