This is not a step-by-step tutorial. This is also not a guide book kind of overview material. We place our focus on the practical side of 3D game creation - practical tips and techniques one will definitely need when starting out a 3D race car game project. We also tell exactly what can and cannot be done with 3DRAD, and the kind of performance drawback that can be foreseen when the platform is not fed with the right inputs. So, are you ready for the challenge?
