A New Era? Sue Ingram,Lia Kent,Andrew McWilliam,2015-09-17 Timor-Leste has made impressive progress since its historic achievement of independence in 2002. From the instability that blighted its early years, the fledgling democratic country has achieved strong economic growth and a gradual reinstatement of essential social services. A decade on in 2012, Presidential and Parliamentary elections produced smooth political transitions and the extended UN peacekeeping presence in the country came to an end. But significant challenges remain. This book, a product of the inaugural Timor-Leste Update held at The Australian National University in 2013 to mark the end of Timor-Leste's first decade as a new nation, brings together a vibrant collection of papers from leading and emerging scholars and policy analysts. Collectively, the chapters provide a set of critical reflections on recent political, economic and social developments in Timor-Leste. The volume also looks to the future, highlighting a range of transitions, prospects and undoubted challenges facing the nation over the next 5-10 years. Key themes that inform the collection include nation-building in the shadow of history, trends in economic development, stability and social cohesion, and citizenship, democracy and social inclusion. The book is an indispensable guide to contemporary Timor-Leste.

Honorable Mention Robert N. Macomber,2012-03-12 Robert Macomber's Honor series of naval fiction follows the life and career of Peter Wake in the U.S. Navy during the tumultuous years from 1863 to 1901. Honorable Mention is the third in the series. It's the fall of 1864. The Age of Sail is passing, and Lt. Peter Wake finds himself again in Key West, but this time in command of the steamer USS Hunt. He quickly plunges into action as he chases a mystery ship during a tropical storm off Cuba, deals with a seductively dangerous woman during a mission in enemy territory ashore, confronts death to liberate an escaping slave ship, and comes face to face with the enemy's most powerful warship in Havana's harbor. Wake is no longer alone in this dangerous world. His wife Linda, hiding in a pro-Union camp on Useppa Island, gives him a future to look forward to as the war nears its end. But then in January 1866, as most Union soldiers are preparing to go home, a powerful ocean raider shows up in a remote corner of the Caribbean, and Wake finds that for some the war is not over yet. The first book in the series, *At the Edge of Honor*, received the 2003 Patrick D. Smith Literary Award for Best Historical Novel of Florida, and the second, *Point of Honor*, was named the 2003 recipient of the John Esten Cook Literary Award for Best Work in Southern Fiction. His sixth novel, *A Different Kind of Honor*, won the highest national honor in his genre: the American Library Association's 2008 W. Y. Boyd Literary Award for Excellence in Military Fiction.

Seismic Vulnerability of Structures Philippe Gueguen, 2013-03-05 This book is focused on the seismic vulnerability assessment methods, applied to existing buildings, describing several behaviors and new approaches for assessment on a large scale (urban area). It is clear that the majority of urban centers are composed of old buildings, designed according to concepts and rules that are inadequate to the seismic context. How to assess the vulnerability of existing buildings is an essential step to improve the management of seismic risk and its prevention policy. After some key reminders, this book describes seismic vulnerability methods applied to a large number of structures (buildings and bridges) in moderate (France, Switzerland) and strong seismic prone regions (Italy, Greece). Contents 1. Seismic Vulnerability of Existing Buildings: Observational and Mechanical Approaches for Application in Urban Areas, Sergio Lagomarsino and Serena Cattari. 2. Mechanical Methods: Fragility Curves and Pushover Analysis, Caterina Negulescu and Pierre Gehl. 3. Seismic Vulnerability and Loss Assessment for Buildings in Greece, Andreas J. Kappos. 4. Experimental Method: Contribution of Ambient Vibration Recordings to the Vulnerability Assessment, Clotaire Michel and Philippe Guéguen. 5. Numerical Model: Simplified Strategies for Vulnerability Seismic Assessment of Existing Structures, Cédric Desprez, Panagiotis Kotronis and Stéphane Grange. 6. Approach Based on the Risk Used in Switzerland, Pierino Lestuzzi. 7. Preliminary Evaluation of the Seismic Vulnerability of Existing Bridges, Denis Davi. About the Authors Philippe Guéguen is a Senior IFSTTAR Researcher at ISTERre, Joseph Fourier University Grenoble 1, France

Multi-hazard Approaches to Civil Infrastructure Engineering Paolo Gardoni, James M. LaFave, 2016-06-22 This collection focuses on the development of novel approaches to address one of the most pressing challenges of civil engineering, namely the mitigation of natural hazards. Numerous engineering books to date have focused on, and illustrate considerable progress toward, mitigation of individual hazards (earthquakes, wind, and so forth.). The current volume addresses concerns related to overall safety, sustainability and resilience of the built environment when subject to multiple hazards: natural disaster events that are concurrent and either correlated (e.g., wind and surge); uncorrelated (e.g., earthquake and flood); cascading (e.g., fire following earthquake); or uncorrelated and occurring at different times (e.g., wind and earthquake). The authors examine a range of specific topics including methodologies for vulnerability assessment of structures, new techniques to reduce the system demands through control systems; instrumentation, monitoring and condition assessment of structures and foundations; new techniques for repairing structures that have suffered damage during past events, or for structures that have been found in need of strengthening; development of new design provisions that consider multiple hazards, as well as questions from law and the humanities relevant to the management of natural and human-made hazards.

Best Hikes Near Seattle Peter Stekel, 2015-05-01 Best Hikes Near Seattle is more than a guidebook to trails 60 minutes or 60 miles from Seattle. The book also includes short natural history essays on topics as diverse as the sex life of banana slugs, to how plants get

their names, and why you should respect but not fear bears and mountain lions. There is also an extensive section of weather, trail etiquette, hiking with dogs, what constitutes the “Ten Essentials,” why judging trail mileage is an art – not a science, the flora and fauna of the Pacific Northwest, and the value of hikers lobbying for wilderness. The author also presents a history, warts and all, of the drive to operate our hiking trails as profit points for land-use agencies. And of course, as with all of the books in the Best Hikes series, useful trail specs and hike summaries are accompanied by easy-to-read maps and stunning photos.

Perspectives on European Earthquake Engineering and Seismology Atilla Ansal, 2014-09-01 This book collects 5 keynote and 15 topic lectures presented at the 2nd European Conference on Earthquake Engineering and Seismology (2ECEES), held in Istanbul, Turkey, from August 24 to 29, 2014. The conference was organized by the Turkish Earthquake Foundation - Earthquake Engineering Committee and Prime Ministry, Disaster and Emergency Management Presidency under the auspices of the European Association for Earthquake Engineering (EAEE) and European Seismological Commission (ESC). The book’s twenty state-of-the-art papers were written by the most prominent researchers in Europe and address a comprehensive collection of topics on earthquake engineering, as well as interdisciplinary subjects such as engineering seismology and seismic risk assessment and management. Further topics include engineering seismology, geotechnical earthquake engineering, seismic performance of buildings, earthquake-resistant engineering structures, new techniques and technologies and managing risk in seismic regions. The book also presents the Third Ambraseys Distinguished Award Lecture given by Prof. Robin Spence in honor of Prof. Nicholas N. Ambraseys. The aim of this work is to present the state-of-the art and latest practices in the fields of earthquake engineering and seismology, with Europe’s most respected researchers addressing recent and ongoing developments while also proposing innovative avenues for future research and development. Given its cutting-edge content and broad spectrum of topics, the book offers a unique reference guide for researchers in these fields. Audience: This book is of interest to civil engineers in the fields of geotechnical and structural earthquake engineering; scientists and researchers in the fields of seismology, geology and geophysics. Not only scientists, engineers and students, but also those interested in earthquake hazard assessment and mitigation will find in this book the most recent advances.

Bomber Offensive Arthur Harris, 2005-03-01 The Royal Air Force commander of bombing operations during WWII offers an insider’s view of his legendary career in this classic military memoir. Marshal of the Royal Air Force Sir Arthur “Bomber” Harris remains a controversial figure in the history of the RAF. While many vilify him for his merciless carpet bombing of Germany, others believe that his contributions to Allied victory are grossly undervalued. In *Bomber Offensive*, Harris candidly describes how he led the men of Bomber Command in the face of appalling casualties, his fierce disagreements with higher authority, and the complicated relationship he had with Winston Churchill. Written soon after the close of the Second World War, Harris’s memoirs reveals the man behind the Allied bombing offensive that destroyed the Nazi war machine, but also many beautiful and historic cities, such as Dresden. His defense of these total war tactics stands in stark contrast to modern military policy, which considers such indiscriminate killing a war crime.

Rowdy from South of the Mountain Morain, 2017-09-19 *Rowdy from the South of the Mountain* By: Morain Morain grew up in the south of Pine Mountain in West Virginia in the sixties and seventies, in the shadow of the Vietnam War. Attempting to brew moonshine and ultimately grow marijuana, Morain can’t seem to get any peace as he dodges nosey neighbors, relentless thieves, ruthless local authorities, and even the Feds in helicopters time and time again, each time wondering if it’ll be the end of his growing days and, more gravely, his days as a free man, or if he’ll finally cash in on the “big crop.”

United States Army in World War II.: The war in the Pacific ,1963

United States Army in WWII - the Pacific - Triumph in the Philippines Robert Ross Smith,2014-08-15 [Includes 16 charts, 54 maps and 196 illustrations] Triumph in the Philippines is the story of the largest joint campaign of the Pacific phase of World War II. Devoted principally to the accomplishments of U.S. Army ground combat forces and to the operations of major organized Philippine guerrilla units that contributed notably to the success of the campaign, the volume describes the reconquest of the Philippine archipelago exclusive of Leyte and Samar. The narrative includes coverage of air, naval, and logistical activity necessary to broad understanding of the ground combat operations. The strategic planning and the strategic debates leading to the decision to seize Luzon and bypass Formosa are also treated so as to enable the reader to fit the Luzon and Southern Philippines Campaigns into their proper perspective of the war against Japan. For the forces of General MacArthur's Southwest Pacific Area the reconquest of Luzon and the Southern Philippines was the climax of the Pacific war, although no one anticipated this outcome when, on 9 January 1945, Lt. Gen. Walter Krueger's Sixth Army poured ashore over the beaches of Lingayen Gulf. Viewed from the aspect of commitment of U.S. Army ground forces, the Luzon Campaign (which strategically and tactically in-chides the seizure of Mindoro Island and the securing of the shipping lanes through the central Visayan Islands) was exceeded in size during World War II only by the drive across northern France. The Luzon Campaign differed from others of the Pacific war in that it alone provided opportunity for the employment of mass and maneuver on a scale even approaching that common to the European and Mediterranean theaters. The operations of Lt. Gen. Robert L. Eichelberger's Eighth Army, both on Luzon and during the Southern Philippines Campaign, were more akin to previous actions throughout the Pacific, but the southern campaign, too, presented features peculiar to the reconquest of the Philippine archipelago.
