Quiz Mania Thomas Kolåsæter, 2012-03-14 I denne spørreboken er det noe for enhver – enten man er bokorm, sportsidiot eller TV-slave. Noen spørsmål er lette, andre er vanskelige. Noen er til og med umulige. Eller? Thomas Kolåsæter er en norsk quizer. I VM i quiz i 2010 ble han nummer 8, noe som er tidenes beste resultat av en nordmann i VM. Han har også to ganger kommet blant de 10 beste i EM i quiz. Kolåsæter har sin styrke innen spørsmål om litteratur og film, men regnes først og fremst som en god allrounder uten noen særlig svake områder.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate

anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Call TV quiz shows Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee,2007-01-25 Call TV quiz shows are an example of television programmes provided by commercial broadcasters in order to increase their revenue. The viewer watches the live broadcast, then sends a text message or makes a premium rate telephone call in order to take part, with the broadcaster keeping a proportion of the call revenue. The Culture Committee has decided to examine this development, and whether some form of regulation is required since the programmes seem to be another means of gambling, with some members of the public complaining about them. This report therefore has set out a number of recommendations as to how broadcasters and regulators should address this. The Committee states that there seems to be a lack of fairness and transparency throughout the process. For example, players are generally not told that it is a matter of luck whether a call is connected to the studio and that the chances of getting through are very slim. Also the cost of calling is not always made as clear as it might be, or the amount players might have to spend to win a prize. Primary responsibility for maintaining confidence in the Call TV quiz show format rests with the operating companies and the broadcasters. The Committee believes that the guidance drawn up by the two main regulators, Ofcom and ICSTIS does not go far enough; the Committee also states that Call TV quiz shows should constitute gaming under the Gambling Act 2005, and the Culture Department and the Gambling Commission should consider this as a matter of urgency; operators should have voluntarily introduced practices intended to help viewers who make repeated premium rate calls appreciate how much they are spending; also some assessment of the

addiction to participation in such shows should be undertaken; viewers should be made aware that puzzles on Call TV quiz shows have a cryptic element, and that Ofcom should make it obligatory to have games verified with a third party and solutions lodged with them to prevent underhand changes being made while the show is on air; Ofcom should also publish periodic reports on its monitoring of Call TV quiz programmes; any practice of misleading viewers about call volumes or of blocking of calls would be unfair and fraudulent and should be punished under criminal law; the Committee recommends that broadcasters should be required to display some recent historical information about volume of incoming calls, and the odds of being connected to the studio; also that a single body, Ofcom, take responsibility for registering all complaints.

Media Technologies and Posthuman Intimacy Jan Stasienko, 2021-12-16 Constructing a theory of intimacy describing processes occurring between a 'human' subject and information creations, Jan Stasienko shows in what way and in what phases that relationship is built and what its nature is. He discusses technologies and genres related to the construction of a new television message (teleprompter, interactive television forms appearing both in the analogue and digital eras), composition of the film image and specificity of cinematic technologies (peep show, hybrid animation, digital visual effects). Also new-media technologies and genres will be discussed (for example, aspects relating to computer games and Web portals making video materials available). This diversity is prompted by the desire to show that the building of intimacy protocols is not the domain of the digital era, and on the other hand, that the posthumanism of media apparatus is a wide-ranging problem, i.e. the area encompasses various vehicles findable throughout various historical periods.

Tarzan Economics , 2021-05-18 Taking the lessons learned from his years studying the rise and

fall of the modern music industry, Spotify's Chief Economist has crafted “a compelling and generous read” (Scott Galloway) that provides the tools to recognize and adapt to disruption in any industry. As the chief economist at Spotify, Will Page has had the best seat in the house for witnessing—and harnessing—the power of disruptive change. Music has often been the canary in the coal mine for major technological and societal shifts, and if there’s one thing Page learned from the digital revolution, it’s that businesses must be ready to pivot. Drawing practical lessons from a variety of fresh case studies covering Radiohead, Starbucks, and even Groucho Marx, Page examines the eight principles that disruption has thrown into sharp relief as keys to survival in any sector. Businesses need to be ready and willing to change and, if necessary, be prepared to rebuild entire organizations and business models to do so. Pivoting through disruption has everything to do with being able to see the revolutionary changes around the corner, recognizing your strengths, and having the confidence to let go of the old vine of doing business and grab onto the new. A rare book of economics offering actionable takeaways in easy-to-understand language, Tarzan Economics is the must-read book for anyone staring at their own Napster moment and wishing they knew how to fail-safe their business.

Quiz Craze Thomas A. DeLong,1991-10-30 For more than fifty years, the quiz show has thrived on American television and radio. From Pot o' Gold and The \$64,000 Question to Wheel of Fortune and Jeopardy, quiz and game programs have entertained and informed millions of Americans, promoted and sold untold quantities of products, generated fortunes for their creators and producers, and filled the pockets of a multitude of jackpot winners. In this volume, Thomas DeLong offers the first in-depth history of quiz and game formats available in print. He describes how mass communications transformed the old parlor guessing games into enormously popular features on radio and television and examines their impact on American society and the consumer marketplace. DeLong also explores their decline in the wake of the quiz scandal inquiry of the late 1950s and their subsequent revival as new shows on daytime TV that began to build up a loyal following. Quiz Craze is enhanced by the recollections, insights, and anecdotes of many who brought the quiz show genre to listeners and viewers. Producers, directors, gamemakers, writers, emcees, panelists, and advertisers have added their first-hand observations on the inner workings and widespread influence of quiz show programming. Former contestants and their families offer reminiscences from shows such as To Tell the Truth, What's My Line?, Name That Tune, and many others. DeLong also draws on the resources of key organizations in the broadcast field, archival records, and published media reports to demonstrate the extraordinary popularity of the game show format.
