Literatures of the World and the Future of Comparative Literature ,2023-08-14 The 2019 congress of the International Comparative Literature Association attracted many hundreds of scholars from all around the world to Macau. This volume contains a modest selection of papers to discuss the four hottest fields of the discipline: the future of comparison, the position of national and diaspora literature in the context of globalization, the importance of translation, and the concepts of world literature. The contributions cover huge geographical and cultural areas, but pay special attention to the connections between Western (both American and European) and Asian (especially Indian and East-Asian) literatures. The literatures of the world might be different but they are also connected.
