Social Exclusion, Power, and Video Game Play

David G. Embrick, J. Talmadge Wright, András Lukács, 2012 While many books and articles are emerging on the new area of game studies and the application of computer games to learning, therapeutic, military, and entertainment environments, few have attempted to contextualize the importance of virtual play within a broader social, cultural, and political environment that raises the question of the significance of work, play, power, and inequalities in the modern world. Studies tend to concentrate on the content of virtual games, but few have questioned how power is produced or reproduced by publishers, gamers, or even social media; how social exclusion (based on race, class, or gender) in the virtual environment is reproduced from the real world; and how actors are able to use new media to transcend their fears, anxieties, prejudices, and assumptions. The articles presented by the contributors in this volume represent cutting-edge research in the area of critical game play with the hope of drawing attention to the need for more studies that are both sociological and critical.

Children's Rights from International Educational Perspectives Jenna Gillett-Swan, Nina

Thelander, 2021-12-01 This book critically examines contemporary educational practices with a children's rights lens. Through investigating the factors that contribute to (or hinder) the realisation of children's rights in and through education in different contexts, it discusses how using a rights framework for education furthers

the agenda for achieving international educational aims and goals. Using diverse international examples, the book provides a snapshot of the complexity of children's rights and education. It draws on the expertise of international research teams from Australia, England, Finland, Italy, Mexico, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, and the United States, and highlights wide-ranging interpretations of the same mandate across different national contexts. Beginning with a critical overview of the broader context of children's rights in education, the book explores obligations for States and their representatives, tensions and convergences in implementation, and implications for teaching and learning. Using underutilised educational and theoretical concepts, it contributes to broadening understandings of children's rights, education and associated theoretical frameworks. Despite a human rights framework emphasising the indivisibility, interrelatedness and interconnectedness of all rights, the 'right to education' (Article 28) dominates discussions about children's rights and education. As such, equally important rights including the 'aims of education' (Article 29) are often less considered or absent from the conversation. Recognising that children's education rights involve more than just access and provision, this book advocates for a much broader understanding of the nuances underpinning children's education related rights. From Exclusion to Excellence Michal Razer, Victor J. Friedman, 2017-01-28 The authors draw on their 30 years of action-research activities helping educators provide a meaningful education to at-risk/excluded students. They explain how teacher well-being is a precondition for building the sorts of relationships that enable excluded students to learn. They present in detail four concrete skills (non-abandonment, reframing, connecting conversation, and emphatic limit-setting) for reaching children and at the same time strengthening educators' emotional resilience and professional pride. They address how schools can rethink and reshape the way they relate to parents of excluded children, so as to allow both sides to trust and empower each other. If you are a teacher, this book will help you make sense of the difficulties you face daily and provide you with reliable methods for working more effectively. If you are a principal or policymaker, it will show how the road to excellence begins with inclusion, and with providing teachers the kind of support that enables them to succeed. I am not an education expert, but you don't have to be to want to implement the conclusions that Michal Razer and Victor J. Friedman make about schools to societies as a whole. To produce a successful school serving the needs of all of its students, you need to focus—before passing out any curriculum or teaching any classes—on building that elusive

thing called “trust”, or what the authors call “inclusion”. When there is trust in the classroom, when every student believes that they and their aspirations matter to a teacher, everything is possible and everything is easier—the most difficult students become more educable and inspired and take more ownership over their success—and the best students soar even higher. This book should be read by teachers, parents and politicians alike, because its incisive recommendations for building more successful schools apply just as much to families and parliaments. – Thomas L. Friedman, New York Times columnist /div

The Holy People of God Svetlana Khobnya, Arseny Ermakov, Deirdre Brower Latz, Peter Rae, MiJa Wi, 2024-03-13 This collection of essays addresses aspects of Christian identity formation as God’s holy people in a global context in the midst of various challenges. The contributors offer interdisciplinary explorations on what it means to live as God’s holy people in different settings and consider challenging questions from biblical, historical, theological, missiological, and pastoral perspectives.

The SAGE Handbook of Inclusion and Diversity in Education Matthew J. Schuelka, Christopher J. Johnstone, Gary Thomas, Alfredo J. Artiles, 2019-09-30 This handbook examines policy and practice from around the world with respect to broadly conceived notions of inclusion and diversity within education. It sets out to provide a critical and comprehensive overview of current thinking and debate around aspects such as

inclusive education rights, philosophy, context, policy, systems, and practices for a global audience. This makes it an ideal text for researchers and those involved in policy-making, as well as those teaching in classrooms today. Chapters are separated across three key parts: Part I: Conceptualizations and Possibilities of Inclusion and Diversity in Education Part II: Inclusion and Diversity in Educational Practices, Policies, and Systems Part III: Inclusion and Diversity in Global and Local Educational Contexts

Social Participation of Students with Special Educational Needs in Mainstream Education Susanne Schwab, Mirna Nel, Frank Hellmich, 2020-05-21 This book provides deep insight into the social situation of students with different kinds of special needs in various European countries. Research findings concerning students' attitudes towards peers with disabilities, and teachers' feedback on students' social behaviour, are also presented. Full inclusion of students with special educational needs in mainstream education requires equity in each student's chances for academic and social-emotional development, and their participation in society. In the context of inclusive education, it is important to take students' social participation into consideration. Are students with special educational needs (SEN) accepted by their peers? Do they interact with their peers during breaks and classes? Do they have friends, or do they feel lonely in their class? This book seeks to answer such questions, seeing social participation as a crucial ingredient, as well as an outcome, of inclusive education. This topic is critical because many previous studies show students with SEN having a high risk of social exclusion. This volume will be of interest to everyone studying special needs

education, especially those concerned with future improvement of social participation for all students. This book was originally published as a special issue of the European Journal of Special Needs Education. Chapter 1 is available Open Access at

Marginalisation and Human Rights in Southeast Asia Al Khanif, Khoo Ying Hooi, 2022-12-28 This book analyses marginalisation and human rights in Southeast Asia and offers diverse approaches in understanding the nuances of marginalisation and human rights in the region. Throughout the region, a whole range of similarities and differences can be observed relating to the Southeast Asian experience of human rights violation, with each country maintaining particular aspects reflecting the variability of the use and abuse of political power. This book explores the distinct links between marginalisation and human rights for groups exposed to discrimination. It focuses on ethnic minorities, children, indigenous peoples, migrant workers, refugees, academics, and people with disabilities. This book highlights the

disparities in attainment and opportunity of marginalised and minority groups in Southeast Asia to their rights. It examines how marginalisation is experienced, with case studies ranging from a regional approach to country context. Paying attention to how broader socio-economic and political structures affect different people's access to, or denial of, their fundamental human rights and freedoms, the book argues that tackling human rights abuses remains a major hurdle for the countries in Southeast Asia. Providing a broader conceptual framework on marginalisation and human rights in Southeast Asia and a new assessment of these issues, this book will be of interest to readers in the fields of Asian Law, Human Rights in Asia, and Southeast Asian Studies, in particular Southeast Asian Politics.

Masculinities in Play Nicholas Taylor, Gerald Voorhees, 2018-10-06 This volume addresses the persistent and frequently toxic associations between masculinity and games. It explores many of the critical issues in contemporary studies of masculinity—including issues of fatherhood, homoeroticism, eSports, fan cultures, and militarism—and their intersections with digital games, the contexts of their play, and the social futures associated with sustained involvement in gaming cultures. Unlike much of the research and public discourse that put the onus of “fixing” games and gaming cultures on those at its margins—women, LGBTQ, and people of color—this volume turns attention to men and masculinities, offering vital and productive avenues for both practical and theoretical intervention.

Building Community to Create Equitable, Inclusive and Compassionate Schools through Relational Approaches Joan G Mowat, 2022-11-30 This book draws on an extensive international literature and policy context, from a wide range of fields of enquiry, to challenge the orthodoxies and systemic issues that serve to marginalise children and young people and lead the way for schools to become more equitable, inclusive and compassionate in their practice. With a particular focus on children with social, emotional and behavioural/mental health needs, it critiques policy and practice as they pertain to behaviour management and school discipline in the UK and the USA, and offers alternative perspectives based on collaborative and relational approaches to promoting positive behaviour and building community. Each chapter features reflection points to provoke discussion as well as offering additional suggested reading, culminating in a discussion of the role of school leaders in leading for social justice. Ultimately, this book will be of benefit to scholars, researchers and students working in the fields of behaviour management, inclusion and special needs education, and education, policy and politics more broadly. It will also offer substantial appeal to education professionals, school leaders and those with a locus on the mental health and wellbeing of children and young people.

Ethnosport Alexey Kylasov, 2015 The study known as 'Ethnosport' describes the cultural diversity, identity, and folk traditions in sports, with special reference to Eastern cultures. A rich

world - of games, competitions, rituals, and festivities - opens when examining Russia as well as the minority peoples' cultures of Siberia, Central Asia, and East Asia. This book encourages research in similar, living, folk-sport traditions in further regions of the world. It contributes to the understanding of bodily democracy as people's self-determination in bodily practice. Searchable Talk Michele Zappavigna, 2018-05-17

Metadata such as the hashtag is an important dimension of social media communication. Despite its important role in practices such as curating, tagging, and searching content, there has been little research into how meanings are made with social metadata. This book considers how hashtags have expanded their reach from an information-locating resource to an interpersonal resource for coordinating social relationships and expressing solidarity, affinity, and affiliation. It adopts a social semiotic perspective to investigate the communicative functions of hashtags in relation to both language and images. This book is a follow up to Zappavigna's 2012 model of ambient affiliation, providing an extended analytical framework for exploring how affiliation occurs, bond by bond, in online discourse. It focuses in particular on the communing function of hashtags in metacommentary and ridicule, using recent Twitter discourse about US President Donald Trump as a case study. It is essential reading for researchers as well as undergraduates studying social media on any

academic course.

The Internet of Things Michael Miller, 2015 The old Internet typically connected personal computers. But a radically new Internet is emerging. Some call it an Internet of Things (IoT) or Internet of Everything (IoE). The IoT won't just connect people: it'll connect smart homes, appliances, cars, aircraft (a.k.a. drones)... offices, factories, cities... the world. By some estimates, the IoE will explode into a \$19 trillion market in just a few years. If that happens... when that happens... it will transform your life. *¿* You need to know what's coming. But, until now, most guides to the Internet of Everything have been written for technical experts. Now, the world's #1 author of beginning technology books has written the perfect introduction for every consumer and citizen. In *The Internet of Things*, Michael Miller reveals how a new generation of autonomously connected smart devices is emerging, and how it will enable people and devices to do more things, more intelligently, and more rapidly. *¿* Miller demystifies every type of smart device, both current and future. Each chapter ends with a special ...and You section, offering up-to-the-minute advice for using today's IoE technologies or preparing for tomorrow's. *¿* You'll also discover the potential downsides and risks associated with intelligent, automatic interaction. When all your devices can communicate with each other (and with the companies that sell and monitor them), how private is your private life? Do the benefits outweigh the risks? And what does a connected world do when the connections

suddenly go down? Packed with scenarios and insider interviews, The Internet of Things makes our future utterly, vividly real.

The Internet of Things, uPDF eBook ,2015-11-09

How the Internet of Things will change your life: all you need to know, in plain English! The Internet of Things (IoT) won't just connect people: It will connect "smart" homes, appliances, cars, offices, factories, cities... the world. You need to know what's coming: It might just transform your life. Now, the world's #1 author of beginning technology books has written the perfect introduction to IoT for everyone. Michael Miller shows how connected smart devices will help people do more, do it smarter, do it faster. He also reveals the potential risks—to your privacy, your freedom, and maybe your life. Make no mistake: IoT is coming quickly. Miller explains why you care, helps you use what's already here, and prepares you for the world that's hurtling toward you. -- What is IoT? How does it work? How will it affect me? --What's realistic, and what's just hype? -- How smart is my "smart TV" really? (And, is it watching me?) --Can smart IoT devices make me healthier? --Will smart appliances ever be useful? --How much energy could I save with a smart home? --What's the future of wearable tech? --When will I have a self-driving car? --When will I have a nearly self-driving car? (Hint: Surprisingly soon.) --Is IoT already changing the way I shop? - -What's the future of drones, at war and in my neighborhood? --Could smart cities lower my taxes? --Who gets the data my devices are collecting? -- How can I profit from the Internet of Things? --

What happens when the whole world is connected? -- Will I have any privacy left at all?

A Social History William A. C. Polk, 2010-08 This social history is not just an autobiography. The emphasis of this personal history is to demonstrate that Social History develops as a consequence of interactions and relationships between human beings. Not one of us consciously sets out to change the world, but minuscule changes resulting from our presence, causes us, without being aware of it, to leave an imprint on all humanity. Reflection on these two facts can generate realization that every human being on earth can and does effect change in the human condition. Consequently, few of us realize how significant our life existence really is, until someone reminds us that our presence made a host of differences in their own lives. Once we become aware of this truth, we can record expositions such as this one. After 87 years of living, the mountaintops and the valleys of my life have become --only in hindsight --a tangible part of our country's Social History. All I have done here is what I hope many more of you can, and will do --record your own history, and enjoy the vision of how your interactions with people helped to shape you, your family, your community, your society and the world. What is Life all about? Are you important to all humanity? The answer to the second question---- OH YES YOU ARE!! That's what I've tried to show you here.

The Palgrave International Handbook of School Discipline, Surveillance, and Social Control Jo Deakin, Emmeline Taylor, Aaron Kupchik, 2018-06-07

Truly international in scope, this Handbook focuses on approaches to discipline, surveillance and social control from around the world, critically examining the strategies and practices schools employ to monitor students and control their behavior. Bringing together leading scholars from a range of disciplinary backgrounds, the chapters scrutinize, analyze and compare schools' practices across the globe, providing a critical review of existing evidence, debates and understandings, while looking forward to address emerging important questions and key policy issues. The chapters are divided into four sections. Part 1 offers accounts of international trends in school discipline, surveillance and punishment; Part 2 examines the merging of school strategies with criminal justice practices; Part 3 focuses on developments in school technological surveillance; and Part 4 concludes by discussing restorative and balanced approaches to school discipline and behavior management. As the first Handbook to draw together these multiple themes into one text, and the first international comparative collection on school discipline, surveillance and social control, it will appeal to scholars across a range of fields including sociology, education, criminology, critical security studies and psychology, providing a unique, timely, and indispensable resource for undergraduate educators and researchers.

The SAGE Handbook of Action Research Peter Reason, Hilary Bradbury, 2013-03-26 'For anyone seeking to create meaning out of life, inspire others with publication of research discoveries

and insights, and help the world become a better place within which to live and work, action research holds great promise as an approach. The challenge is to do it well and with rigor. The Handbook is a magnificent collection of articles that will help the reader do all of that' - Richard E. Boyatzis, Case Western Reserve University and ESADE 'This second volume will be a welcome extension of the landmark first volume of the SAGE Handbook of Action Research. It effectively secures the field's 'second wave' in a particularly powerful and creative articulation of well-theorised practice. It could not be more timely for a fast-growing field that has attracted recent appreciation from parties as disparate as Shell, 3M, Australian Aboriginal women in outback Australia working to prevent harm to children and the Secretary General of the UN' - Yolanda Wadsworth 'For anyone thinking about or doing action research, this book is an obligatory point of reference. If any one text both maps the action research paradigm, and at the same time moves it on, this is it' - Bill Cooke, Manchester Business School Building on the strength of the seminal first edition, the The SAGE Handbook of Action Research has been completely updated to bring chapters in line with the latest qualitative and quantitative approaches in this field of social inquiry. Peter Reason and Hilary Bradbury have introduced new part commentaries that draw links between different contributions and show their interrelations. Throughout, the contributing authors really engage with the pragmatics of doing action research and demonstrate how this can be a

rich and rewarding reflective practice. They tackle questions of how to integrate knowledge with action, how to collaborate with co-researchers in the field, and how to present the necessarily 'messy' components in a coherent fashion. The organization of the volume reflects the many different issues and levels of analysis represented. This volume is an essential resource for scholars and professionals engaged in social and political inquiry, organizational research and education.
