Marc Rosenthal

Homemade Robots Randy Sarafan,2021-08-10 **Homemade Robots** teaches total beginners how to quickly and easily build 10 mobile, autonomous bots with simple tools and common household materials. A Perfect DIY STEAM adventure for the electronically curious. **Homemade Robots** is a beginner's guide to building a wide range of mobile, autonomous bots using common household materials. Its 10 creative and easy-to-follow projects are designed to maximize fun with minimal effort—no electronics experience necessary! From the teetering Wobbler to the rolling Barreller, each bot is self-driving and has a unique personality. There's the aptly named Inchworm Bot made of aluminum rulers; Buffer, a street sweeper-like bot that polishes the floor as it walks; and Sail Bot, which changes direction based on the wind. Randy Sarafan's hacker approach to sculptural robotics will appeal to builders of all ages. You'll learn basic electronics, get comfortable with tools and mechanical systems, and gain the confidence to explore further on your own. A wide world of robots is yours to discover, and **Homemade Robots** is the perfect starting point.

Big Bot, Small Bot Marc Rosenthal,2015-06-09 **Robots are**

perennial kid-favorites. In this series, acclaimed illustrator Marc Rosenthal's vividly colored, retro-futuristic robots encourage kids age 2 to 5 to lift the flaps and learn all about basic concepts. Big Bot, Small Bot invites young readers to play with robots who demonstrate opposites such as quiet and loud, front and back, and full and empty. Each illustration in this interactive book is presented with a gatefold that, when lifted, transforms the image into its opposite! Simple yet endlessly entertaining, Big Bot, Small Bot is a perfect read-aloud for toddlers and preschoolers. · Printed on sturdy, thick paper, these titles can stand up to the challenge of little hands and repeated readings · Marc's illustrations can be seen regularly in The New Yorker, Time, Forbes, Fortune, The Atlantic Monthly, The New York Times, Boston Globe, and The Washington Post; his previous children's books have been described by The New York Times Book Review as hugely appealing. Series Overview Artist Marc Rosenthal's new series of interactive concept books introduces a group of friendly, colorful, retro-futuristic robots that demonstrate counting, opposites, shapes, and colors through lift-the-flap gatefolds that transform each illustration in a kid-pleasing way.

Build Your Own Motorcycle Bot Tucker Besel, 2018 Get kids

building and making with these first robot books. Step-by-step instructions and illustrations teach young engineers the basic construction of simple robots. Using simple materials readers will create basic robots that wiggle, scribble, and race.

Conspiracy Girl Sarah Alderson, 2015-02-12 'High on emotion, action, romance and danger, Conspiracy Girl grips like a vice... and steals your heart!' Lancashire Evening Post 'I was honestly hooked the moment I started reading' Slanted Bookshelf 'Absolutely read it and fall in love with Finn.' The Overflowing Library 'Sarah Alderson is undoubtedly the queen of sexy YA thrillers' So Little Time for Books Everybody knows about the Cooper Killings. There was only one survivor - fifteen year-old Nic Preston. Now eighteen, Nic is trying hard to rebuild her life. But then one night her high-security apartment is broken into. It seems the killers are back to finish the job. Finn Carter - hacker, rule breaker, player - is the last person Nic ever wants to see again. He's the reason her mother's murderers walked free. But as the people hunting her close in, Nic has to accept that her best chance of staying alive is by staying close to Finn. And the closer they get to the truth, and to each other, the greater the danger becomes.

Arduino Robotics John-David Warren, Josh Adams, Harald

Molle,2011-10-08 This book will show you how to use your Arduino to control a variety of different robots, while providing step-by-step instructions on the entire robot building process. You'll learn Arduino basics as well as the characteristics of different types of motors used in robotics. You also discover controller methods and failsafe methods, and learn how to apply them to your project. The book starts with basic robots and moves into more complex projects, including a GPS-enabled robot, a robotic lawn mower, a fighting bot, and even a DIY Segway-clone. Introduction to the Arduino and other components needed for robotics Learn how to build motor controllers Build bots from simple line-following and bump-sensor bots to more complex robots that can mow your lawn, do battle, or even take you for a ride Please note: the print version of this title is black & white; the eBook is full color.

Mexican WhiteBoy Matt de la Peña, 2008-08-12 Newbery

Award-winning and New York Times bestselling author Matt de la Peña's *Mexican WhiteBoy* is a story of friendship, acceptance, and the struggle to find your identity in a world of definitions. Danny's tall and skinny. Even though he's not built, his arms are long enough to give his pitch a power so fierce any college scout would sign him on the spot. Ninety-five mile an hour fastball, but the boy's not even on a team. Every time he gets up on the mound he loses it. But at his private school, they don't expect much else from him. Danny's brown. Half-Mexican brown. And growing up in San Diego that close to the border means everyone else knows exactly who he is before he even opens his mouth. Before they find out he can't speak Spanish, and before they realize his mom has blond hair and blue eyes, they've got him pegged. But it works the other way too. And Danny's convinced it's his whiteness that sent his father back to Mexico. That's why he's spending the summer with his dad's family. Only, to find himself, he may just have to face the demons he refuses to see--the demons that are right in front of his face. And open up to a friendship he never saw coming. Matt de la

Peña's critically acclaimed novel is an intimate and moving story that offers hope to those who least expect it. [A] first-rate exploration of self-identity.-SLJ Unique in its gritty realism and honest portrayal of the complexities of life for inner-city teens...De la Peña poignantly conveys the message that, despite obstacles, you must believe in yourself and shape your own future.-The Horn Book Magazine The baseball scenes...sizzle like Danny's fastball...Danny's struggle to find his place will speak strongly to all teens, but especially to those of mixed race.-Booklist De la Peña blends sports and street together in a satisfying search for personal identity.-Kirkus Reviews Mexican WhiteBoy...shows that no matter what obstacles you face, you can still reach your dreams with a positive attitude. This is more than a book about a baseball player--this is a book about life.-Curtis Granderson, New York Mets outfielder An ALA-YALSA Top Ten Best Book for Young Adults A Junior Library Guild Selection

Robot Building for Beginners, Third Edition David

Cook,2015-09-02 I wrote this book because I love building robots. I want you to love building robots, too. It took me a while to learn about many of the tools and parts in amateur robotics. Perhaps by writing about my experiences, I can give you a head start.--David

Cook Robot Building for Beginners, Third Edition provides basic, practical knowledge on getting started in amateur robotics. There is a mix of content: from serious reference tables and descriptions to personal stories and humorous bits. The robot described and built in this book is battery powered and about the size of a lunch box. It is autonomous; that is, it isn't remote controlled. The book is broken up into small chapters, suitable for bedtime (or bathroom) reading. The characteristics and purposes of each major component (resistor, transistor, wire, and motor) are described, followed by a hands-on experiment to demonstrate. Not only does this help the reader to understand a particular piece, but it also prepares them with processes to learn new parts on their own. An appendix offers an introduction to 3D printing and parts of the robot can, as an alternative, be printed using a 3D printer. The master project of the book is a simple, entertaining, line-following robot.

Robot Building for Beginners David Cook, 2010-07-30 “I wrote this book because I love building robots. I want you to love building robots, too. It took me a while to learn about many of the tools and parts in amateur robotics. Perhaps by writing about my experiences, I can give you a head start.” —David Cook Robot Building for Beginners, Second Edition is an update of David

Cook's best-selling Robot Building for Beginners. This book continues its aim at teenagers and adults who have an avid interest in science and dream of building household explorers. No formal engineering education is assumed. The robot described and built in this book is battery powered and about the size of a lunchbox. It is autonomous. That is, it isn't remote controlled. You'll begin with some tools of the trade, and then work your way through prototyping, robot bodybuilding, and eventually soldering your own circuit boards. By the book's end, you will have a solid amateur base of understanding so that you can begin creating your own robots to vacuum your house or maybe even rule the world!

Black Swan Green David Mitchell, 2007-02-27 By the New York Times bestselling author of *The Bone Clocks* and *Cloud Atlas* | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. *Black Swan Green* tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepiest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a

frozen lake; of “nightcreeping” through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason’s search to replace his dead grandfather’s irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher’s recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and painted with the stuff of life, *Black Swan Green* is David Mitchell’s subtlest and most effective achievement to date. Praise for *Black Swan Green* “[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like.”—The Boston Globe “[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and Herman Melville, one feels the roof

of the narrative lifted off and oneself in thrall.”—Time
