Boom Country? Alan Rosling, 2017-05-20 In *Boom Country?*, Alan Rosling, entrepreneur and strategic advisor in India for over 35 years, explores an unmistakable and profound change that is underway in the Indian business landscape. A fresh wave of enterprise and start-ups; rapid advancements in technology; government reform; and recently developed pools of risk capital, he holds, are contributing increasingly to a massive expansion in new business ? all of it underpinned by a deep social change, a willingness to `do things differently?', especially among the young. Drawing upon his own experiences and more than 100 interviews with Indian entrepreneurs ? representing traditional leading business houses (Tata, Mahindra and Godrej), established first-generation entrepreneurs (Sunil Mittal, Kishore Biyani and Narayana Murthy, among others) and new-generation start-ups (including Sachin Bansal, Bhavish Aggarwal and Vijay Shekhar Sharma) ? as well as forces of the government, Rosling provides an incisive and in-depth analysis of the opportunities and challenges, both traditional and contemporary, of doing business in India. Yet, the growing uncertainty of global trends and India's own record of under-performing despite its massive potential, lead him to one vital question: Can the current upsurge in entrepreneurial activity ? imperfect and early as it may be ? really reshape India's economy and propel it towards becoming a true boom country for new enterprise?

Wealth and fame? Or is it hunger for innovation? *VUCA in Start-Ups* attempts to capture a start-up's entrepreneurial journey and find out why some do well when others don't. It's a highly volatile environment out there for entrepreneurs and start-ups, thanks to the unprecedented Covid-19 crisis filled with volatility, uncertainty, complexity and ambiguity (VUCA). These well-researched case studies aim to inspire those who wish to embark on an entrepreneurial journey.

My First Attempt to FAILURE Satyam Sinha,2021-09-17 My First Attempt to Failure is my first attempt to tell the story about my failed startup, which I was earlier hesitant to talk about. While the success stories make headlines with their unicorn status, the failed ones go unnoticed. This is a true story of my start-up which failed in stealth mode. Well, it was not so famous, so the failure also went unnoticed. This book paints a vivid picture of my startup odyssey from leaving my job to starting an online job portal, www.joblagao.com, and eventually shutting it down. This book would help the budding entrepreneurs to get insights into the start-up journey and avoid the mistakes which I made. I have shared some ideas which are relevant for the recruitment industry. I have also shared my views on Product Management and Digital Marketing. I could not make my ideas a huge success, but I sincerely hope that my book on failure guides you to the path of success. You would have read many stories of successful start-ups, now it's time to feel the other side.

India Connected Ravi Agrawal,2018-10-01 Former chief CNN India correspondent and award-winning journalist Ravi Agrawal takes readers on a journey across the Subcontinent, through its remote rural villages and its massive metropolises, seeking out the nexuses of change created by smartphones, and with them connection to the internet. As always with India, the numbers are staggering: in 2000, 20 million Indians had access to the internet; by 2017, 465 million were online, with three Indians discovering the internet every second. By 2020, India's online community is projected to exceed 700 million, and more than a billion Indians are expected to be online by 2025. In the course of a single generation, access to the internet has progressed from dial-up connections on PCs, to broadband access, wireless, and now 4G data on phones. The rise of low-cost smartphones and cheap data plans has meant the country leapfrogged the baby steps their Western counterparts took toward digital fluency. The results can be felt in every sphere of life, upending traditions and customs and challenging conventions. Nothing is untouched, from arranged marriages to social status to business start-ups, as smartphones move the entire economy from cash-based to credit-based. Access to the internet is affecting the progress of progress itself. As Agrawal shows, while they offer immediate and sometimes mind-altering access to so much for so many, smartphones create no

immediate utopia in a culture still driven by poverty, a caste system, gender inequality, illiteracy, and income disparity. Internet access has provided greater opportunities to women and changed the way in which India's many illiterate poor can interact with the world, but it has also meant that pornography has become more readily available. Under a government keen to control content, it has created tensions. And in a climate of hypernationalism, it has fomented violence and even terrorism. The influence of smartphones on the world's largest democracy is nonetheless pervasive and irreversible, and India Connected reveals both its dimensions and its implications.

Speeding up Sport Vidya Subramanian, 2022-11-21 Cricket has been the single most popular sport in India. In a technologically unmediated age, the game was played in the five-day test format. In 2007 though, the sport evolved itself into the Indian Premier League, an association that transformed it from mere a sport to an entertainment spectacle, raising its viewership, TRPs and popularity of the game, to hitherto unimaginable heights. The IPL consequently became India's first sporting platform. This book posits that the growth of the IPL (and of the popularity of cricket in contemporary India) has also been dependent on the parallel evolution of information and technology systems. The implications of technology have affected the way in which it can now be viewed by audiences on the television set at home; new technologies have affected umpiring decisions; new software are critically tied to generating digital audiences for the sport (it can be viewed on one's smartphone and e-devices); and in general, information and communication technology (ICT) has brought major interface between cricket players, administrators, brand managers, PR agencies and the audience. Developing ICTs as a real-time technological mediation has made the IPL dependent on the internet, television broadcast, Twitter, facebook and mobile phones. This book studies this impact; it studies not only how the sport has evolved in a post liberal India, but also how technology has affected the way it is viewed and spectated upon thereby altering the cultural and social milieu of the nation.

Bank Exam Pedia Bharath Seeman, 2015-02-17 In this present era of competition, every competitive examination

consists of 5 sections Quantitative Aptitude, Reasoning, General English, Computer Science and General Awareness related to banking industry. After teaching more than 18,000 students in 28 years, we have seen a lot of students spending their time practicing aptitude and reasoning alone. But the students who cleared the exam would definitely say the above method of practicing would not help because merely passing in Aptitude and Reasoning sections will not help. Students should also think about the other sections and overall cut off. We know a lot of students who cleared all the sections but failed to clear the overall cut off. In fact, Practicing GK and English is the only way to raise the overall cut-off. So, we have decided to dedicate this entire magazine just for General Awareness & Banking awareness. We sincerely believe that students who practice the next 100 pages would secure 40 marks from the Banking awareness section. We thank Google Play for publishing our e-magazine on their mobile platform. We also thank our students who assisted to bring this magazine out.

Asymmetric information on non-cognitive skills in the Indian labor market: An experiment using an online job portal Yamauchi, Futoshi, Nomura, Shinsaku, Imaizumi, Saori, Areias, Ana, Chowdhury, Afra, 2018-07-20 This paper examines the impact of non-cognitive (socio-emotional) skills on job market outcomes using a randomized control trial implemented in an online job portal in India. Job seekers who registered in the portal were asked to take a Big Five type personality test and, for a random sub-sample of the test takers, the results were displayed to potential employers. Outcomes are measured by whether a potential employer shortlists a seeker by opening (unlocking) his/her application and background information. The results show that the treatment group for whom test results were shown generally enjoyed a higher probability of unlock. That is, employers are more interested in those for whom they can see personality test results. Such a relationship was not seen in the pre-test period, which confirms that the above results are unlikely to be spurious. We also found a significant impact among organized, calm, imaginative and/or quiet applicants (no effect was detected among easy-going, sensitive, realistic and/or out-going applicants), which seems to display employers' preferences.
