The Semantics of Grammar Anna Wierzbicka, 1988-01-01 "The semantics of grammar" presents a radically semantic approach to syntax and morphology. It offers a methodology which makes it possible to demonstrate, on an empirical basis, that syntax is neither "autonomous" nor "arbitrary", but that it follows from "semantics". It is shown that every grammatical construction encodes a certain semantic structure, which can be revealed and rigorously stated, so that the meanings encoded in grammar can be compared in a precise and illuminating way, within one language and across language boundaries. The author develops a semantic metalanguage based on lexical universals or near-universals (and, ultimately, on a system of universal semantic primitives), and shows that the same semantic metalanguage can be used for explicating lexical, grammatical and pragmatic aspects of language and thus offers a method for an integrated linguistic description based on semantic foundations. Analyzing data from a number of different languages (including English, Russian and Japanese) the author explores the notion of ethnosyntax and, via semantics, links syntax and morphology with culture. She attempts to demonstrate that the use of a semantic metalanguage based on lexical universals makes it possible to rephrase the Humboldt-Sapir-Whorf hypothesis in such a way that it can be tested and treated as a program for empirical research.

Destined Martial God Yan YunYuQi, 2019-11-18 When Yu Haoran woke up again, he had gone back to more than one hundred years ago, to the year he turned sixteen and his fate was ushered to a turning point. This time, Yu Haoran retained not only all the memories of previous life, but also a domain tower which was omniscient and had the ability of time acceleration. In this life, as a martial cultivator who practiced less than a month and barely entered the early period of First Level Martial Disciple, how would Yu Haoran achieve his legendary life relying on the memories of the previous life? [About the Author] Yan Yun Yu Qi is an outstanding novelist. His works include *The Destiny of God*, *The Strongest Reproduction*, *My Dantian has a book*, *The Best of the Master*, *The Anti-Long Ares*, a total of five novels. From modern romance to fantasy novels, Yan Yunyuqi can grasp the writing of different styles, which is inseparable from his love of writing and reading from an early age. It is with this enthusiasm that he can continue to insist on creation.

Beyond Functional Sequence Ur Shlonsky, 2015 Cartography is a research program within syntactic theory that studies the syntactic structures of a particular language in order to better understand the semantic issues at play in that language. The approach arranges a language's morpho-syntactic features in a rigid universal hierarchy, and its research agenda is to describe this hierarchy -- that is, to draw maps of syntactic configurations. Current work in cartography is both empirical -- extending the approach to new languages and new structures -- and theoretical. The 16 articles in this collection will advance both dimensions. They arise from presentations made at the Syntactic Cartography: Where do we go from here? colloquium held at the University of Geneva in June of 2012 and address three questions at the core of research in syntactic cartography: 1. Where do the contents of functional structure come from? 2. What explains the particular order or hierarchy in which they appear? 3. What are the computational restrictions on the activation of functional categories? Grouped thematically into four sections, the articles address these questions through comparative studies across various languages, such as Italian, Old Italian, Hungarian, English, Jamaican Creole, Japanese, and Chinese, among others.

Blissful Alchemic God Wang LingXin, 2019-11-04 The heaven and earth was in chaos as the heavens took on the shape of three souls, bringing their creations, the Heaven's Path Divine Artifact,

into the cycle of reincarnation, and condensing the Heaven's Path aura. The grandmaster of arcane arts, Chu Batian, a 21st century fan of metaphysics and ancient literature, reincarnated and became one with three souls, becoming a legend of his generation, the god of extreme joy, Li Tianle. Alchemy, weapon crafting, talisman drawing, and puppet controlling were all very interesting. They teased geniuses, played with the strong, and oppressed the heavens. Close]

Constructing a Chinese School of International Relations Yongjin Zhang, Teng-Chi Chang, 2016-06-10 This edited volume offers arguably the first systemic and critical assessment of the debates about and contestations to the construction of a putative Chinese School of IR as sociological realities in the context of China's rapid rise to a global power status. Contributors to this volume scrutinize a particular approach to worlding beyond the West as a conscious effort to produce alternative knowledge in an increasingly globalized discipline of IR. Collectively, they grapple with the pitfalls and implications of such intellectual creativity drawing upon local traditions and concerns, knowledge claims, and indigenous sources for the global production of knowledge of IR. They also consider critically how such assertions of Chinese voices and articulation of their ambition for theoretical innovation from the disciplinary margins contribute to the emergence of a Global IR as a truly inclusive discipline that recognizes its multiple and diverse foundations. Reflecting the varied perspectives of both the active participants in the Chinese School of IR debates within China and the observers and critics outside China, this work will be of great interest to students and scholars of IR theory, Non-Western IR and Chinese Studies.

The Origins of Planetary Ethics in the Philosophy of Russian Cosmism A. Bezgodov, K. Barezhev, 2019-01-28 In this book, Aleksandr V. Bezgodov and Konstantin V. Barezhev formulate planetary ethics—the most important part of the philosophy of the Planetary Project. Planetary ethics represent the moral basis and value code for building a biocompatible, harmonious, and manageable civilization. They analyze the moral and ethical views of those Russian cosmists who belonged to the natural science branch of this unique philosophical, scientific, and cultural phenomenon. Looking at the world through the prism of a planetary-cosmic consciousness, cosmists developed a system of biocentric and humanistic values. Russian cosmism is a spiritual rebellion of life against chaos, death, and limitation. A combination of science, philosophy, poetry, and a certain utopianism extended on a universal scale makes Russian cosmism a prologue to the modern nonclassical, science-based worldview that emphasizes synergy and globalism. Back in the late nineteenth to early twentieth century, cosmists focused on a united humanity and the principles of a close relationship between man and the universe. This monograph lays the groundwork for the planetary ethics that originated in the philosophy of Russian cosmism. The monograph continues the series of books of the Planetary Project, *Planetary Project: From Sustainable Development to Managed Harmony* and *Planetary Rent as an Instrument for Solving Global Problems*.
